Please respond to ALL of the questions in the following sections.

<b>PART III: SUPPLEMENTAL INFORMATION</b>	
1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.	<p>The percentage of students with disabilities who achieve proficiency on statewide examinations indicates an area of considerable concern especially in math. Between 2007-08 and 2013-14, proficiency rates for students with disabilities in grades 3-8 fluctuated between 26% and 31%. Additionally, unlike English/language arts scores, the average math scores of students with disabilities consistently decline from grade 3 to grade 8. Qualitative data suggests that a root cause of low math proficiency rates for students with disabilities is the lack of teacher training in math content knowledge and pedagogy. For these reasons, math proficiency for elementary school students has been selected as the focus of Maine's State Systemic Improvement Plan (SSIP) for the State Performance Plan (SPP) (Indicator 17). The Math4ME training focuses on developing teacher understanding of the fundamentals of mathematics and improving instructional practices by developing an emphasis on number sense for a coherent presentation of mathematics for children with disabilities.</p> <p>The Department's Office of Special Services received technical assistance through the national-level IDEA Data Center, which identified an evidence-based professional development approach that could help meet the needs of Maine's children with disabilities in the area of math. With guidance from the state-level SSIP Stakeholder group, the DOE's SSIP core group has worked earnestly over the past three years to improve and implement this approach while gearing it specifically to Maine students (grades 3-8) with disabilities.</p>
2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the RFP number, if applicable.	<p>Local school districts employ teachers and Ed Techs who provide educational services to children with disabilities. The AOS 90 School Department is one of many School Administrative Units (SAUs) that agreed to participate in the DOE's Math4ME project to improve students' proficiencies in math.</p>
3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.	<p>\$1,000.00 per teachers and Ed Techs end of year stipend. AOS 90 has 3 Teachers and 4 Ed Techs participating for a total of \$7,000.00.</p>
4. Describe the plan for future competition for the goods or services.	<p>In accordance with Maine's SSIP, the DOE's work to improve math proficiency of students with disabilities will continue. The Maine DOE will recruit teachers from additional SAUs in order to scale up this work and to increase the number of schools using evidence-based instructional practices in math.</p>
