Please note that the following four points below (#2 through 5) all require a response.

2. Description of Specific Need
Please identify, and fully describe, the specific problem, requirement, or need the resulting non-competitive contract would address and which makes the goods or services necessary. Explain how the requesting Department determined that the goods or services are critical and/or essential to agency responsibilities or operations.

The Maine State Police requires a sophisticated tracking product to track evidence to sub-unit levels. This product has been working for several years and is an OIT approved barcode orientated product. This required renewal fee covers the software use, system upgrades, hosting and the maintenance and support for this software.

3. Availability of other Public Resources

Please explain how the requesting Department concluded that sufficient staffing, resources, or expertise is not available within the State of Maine's government, or other governmental entities (local, other state, or federal agencies) external to the requesting Department, which would be able to address the identified need more efficiently and effectively than the identified vendor.

N/A Data is stored on their server.

4. Cost

Since a waiver of competitive bidding is being requested for this procurement, please explain how the requesting Department concluded the negotiated costs, fees, or rates are **fair and reasonable**.

No change from previous year.

5. Future Competition

Please describe potential opportunities which may be available to foster competition for these goods or services in the future.

The Maine State Police has been looking for other barcode systems that could handle all the inventory needs of its units (ie garage, weapons, gear, etc.). This product is the only one that we have found that can inventory down to a sub-unit level. This means that a bottle found at a crime scene would be entered as item but then would need to be tracked for DNA evidence, latents (fingerprints), blood typing, and possibly other sub categories. We had hoped that the new RMS system that has a tracking module would cover this or we could find a work around but that was not the case. We intend to request upgrades to the tracking module in the new system but do not expect this upgrade for some time.

A new software system would require the migration of existing five years worth of evidence data, re-training and would increase the state's overall costs significantly.

State of Maine Waiver of Competitive Bidding Request Form

Please note that only one of the two points below ("Uniqueness" or "Timeframe") requires a response. Requesting Departments are not required to respond to both points.

6. Uniqueness

Please explain if the goods or services required are unique to a specific vendor. Describe the unique qualifications, abilities, and/or expertise of the vendor and how those particular unique factors address the specific need identified above. If the vendor has unique equipment, facilities, or proprietary data, also explain the necessity of these particular unique assets.

The product needed must be able to inventory down to a sub-unit level. This means that a bottle found at a crime scene would be entered as item but then would need to be tracked for DNA evidence, latents (fingerprints), blood typing, and possibly other sub categories.

This renewal is required for continued used of this software.

7. Timeframe (Complete only if B. is the Statutory Justification marked on Page 1)

Please explain if time is of the essence and an emergency exists which requires the immediate procurement of goods or services. Describe the nature of this emergency, provide the date by which the goods or services must be delivered, and explain how that date was determined and its significance (i.e. impact if delayed beyond this date). Also, provide information as to how it was determined this vendor is the best option to address this time-sensitive procurement.
