Please respond to ALL of the questions in the following sections.

<b>PART III: SUPPLEMENTAL INFORMATION</b>	
1. Provide a more detailed description and explain the need for the goods, services or grant to supplement the response in Part I.	<p>The New England cottontail (<i>Sylvilagus transitionalis</i>; referred to as NEC) is a State Endangered species occurring in only 7 towns in southern Maine. MDIFW has an extensive recovery effort including habitat management, land acquisition, a captive breeding and translocation program, and monitoring. Monitoring is an important component of the effort so that we can evaluate the success of our conservation actions and make informed management decisions. We conduct monitoring of our New England cottontail population each winter by searching transects in suitable habitat (i.e., thickets) to collect rabbit fecal pellets. By their appearance alone, pellets from NEC, eastern cottontail, and snowshoe hare can't be differentiated. Therefore, pellets need to be genetically analyzed to determine their species of origin.</p>
2. Provide a brief justification for the selected vendor to supplement the response in Part II. Reference the RFP number, if applicable.	<p>The University of New Hampshire (UNH) has been conducting research on New England cottontails in Maine for decades, was very influential in developing our survey methodology, and pioneered the genetic techniques used to identify individual rabbits. They have a catalogue of previously identified rabbits that is critical for analyzing genetic pedigrees and monitoring genetic health of our populations. For all of these reasons, it is critical to continue to work with Adrienne Kovach at the University of New Hampshire.</p>
3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.	<p>We've compared the rate to another genetics laboratory (at the University of Rhode Island) that does similar work and the cost of the genetic analysis is similar. The cost of the proposed contract includes supplies, staff time to conduct and interpret the genetic analysis and report writing. UNH has an extensive catalogue of previous genetic work which allows for more detailed and informed genetic information and reports than what other vendors could provide.</p>
4. Describe the plan for future competition for the goods or services.	<p>MDIFW will consider other alternatives taking into account the qualifications and costs of other vendors.</p>
