Please respond to ALL of the questions in the following sections.

PART III: SUPPLEMENTAL INFORMATION

1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.

The goods and services being sought from the vendor are to carry out a funded federal grant activity of the Maine Centers for Disease Control (CDC), to which Maine DEP is a partner. Maine CDC was awarded specific funding in their Building Resilience Against Climate Effects (BRACE) grant to implement a statewide network of aeroallergen monitoring sites in order to make daily measurements (e.g. pollen and mold spore counts) to share with the public and to track long-term trends related to climate change. DEP's Ambient Air Monitoring Program has been tasked with obtaining, siting, operating and maintaining the specific aeroallergen monitoring equipment to be provided by the vendor, as well as managing the resulting data from the vendor's analyses of the collected samples. This work is also in support of a recommendation from the Governor's Maine Climate Council as described in their report [Scientific Assessment of Climate Change and Its Effects in Maine \(September 2020\)](#). ([link to report](#))

2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the RFP number, if applicable.

Aerobiology Research Laboratories (ARL) is the only entity I am aware that provides the needed rotation impaction samplers and the analyses of collected aeroallergens from the samples. They are the only licensed distributor in North America for this type of sampler, and they have been the principle operator of Canada's aeroallergen national monitoring network for almost 30 years.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

ARL's quoted costs are their standard prices charged to their other customers. However, they are providing us with a 20% discount off their standard rates for their sample analyses services.

4. Describe the plan for future competition for the goods or services.

Maine DEP will continue to stay abreast of any other emerging vendors that offer the needed equipment and services that ARL currently does. If ARL should happen to get enough business from US-based customers, they have stated to me they would consider opening an office/laboratory in the US, which would potentially reduce the costs of shipping samples from their laboratory to Maine DEP, and vice versa.

PART IV: AMERICAN RESCUE PLAN ACT (ARPA) / MAINE JOBS & RECOVERY PLAN (MJRP)

Does this request utilize ARPA/MJRP funds?

Yes – If Yes, please attach the approved Business Case(s).
