Weird formatting, a little hard to read

Expansion, 50 more per semester but only 10 more partners

Existing program is credit bearing for core credits (half credit), variety of activities. Are all ELO activities?

Mention programs that have expressed interest in working with ELO but which ones are already working with versus interested?

Provides examples of how employers can provide ELO. are these existing examples or expected opportunities?

Strong partnerships, school board and school leadership are supportive, Is current program supported in local budget?

- *Equitable Access and Support*

Students will design curriculum

Does not say how they will ensure program reaches students who may not have equitable access to ELO experience

- *Regional Approach*

- *Budget and Budget Narrative*

Small amounts to stipend others to be involved in the ELO expansion. Stipend the JMG specialist? 2 hours per week. Is this on top of other work? Same question for other staff. No explanation for difference in stipends

Lack of detail for training costs.

Supportive services only for 2nd year and seems high without justification

Transportation costs need more details about how they will be broken out between reimbursement and field trips.

Is this a new program for the high school?*

- *Program Design*

Currently there is a middle school program.

New ELO class for elective credit and teachers would learn how to integrate online ELO courses in their classes

Currently ELO coordinator is part-time and half of that time is in middle school

With funding, coordinator can meet one on one with students and manage partnerships

The middle school program would take 25% of Coordinators time (paid by the school)

Should the grant be picking up 50% because 25% of time is already dedicated to HS

All high school teachers trained? What is online ELO course?
