Tuesday, November 18

TBD

Review Draft Report, take final input from Task Force

Definition of Maine's Blue Economy:

As used in Maine's statute, the "blue economy" means business sectors that rely on the sustainable use of ocean resources for economic health, improved livelihoods, jobs or ecosystem health, and "sustainable" means practices that support the economic growth of a community while maintaining or improving the health of marine ecosystems and without negatively impacting social, environmental and cultural aspects of the community.

The [Blue Economy Task Force 1.0](#) further defined Maine's blue economy as "optimizes innovation to expand economic opportunities in our coastal communities and solve pressing societal needs. It is grounded in Maine's unique marine heritage, research expertise, and location."
