Please respond to ALL of the questions in the following sections.

PART III: SUPPLEMENTAL INFORMATION

1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.

The State of Maine DEP Bureau of Air Quality operates a statewide network of ozone analyzers and calibrators, which allows for the monitoring of air quality necessary to document compliance with the federal health-based National Ambient Air Quality Standard for ozone. Such monitoring is required per the Clean Air Act (CAA) section 105 grant the department receives.

As these instruments age, it becomes more difficult to keep them operating per federal regulatory requirements. Five of our existing ozone calibrators in our inventory are approximately 1.5 times their expected lifespan, and obtaining new replacements is critical to maintaining the ozone monitoring network. Additionally, the ozone calibrators must meet the minimum specifications to be certified as a 'level 3 ozone transfer standard' and must be able to reliably produce ozone down to 15 ppb to meet the needs of the State ozone monitoring program. We presently operate Teledyne API instruments in our network. Staying with this manufacturer will eliminate the costs of having to reconfigure the site's entire ozone monitoring system in order to incorporate a different make and model of unfamiliar ozone calibrators.

2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the solicitation (RFP/RFA/RFP) number if applicable.

Wilbur Technical Services is the only authorized vendor for our region that are allowed to sell just the Teledyne API instruments. The other vendor for our area (Ambilabs) is only authorized to sell these as part of a full system integration, which would include a lot of equipment we can't use or already have at a high additional cost.

See the supplemental Teledyne API Sole Source Letter.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

The department applied for and was granted funding via a CAA section 103 Inflation Reduction Grant. A recent amendment to this grant allows for the remaining funds to be used to fully fund the purchase of one Teledyne API T703u ozone calibrator.

This grant may be used for any activity authorized under CAA Section 103. CAA Section 103 authorizes "the coordination and acceleration of, research, investigations, experiments,

demonstrations, surveys, and studies relating to the causes, effects (including health and welfare effects), extent, prevention, and control of air pollution.”

The remaining funds are via state supplemental funding obtained specifically for replacing ambient air monitoring equipment.

Additionally, Wilbur Technical Services provided a 5% discount for this purchase.

4. Describe the plan for future competition for the goods or services.

Every purchase has the potential to foster competition, and when equipment is no longer serviceable and requires replacement, RPQ will be issued to competitively procure its replacement.

PART IV: AMERICAN RESCUE PLAN ACT (ARPA) / MAINE JOBS & RECOVERY PLAN (MJRP)

Does this request utilize ARPA/MJRP funds?

☐ Yes, MJRP funds (023) – If Yes, please attach the approved Business Case(s).

☐ Yes, ARPA funds (025) or (026) – If Yes, please be aware of the requirements from awarding federal agencies.

☒ No – If No, proceed to Part V.

PART V: CONFLICTS OF INTEREST (COI); CONTRACT WITH THE STATE

Maine law contains Conflict of Interest statutes directed to State Departments, State Officers, and Employees Generally under MRS [Title 5, §18](#) and [§18-A](#), in harmony with MRS [Title 17, §3104](#).

☒ The requesting department's signatory affirms, understands, and acknowledges Maine's Conflict of Interest statutes and, in accordance with those statutes and to the best of their knowledge, has determined that no conflict of interest exists at the time of this contract, renewal, or amendment.
