Inflation measurements are complex, don't tell the whole story

August 2020:

• All items: 1.3%

• Energy: -9.1%

Food at home: 4.6%

Workplace mobility remains well below January levels, but other categories have recovered

Percent Change in Time Spent Outside Home*

In **Maine**, as of September 26 2020, total time spent away from home decreased by **3.3%** compared to January 2020.

*Change in the average time spent outside of residential locations indexed to the period between Jan 3-Feb 6 2020. This series uses data from Google's COVID-19 Community Mobility reports.

last updated: October 01, 2020 next update expected: October 09, 2020

Vehicle Miles Traveled, weekly year-over-year change

- VMT reached a trough of -42.2% during the first week of the Stay Healthy at Home order
- Statewide highway VMT has been 5-10% below last year for the past month
- The lack of seasonal traffic for the Fryeburg Fair and other events may be contributing to the gap
- Inbound air travel is down 65% from 2019 levels

The Back-to-Normal Index

The pandemic economy is far from normal. So Moody's Analytics and CNN Business have partnered to create a proprietary Back-to-Normal Index, comprised of 37 national and seven state-level indicators. The index ranges from zero, representing no economic activity, to 100%, representing the economy returning to its pre-pandemic level in March.

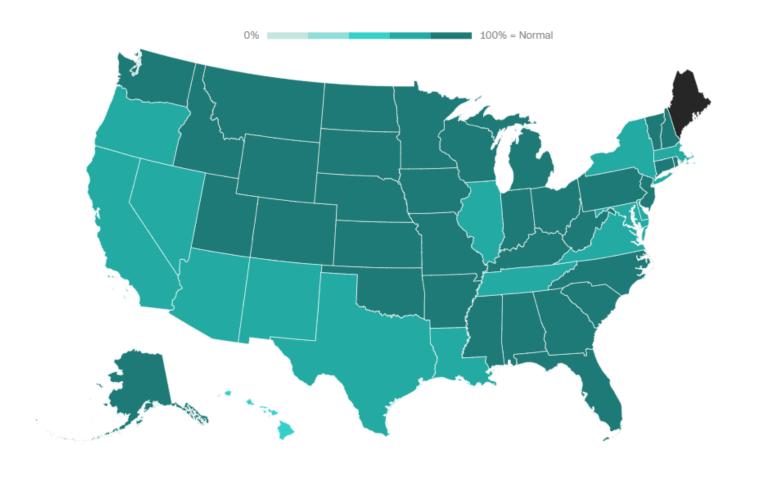

93%

The economy in Maine is operating at 93% of where it was in early March.
