KIRSTEN LC FIGUEROA
COMMISSIONER

TO: Municipal and County Officials
 DATE: September 27, 2024
 RE: **Next Year's LD 1 Average Personal Income Growth is 5.51%**

With the passage of "LD 1" in 2005, towns and counties were required to calculate a property tax levy limit each year based on local property growth and statewide average personal income growth. P.L. 2023, ch. 603 repeals the municipal tax levy limit requirement; however, the county requirement remains in statute. Each county is responsible for calculating its property growth using the most recent valuation data available while the State Economist is responsible for calculating income growth. For the purpose of calculating property tax levy limits for next year's budgets (the 1/1/2025 - 12/31/2025 budget year for calendar-year budgets or the 7/1/2025 - 6/30/2026 budget year for fiscal-year budgets), the State Economist has determined average personal income growth to be 5.51%. The table below shows how this figure was calculated.

Calculation of Maine's "Average Personal Income Growth"

Calendar Year	Nominal Personal Income (thousands)	% Change
2013	\$53,240,177	
2014	\$54,984,552	3.28%
2015	\$57,356,461	4.31%
2016	\$59,286,784	3.37%
2017	\$61,740,123	4.14%
2018	\$64,463,181	4.41%
2019	\$67,852,844	5.26%
2020	\$74,089,112	9.19%
2021	\$81,589,112	10.12%
2022	\$85,707,994	5.05%
2023	\$90,868,170	6.02%
AVERAGE		5.51%

This calculation reflects the revised methodology described in 5 MRSA §1531 as amended by P.L. 2015 Chapter 267, Part L: ""Average personal income growth" means the average for the prior 10 calendar years, ending with the most recent calendar year for which data is available, of the percent change in personal income in this State, as estimated by the United States Department of Commerce, Bureau of Economic Analysis." 2023 is currently the most recent year for which data is available.
