

# Signs of Cannabis Toxicity in Children

According to the American Academy of Pediatrics, the following symptoms may be signs of cannabis toxicity or overdose in children:

- Vomiting
- Confusion
- Rapid heart rate
- Anxiety, panic, and/or paranoia
- Poor coordination
- Dizziness
- Dilated pupils
- Slurred speech
- Trouble breathing
- Drowsiness/lethargy

*If a child eats or drinks a cannabis product, they may need immediate medical help. Call the Poison Center hotline at 800-222-1222, or 911 if it is an emergency.*
