PART III: SUPPLEMENTAL INFORMATION

These specific filters are required to perform the necessary water quality sampling used to determine if closures are needed to ensure the safety of the public.

2. Provide a brief justification for the selected vendor to supplement the response in Part II.

Thomas Scientific has provided these quality filters at a 41.5% discount to us for the last several years. Thanks in large part to Thomas Scientific's willingness, the Bureau of Public Health has been judicious when it comes to finding the best way to provide accurate results. Consequently, enabling the Department to dispense of closures and openings, allocating for the shellfish industry while safeguarding the public from disease.

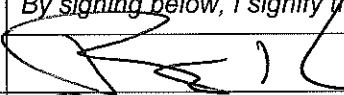

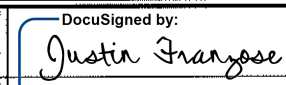

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

Thomas Scientific has been a trusted vendor for many years, the resulting relationship with said vendor has insured great customer service, high quality product with a low cost. In a previous year a different vendor was used, resulting in more money spent. The vendor could not get the product to us in the required time frame and more than one lot number was sent which caused more testing to be required to verify samples. This vendor also attempted to increase the price after they signed the contract.

4. Describe the plan for future competition for the goods or services.

In the future DMR plans to continue to pursue the highest quality products, while incurring the least economic impact.
