PART III: SUPPLEMENTAL INFORMATION
Please respond to ALL of the following:
<b>1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.</b>
The Wildlife Research and Assessment Section (WRAS) in MDIFW has undertaken several new studies and monitoring efforts over the past few years (e.g., moose survival study, Breeding Bird Atlas, deer winter survival, snowshoe hare study, marten occupancy study, and Canada lynx monitoring). These projects are in addition to ongoing wildlife monitoring efforts conducted in WRAS; hence, there is a need for additional technical staff to assist the wildlife biologists overseeing these projects. These technical positions require unique experience in chemically immobilizing bears in their winter dens, keeping track of chemical immobilization records, trapping bears, taking biological measurements on bears, collecting tissue

### PART III: SUPPLEMENTAL INFORMATION

samples for chronic wasting disease, chemically immobilizing lynx and releasing them from traps, sectioning moose and deer teeth, conducting a variety of bird surveys, operating snowmobiles, ATVs, and boats; and experience in using GIS and Microsoft Access for data entry.

**2. Provide a brief justification for the selected vendor to supplement the response in Part II.**

The Department is a member of the Northeast Association of Fish & Wildlife Agencies (Association), which is a nonprofit organization made up of the state and provincial wildlife agencies in the Northeastern North America. The Association has a cooperative agreement with the Provider (WMI) and through this agreement allows WMI to administer contracts for regional projects. WMI is uniquely qualified to administer this contract because 1) it has considerable experience in administering similar contracts for state wildlife agencies; 2) the administrators at WMI are familiar with federal grant match and reporting requirements, such as the federal grant that will be used to fund the proposed position; 3) the fee that WMI charges has been negotiated with the Association (i.e., 44%); 4) WMI is willing to waive a portion of its negotiated fee, which in turn will be used by the Department to meet federal match requirements; and 5) the US Fish and Wildlife Service, which provides the Department with federal funding for wildlife research and management, has agreed that if WMI waves a portion of their administrative fee, it would meet the Department's match requirements for the federal grant. This is the only contractor that the USFWS has authorized to do this.

**3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.**

The salary is based on equivalent positions in MDIFW. The contractor will be paid at the equivalent premium rate to provide adequate compensation for acquiring health insurance and making contributions towards a federally mandated 401K plan, for contractors working over 1000 hours/year. The total salary is considerably lower than an equivalent position in the federal government or in the private sector (e.g., Wildlife Management Institute [WMI]).

The fee that the Provider charges was negotiated with the Northeast Association of Fish & Wildlife Agencies, of which the Department is a member. The Provider is willing to waive a portion of its negotiated fee, which in turn is used by MDIFW to meet federal match requirements. This allows the Department to cover the costs for the technicians and administration of the positions entirely with federal funds. No state funds are needed for this position.

**4. Describe the plan for future competition for the goods or services.**

If the US Fish and Wildlife Service authorizes other vendors to provide the requested service in the future, the Department will use a competitive process to identify an appropriate vendor.
