Please respond to ALL of the questions in the following sections.

PART III: SUPPLEMENTAL INFORMATION

1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.

Four precast columbarium caps at the Maine Veterans’ Memorial Cemetery on Civic Center Drive, each measuring 24’ long x 5’ wide x 16” thick and weighing approximately 22,000 pounds, must be safely removed and reset as part of ongoing preventative maintenance and restoration efforts. The weight and size of the caps require specialized crane equipment and experienced operators to ensure precise handling and placement, minimizing the risk of damage to the caps, surrounding structures, and the remains of veterans interred within the columbaria.

Immediate intervention is necessary to stabilize the affected columbaria, prevent further degradation, and protect the remains of veterans from potential disturbance or damage. The structural movement is active and progressive, and any delay in remediation will result in higher restoration costs and an increased risk of catastrophic failure. Additionally, the sealant and grout materials required for the repairs are temperature-sensitive (requiring a minimum ambient temperature of 40°F for proper application and curing). Seasonal temperature declines will soon render these materials ineffective, eliminating the ability to perform repairs until spring.

2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the solicitation (RFP/RFA/RFQ) number if applicable.

The selected provider is uniquely qualified to perform the required crane lifts due to their specialized expertise in operating 90-ton and 115-ton cranes for heavy precast stone placement, and their proven ability to coordinate effectively with Knowles Industrial, who is directing the overall work. Their direct familiarity with handling large, heavy columbarium caps and adherence to safety protocols ensures precise and safe placement, a factor critical to protecting the structural integrity of the units and the remains of veterans interred within.

Engaging a different contractor at this stage would introduce unnecessary delays, inefficiencies, and potential safety risks, increasing both project risk and cost. Given the provider’s specialized equipment, experienced operators, immediate availability, and ability to integrate seamlessly with riggers provided by others, they represent the only technically responsible and practical source capable of executing this time-sensitive work in accordance with state and federal standards.

Proceeding under an emergency, sole-source procurement ensures timely mobilization of the specialized crane services, prevents further damage, safeguards public safety, and preserves the dignity and integrity of the veterans’ final resting place. All work will be performed in coordination with Knowles Industrial and with riggers provided by others.

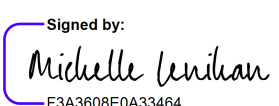

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

The negotiated costs are fair and reasonable based on prior work of similar scope and industry-standard rates for labor, materials, and equipment. The allocation ensures timely completion of the emergency contract while maintaining the integrity of the project.

PART III: SUPPLEMENTAL INFORMATION	
4. Describe the plan for future competition for the goods or services.	
Future work of non-emergency nature of this type will be competitively procured through standard bidding procedures in accordance with State procurement rules, ensuring fair and open competition for all qualified vendors.
