PART III: SUPPLEMENTAL INFORMATION

Eligibility determinations for the Department's Office for Family Independence's three major programs; MaineCare, TANF and SNAP require verification of income and employment history for eligibility and benefit amount determinations. Income and employment information in the form of paystubs, W2's, etc., can be submitted by client's applying for services, but this method is cumbersome and can lead to inaccurate and/or incomplete information, especially if the job has ended, for eligibility determinations and can cause overpayments in benefits. In some instances, employers are not helpful or timely in providing to their employee's verification of their employment. They require employees to obtain verification using The Work Number. If employment information isn't provided timely, it can cause a loss in benefits, and re-processing of cases for eligibility staff once obtained. For SNAP, work requirements and timely verification of employment are important to maintain eligibility, or for closure of benefits for individuals who are not complying with the work requirements. As new policies are established, increasing the need for determinations to be made, OFI is researching ways for our Eligibility Specialists to keep up with the demands through systemic efficiencies.

Per statute 22 MRSA §16-B – Verification of integrity of reported information by applicants for public assistance reads: The department shall use commercially available data to conduct an electronic verification of information provided on an application for benefits for public assistance as defined in section 16, subsection 1, paragraph C. The electronic verification must, at a minimum, be conducted on all new applications for benefits and must include searches for income, residency and available assets.

The purpose of this amendment is to add funding. Due to increased eligibility applications and determinations, the Department surpassed the anticipated level of transactions by 40,069.

2. Provide a brief justification for the selected vendor to supplement the response in Part II.

The Work Number is a database of income and employment records of over 5,500 employers nationwide. Payroll data is updated every payroll cycle by the employers. In addition to the basic employment information, it includes wages, commissions, bonuses, overtime and historical information. Since employers regularly feed into this system, data is delivered instantaneously. This tool was created by the Provider in 1995, acquired by Equifax in 2007, and at the time of acquisition, the Provider was the leading provider of employment verification.

Other verifications services do exist; but they do not meet Department requirements regarding payroll and wage specific data necessary for eligibility and benefit determination. Upon research, there is no evidence indicating change in their provided services to include this specific data set within their system. These systems focus primarily on individual background screening for hiring purposes and/or employment verifications on hire dates and this is already data we receive with the NDNH file and is not something we are looking to receive in our income/employment records via The Work Number. The Work Number is the only verification system providing real-time data, with the largest number of nationwide employers, and with the necessary data elements required for benefit and eligibility determinations.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

Negotiated costs is the agreed to per transaction cost for transactions over and above the 78,000 included in the fixed price of this agreement.

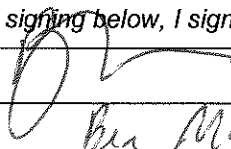

4. Describe the plan for future competition for the goods or services.
