Please respond to ALL of the questions in the following sections.

PART III: SUPPLEMENTAL INFORMATION

1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.

The Department of Marine Resources (DMR), Bureau of Public Health is tasked with monitoring the bivalve shellfish resources of the State of Maine for biotoxin threats. This monitoring program is mandated by the National Shellfish Sanitation Program Model Ordinance, compliance with which allows Maine shellfish to be exported out of state. Testing must be done on all species commercially harvested. Maine allows an offshore mahogany quahog fishery provided biotoxin testing toxin levels are below quarantine limits and thus safe for human consumption. DMR requires access to a commercial fishing vessel to harvest mahogany quahog samples at specified locations and times for biotoxin testing.

2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the RFP number, if applicable.

The harvest of mahogany quahogs occurs offshore at water depths of 200-300 feet utilizing specialized fishing equipment. The Department does not have a boat, fishing gear or personnel to collect mahogany quahog samples independently. The vessel owned by Atlantic Shellfish SPV, Inc is equipped to harvest mahogany quahogs. They have the experienced captains and crews to run the vessel and harvest gear as well as knowledge of the fishing grounds. There are only two companies who participate in this fishery and the other company is not willing to contract for the biotoxin testing service.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

Atlantic Shellfish SPV, Inc using the fishing vessel Angela Leigh has been the only vendor willing to provide the boat sampling services to DMR. Their per trip price of \$2,000 which accounts for a 12 -14 hour sampling day covering a large area off Jonesport Maine, conducting 12 -14 tows to collect the samples and transport to and from their home port.

4. Describe the plan for future competition for the goods or services.

Despite several RFPs in the past this is the only vendor willing to provide sampling services to DMR. DMR continues to evaluate and pursue new testing protocols that incorporate more shoreside lot testing thereby reducing the cost and reliance on boat sampling.
