PART III: SUPPLEMENTAL INFORMATION

2.

Stratosphere is currently in year two of a four in a contract with The State of Maine to support all State of Maine Pega applications. As such, they are constantly updating the applications source codes and deploying new bug fixes to production. Consequently, they are the most familiar with the programming architecture, testing, and deployment standards. Adding an additional vendor would not only cause slower development and less effective testing, but would also introduce the additional risk of having multiple vendors colliding with source code changes and production deployment scheduling.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

The rates are consistent with the current support contract in place with the same vendor.

4. Describe the plan for future competition for the goods or services.

The current contract with Stratosphere runs through September 30, 2022. Agencies and Maine IT will determine best path forward when the current contract nears expiration.
