Please respond to ALL of the questions in the following sections.

PART III: SUPPLEMENTAL INFORMATION	
1.	Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.
	In order to maintain Public Health Accreditation and provide evidence-based public health services, Maine CDC employees need access to scientific journals, electronic reference books and databases of the public health evidence-base. A recent survey of Department staff, less than 40% of respondents reported having access to journals and other professional literature through their Office, and 47% reported having no access, whereas 90% reported have a need for such resources. The University of Massachusetts Medical School has been able to negotiate cost-effective access to a wide variety of journals and e-books. This subscription will enable Maine to access this vast digital library. Maine CDC has extended this resource to all of DHHS and is providing the funding for this digital library.
2.	Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the RFP number, if applicable.
	While the Maine State Library may have subscriptions to some of the resources in the digital library, they would not have the resources to subscribe to the extensive collection in the Digital Public Health Library. The University of Massachusetts Medical School has previously been awarded national funding to develop the only known digital public health library accessible to professionals outside of their institution as part of the National Public Health Coordination Office, National Network of Libraries of Medicine. They are the only entity to provide electronic access to a digital library with this breadth of resources.
3.	Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.
	The National Public Health Coordination Office, National Network of Libraries of Medicine has set this subscription price, based on the negotiated subscription rates and infrastructure costs they incurred as well as the number of subscribers to this service. Negotiation was not possible. Via the national grant funding, the Digital Library was made available to Maine and a limited number of other states for several years without cost as a pilot. The infrastructure for the Public Health Digital Library was paid for via federal funding and, therefore, this service is now available to us at a lower cost than a competitor is likely to be able to set up a similar service. UMass is able to negotiate a lower subscription rate with publishers because of the number of states participating.
4.	Describe the plan for future competition for the goods or services.
	The Department does not intend to competitively bid this service.
