

BGS #3370

Popham Beach State Park Manager's Headquarters

10.23.2024

Addendum #2

Summary :

PaulDesignsProject and consultants are responding to onsite and emailed questions regarding the Popham Beach State Park Manager's Headquarters. If any questions are not answered, or additional details, drawings and information is required, please contact andrew@pauldesignsproject.

Bid Opening Date : Tuesday 10/29/ 2024 at 2:00pm

Contents:

- Questions and Answers Bulleted List
- Revised Drawings

There seems to be some missing plumbing information. Is there a drainage plan for plumbing ?

Sanitary sheet M301 should have been included in drawing set. See attached

Also plumbing schedule is misleading showing $\frac{3}{4}$ " supply line to kitchen sink with another note showing 1-1/4" supply assuming that is the main supply however not clear.

1-1/4" main supply from basement to the kitchen – $\frac{3}{4}$ " branch off main for sink/dishwasher

Will there be an extension on the bid date ?

BPL and BGS have agreed to a Bid Opening extension date of 10/29/2024 2:00pm

Electrical:

The NEC allows the interior of this building to be wired in NM cable. Can we wire this building in NM cable?

Yes

The electrical one-line diagram says "new meter others". Does that mean that all the work from the utility pole to the electric meter is by others and outside of this contract?

EC responsible for meter enclosure, underground conduit and wire from pole to meter. CMP responsible for new pole, transformer and meter.

Sheet ES.0 gives conflicting conduit sizes for the telephone entrance. For clarity, please specify all the conduit sizes and quantities from the existing utility pole to the new building.

From pole:

(2) 4" Conduit – Power

(2) 2" Conduit- Telephone and Spare

The scale on sheet ES.0 appears to be off. Please state the proper scale or give the distance from the existing utility pole to the new building.

Correct Scale: 1"=20' Approximately 220' from new utility pole to building

The Specs allow aluminum conductors for the service entrance. Please confirm that the specs are correct.

Yes, upsized as need per NEC

Note 11 on sheet ES.0 calls for a generator slab. Is there a generator slab and generator as part of this contract?

Disregard note – no generator

Note 9 on sheet ES.0 calls for RGS conduit above grade. Can we use PVC instead, as is typical for this type of construction?

Yes
