PART III: SUPPLEMENTAL INFORMATION	
1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.	
<p>The MaineDOT Central Laboratory's Dynamic Shear Rheometers (DSRs) are critical pieces of laboratory testing equipment used to verify PG Asphalt Binder (PGAB) materials used in highway construction. PGAB is a major component of asphalt pavement in which the MaineDOT invests many millions of dollars each year. To ensure accuracy of results and to maintain required laboratory accreditation, it is necessary for this equipment to be properly maintained and calibrated</p>	
2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the solicitation (RFP/RFA/RFQ) number if applicable.	
<p>Calibration and maintenance of a DSR requires specialized instrumentation and expertise which is not possessed by any agency or personnel in the public sector. The instrument manufacturer is uniquely qualified to perform calibration and maintenance.</p>	
3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.	
<p>The cost of this service agreement is comparable to the cost of agreements we have had with other vendors for similar laboratory testing equipment.</p>	
4. Describe the plan for future competition for the goods or services.	
<p>The MaineDOT laboratory works with a variety of vendors for equipment calibration services and has changed working relationships as required based upon performance, customer service and cost. Because a DSR is such a specialized piece of equipment the vendors available to perform service and calibration of it are extremely limited and not much can be done on our part to foster competition.</p>
