RE: Renewal of Air Emission License A-000724-70-I-R for RUMFORD POWER LLC

Dear Justin Castagna:

This is a reminder to renew the above referenced Chapter 140 (Title V) Air Emission License, which expires on November 28, 2027. No fees are required with this submittal.

Forms and instructions can be found at: <https://www.maine.gov/dep/air/permits/major.html>

A Title V renewal application must be submitted at least six months, but no more than 18 months, prior to the license expiration date. Both State and Federal regulations state that if a complete renewal application (as determined by the Department) is submitted at least six months prior to the license expiration date (November 28, 2027), all terms and conditions of the Title V license shall remain in effect until the Department takes final action on the renewal application. However, if a complete renewal application is not submitted at least six months prior to the license expiration date, the Title V license will expire on its expiration date if the renewal license is not yet issued. In such a case, as of that date, continued operation of the facility without a license would be in violation of state and federal law. We strongly suggest submitting renewal application materials 9-12 months prior to the license expiration date to allow time to address any missing information.

To be considered complete, the application package must include the following:

- Completed Application Form;
- Completed Signatory Requirement (original, wet-ink signature, digital/electronic signatures cannot be accepted); and
- Proof of publication of the Notice of Intent to File in the newspaper (clipping, photocopy).
