RE: Next Year's LD 1 Average Personal Income Growth is 1.43%

With the passage of "LD 1" in 2005, towns and counties are required to calculate a property tax levy limit each year based on <u>local</u> property growth and <u>statewide</u> average personal income growth. Each town and county is responsible for calculating its property growth using the most recent valuation data available. The State Planning Office (SPO) is responsible for calculating income growth. For the purpose of calculating municipal property tax levy limits for next year's municipal budgets (the 1/1/2012 - 12/31/2012 budget year for municipalities on a calendar-year budget or the 7/1/2012 - 6/30/2013 budget year for municipalities on a fiscal-year budget), SPO has determined average personal income growth to be 1.43%. The table below shows how this figure was calculated.

Calculation of Maine's "Average Personal Income Growth"

	Nominal Personal				
Calendar	Income				Real Personal
Year	(thousands)	% Change	CPI-U	% Change	Income
2000	\$34,096,690		172.2		
2001	\$36,232,131	6.26%	177.1	2.85%	3.42%
2002	\$37,383,244	3.18%	179.9	1.58%	1.60%
2003	\$39,000,530	4.33%	184.0	2.28%	2.05%
2004	\$41,164,305	5.55%	188.9	2.66%	2.89%
2005	\$41,981,794	1.99%	195.3	3.39%	-1.40%
2006	\$44,307,181	5.54%	201.6	3.23%	2.31%
2007	\$46,353,508	4.62%	207.3	2.85%	1.77%
2008	\$48,296,992	4.19%	215.3	3.84%	0.35%
2009	\$48,180,000	-0.24%	214.5	-0.36%	0.11%
2010	\$49,547,546	2.84%	218.1	1.64%	1.20%
AVERAGE					1.43%

This calculation reflects the methodology described in LD 1, which is now Public Law 2005, Chapter 2: "Average real personal income growth' means the average for the prior 10 calendar years, ending with the most recent calendar year for which data is available, of the percent change in personal income in this State, as estimated by the United States Department of Commerce, Bureau of Economic Analysis, less the percent change in the Consumer Price Index for the calendar year." 2010 is currently the most recent year for which data is available.
