

October 21, 2024

Debbie-Anne A. Reese, Acting Secretary
Federal Energy Regulatory Commission
888 First Street, N.E.
Washington, D.C. 20426

Subject: *Shawmut Hydroelectric Project (FERC No. P-2322)*
Application for Water Quality Certification

Dear Secretary Reese:

On July 26, 2024, the Federal Energy Regulatory Commission (FERC or Commission) issued a letter to Brookfield White Pine Hydro LLC (BWPH), Licensee of the Shawmut Hydroelectric Project FERC P-2322 (Shawmut Project). The letter required BWPH to notify the Commission within 90 days (by October 24, 2024) whether BWPH has refiled a request for Water Quality Certification (WQC) with Maine Department of Environmental Protection (Maine DEP). On October 21, 2024, BWPH submitted an application for Water Quality Certification (WQC) for the Shawmut Project to the Maine DEP. A copy of the application sent to Maine DEP is enclosed.

The Application for Water Quality Certification for the Shawmut Project includes the following:

- WQC Application Form
- WQC Application Attachments
 - Attachment 1: Additional Details Document
 - Attachment 2: Distribution List
 - Attachment 3: Notice to Abutters, Abutters List, and Proof of Mailing
 - Attachment 4: Notice to Municipalities, Proof of Mailing, Newspaper Notice
 - Attachment 5: Pre-Filing Meeting Request
 - Attachment 6: Certificate of Good Standing
 - Attachment 7: Fee Payment
- WQC Application Appendices
 - Appendix 1: July 26, 2024, Letter from FERC
 - Appendix 2: Shawmut Hydroelectric Project FERC No. 2322 Final License Application and FERC AIR Responses
 - Appendix 3: 2024 Shawmut Fish Passage Measures
 - Appendix 4: Kennebec River Management Plans
 - Appendix 5: Kennebec Hydro Developers Group (KHDG) Agreement 1998
 - Appendix 6: Kennebec Hydro Developers Group (KHDG) Status Summary / Chronology
 - Appendix 7: 2013 Interim Species Protection Plan and Biological Opinion
 - Appendix 8: 2021 Joint Permit Application for Fish Lift Construction

- Appendix 9: 2020 Preliminary Section 18 Prescriptions (National Marine Fisheries Service, United States Fish and Wildlife Service)
- Appendix 10: Updated Fish Passage Effectiveness Memo 9/24/2021 (Normandeau)
- Appendix 11: 2023 Biological Opinion (National Marine Fisheries Service)
- Appendix 12: 2024 Draft Environmental Impact Statement
- Appendix 13: 2024 Brookfield comments on DEIS

Should you have any questions regarding this submittal, please contact me at (207) 755-5605 or by email at randy.dorman@brookfieldrenewable.com.

Sincerely,

Randall Dorman
Compliance Manager – Northeast

Enclosure: Shawmut Hydroelectric Project (FERC No. P-2322) Application for Water Quality Certification

October 21, 2024

Laura Paye
Hydropower Coordinator
Maine Department of Environmental Protection
17 State House Station
Augusta, Maine 04333-0017

Subject: *Shawmut Hydroelectric Project (FERC No. P-2322)*
Section 401 Water Quality Certification – Certification Request

Dear Ms. Paye:

Brookfield White Pine Hydro LLC (BWPH or Applicant) is submitting to the Maine Department of Environmental Protection (Department) an Application for Water Quality Certification (WQC) for the Shawmut Hydroelectric Project (2024 WQC Application), which is undergoing relicensing by the Federal Energy Regulatory Commission (Commission or FERC) as FERC Project No. 2322. BWPH is the project proponent for certification under Section 401 of the Clean Water Act (CWA), the Commission is the federal agency, and the Department is the certifying agency. The Shawmut Hydroelectric Project (Shawmut Project) is in the state of Maine on the Kennebec River within the towns of Skowhegan, Fairfield, Clinton, and Benton. The Shawmut Project is located in Kennebec and Somerset counties.

On January 31, 2020, BWPH filed its Final License Application (FLA) for the Shawmut Project with the Commission, which issued its Notice of Application Accepted for Filing, Soliciting Motions to Intervene and Protests, Ready for Environmental Analysis, and Soliciting Comments, Recommendations, Preliminary Terms and Conditions, and Preliminary Fishway Prescriptions (REA Notice) on July 1, 2020.

On August 28, 2020, BWPH filed a WQC application under Section 401 of the CWA with the Department (2020 WQC Application). The Department provided BWPH a draft order on the WQC on August 11, 2021, and in light of the issues and concerns raised in the draft order, on August 18, 2021, BWPH withdrew that application in order to prepare a new application with additional information that had not been considered by the Department in its evaluation of the 2020 WQC Application. On August 26, 2021, the Department acknowledged the withdrawal.

On October 18, 2021, BWPH filed a revised WQC application under Section 401 of the CWA with the Department (2021 WQC Application). In July 2022 the Department provided BWPH a draft denial without prejudice, and on October 12, 2022, the Department issued a Denial of Water Quality Certification "without prejudice" (2022 Denial). In the 2022 Denial Order the Department stated that the denial "is not based on any judgment of the technical merits of the Applicant's pending [water quality certification] request."

Since then, the FERC relicensing process has continued, and other agencies have taken important actions directly related to the FERC relicensing of the Shawmut Project. On March 20, 2023, the National Marine Fisheries Service (NMFS) issued a Biological Opinion regarding the effects of the proposed relicensing of the Shawmut Project on federally listed Atlantic salmon. On March 28, 2024, FERC issued a draft Environmental Impact Statement (DEIS). Both of these important documents are appended to the 2024 WQC application and should be fully considered by the Department as part of their review of this application.

On September 24, 2024, FERC notified BWPH that the target date for the Final EIS for the Shawmut Project relicensing would be February 28, 2025. Nonetheless, the DEIS contains critical information and analysis regarding all of the important resource issues related to the Shawmut Project and the effects of its continued operation, as proposed, on water quality and related resource issues including fisheries, fish passage, and recreation. The DEIS also provides an accurate and detailed description of how BWPH's proposals for continued Shawmut Project operation (including proposed fish passage measures) align with NMFS's Biological Opinion, and both NMFS's and USFWS's Section 18 Prescriptions for fish passage at the Shawmut Project.

Under the current rules for CWA Section 401 reviews (2023 Clean Water Act Section 401 Water Quality Certification Improvement Rule), an applicant is required to request a pre-filing meeting with the applicable State agency at least 30 days prior to filing for certification (40 CFR § 121.4). BWPH submitted a request for a pre-filing meeting with the Department on September 9, 2024 regarding its intent to file this 2024 Water Quality Certification Application (2024 WQC Application). The Department met with BWPH on October 16, 2024, for the pre-filing meeting via teleconference to discuss the WQC application process and verify the application content. Separate from this meeting, the Department indicated that BWPH could file its 2024 WQC application electronically, including electronic links (with titles and FERC accession numbers) for the larger attachments filed on the FERC docket.

As required, BWPH is also sending by certified mail a copy (on thumb drive) of the 2024 WQC Application to the town clerks of Skowhegan, Fairfield, Clinton, and Benton. Further, in accordance with the Final Rule, BWPH provides the below information in connection with this Certification request (See Final Rule, at 40 CFR § 121.5):

a) A certification request shall be submitted to the certifying authority and to the Federal agency concurrently.

The application is being filed with the Commission concurrently.

b) A certification request for an individual license or permit shall:

(1) Identify the project proponent(s) and a point of contact;

BWPH is the project proponent, and the point of contact is:

Nathan Stevens
Vice President, Operations
Brookfield White Pine Hydro LLC
150 Main Street
Lewiston, ME 04240

(2) Identify the proposed project;

Shawmut Hydroelectric Project (FERC Project No. P-2322)

(3) Identify the applicable federal license or permit;

Application for New License for a Major Water Power Project – Existing Dam, Shawmut Hydroelectric Project (FERC No. 2322)

(4) Identify the location and nature of any potential discharge that may result from the proposed project and the location of receiving waters;

The discharge would be water associated with the hydroelectric project, which would discharge through hydroelectric turbines, gates, over the dam or through fish passage facilities into the Kennebec River in the Towns of Fairfield or Benton.

(5) Include a description of any methods and means proposed to monitor the discharge and the equipment or measures planned to treat, control, or manage the discharge;

BWPH monitors flows and adjusts hydroelectric units, gates, and other conveyances based on flow.

(6) Include a list of all other federal, interstate, tribal, state, territorial, or local agency authorizations required for the proposed project, including all approvals or denials already received;

The Shawmut Project requires a license from the Commission.

(7) Include documentation that a pre-filing meeting request was submitted to the certifying authority at least 30 days prior to submitting the certification request;

A copy of the pre-filing meeting request is attached to this cover letter.

(8) and (9) Statement

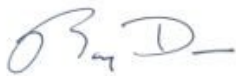

The project proponent hereby certifies that all information contained herein is true, accurate, and complete to the best of my knowledge and belief. The project proponent hereby requests that the certifying authority review and take action on this CWA 401 certification request within the applicable reasonable period of time. BWPH respectfully requests that the Department provide a draft of the WQC for review 30 days before issuing the final WQC.

The 2024 WQC Application for the Shawmut Project includes the following:

- WQC Application Form
- WQC Application Attachments
 - Attachment 1: Additional Details Document
 - Attachment 2: Distribution List
 - Attachment 3: Notice to Abutters, Abutters List, and Proof of Mailing
 - Attachment 4: Notice to Municipalities, Proof of Mailing, Newspaper Notice
 - Attachment 5: Pre-Filing Meeting Request
 - Attachment 6: Certificate of Good Standing
 - Attachment 7: Fee Payment
- WQC Application Appendices
 - Appendix 1: July 26, 2024, Letter from FERC
 - Appendix 2: Shawmut Hydroelectric Project FERC No. 2322 Final License Application and FERC AIR Responses
 - Appendix 3: 2024 Shawmut Fish Passage Measures
 - Appendix 4: Kennebec River Management Plans
 - Appendix 5: Kennebec Hydro Developers Group (KHDG) Agreement 1998
 - Appendix 6: Kennebec Hydro Developers Group (KHDG) Status Summary / Chronology
 - Appendix 7: 2013 Interim Species Protection Plan and Biological Opinion
 - Appendix 8: 2021 Joint Permit Application for Fish Lift Construction
 - Appendix 9: 2020 Preliminary Section 18 Prescriptions (National Marine Fisheries Service, United States Fish and Wildlife Service)
 - Appendix 10: Updated Fish Passage Effectiveness Memo 9/24/2021 (Normandeau)
 - Appendix 11: 2023 Biological Opinion (National Marine Fisheries Service)
 - Appendix 12: 2024 Draft Environmental Impact Statement
 - Appendix 13: 2024 Brookfield comments on DEIS

If there are any questions or comments regarding this filing, please feel free to contact me by phone at (207) 755-5605 or by email at Randy.Dorman@BrookfieldRenewable.com.

Sincerely,

Randall Dorman

**APPLICATION FOR
WATER QUALITY CERTIFICATION
(U.S. P.L. 92-500, SECTION 401)**

HYDROPOWER PROJECT LICENSING/RELICENSING ONLY

This form shall be used to request Water Quality Certification for the proposed FERC licensing or relicensing of an existing hydropower generating or storage project where no construction, reconstruction or structural alteration of project facilities which would affect water levels or flows is proposed.

All required fees must be paid before application processing will begin. Please contact the Department for current fee schedule information. Fees are payable to Treasurer, State of Maine.

APPLICANT INFORMATION

Name of Applicant: Brookfield White Pine Hydro LLC (BWPH)

Mailing Address: 150 Main Street

Lewiston, Maine 04240

Name of Contact or Agent: Randall Dorman

Telephone: 207-755-5605

PROJECT INFORMATION

Name of Project: Shawmut Hydroelectric Project FERC No. P-2322

Address (use "911" address, if available): Kennebec Street, Fairfield, Maine

Name of Waterbody Affected: Kennebec River

Municipality or Township: Skowhegan, Fairfield, Clinton, Benton County: Kennebec, Somerset

GPS Coordinates, if known: 44°37'50.81"N, 69°34'59.11"W

REQUIRED INFORMATION

1. Provide all the information requested by this application form.
2. If applicant is a registered corporation, provide either a *Certificate of Good Standing* (available from the Secretary of State) or a statement signed by a corporate officer affirming that the corporation is in good standing.
3. A signed Certification of Publication and a completed Notice of Intent to File an application for Water Quality Certification.

NOTE: All supporting documents summarized above must be attached to this form and sent to the DEP Office listed below:

Department of Environmental Protection
Bureau of Land Resources
17 State House Station
Augusta, ME 04333
Tel: (207) 287-7688

"I certify under penalty of law that I have personally examined the information submitted in this document and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the information is true, accurate, and complete. I authorize the Department to enter the property that is the subject of this application, at reasonable hours, including buildings, structures or conveyances on the property, to determine the accuracy of any information provided herein. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

PRINTED NAME & TITLE

WATER QUALITY CERTIFICATION APPLICATION

GENERAL INFORMATION

1. By submitting this application, an applicant requests Water Quality Certification pursuant to Section 401 of the Federal Clean Water Act for the continued operation of an existing hydropower generating or storage project under the terms of an initial or a new license from the Federal Energy Regulatory Commission. Certification must be obtained for any activity requiring a federal license or permit which may result in a discharge into the navigable waters of the United States.
2. The purpose of this application form is to obtain from the applicant a thorough description of project facilities and operation and the impacts of the continued operation of the project on water quality.

The Department's Regulations provide that the applicant bears the burden of proof in the application process. This is the burden of presenting sufficient evidence for the Department to make the affirmative findings required by law regarding matters about which no questions are raised and the burden of presenting a preponderance of the evidence regarding matters about which questions are raised.

3. In order to grant certification, the Department must conclude that there is a reasonable assurance that the continued operation of a hydropower generating or storage project will not violate applicable Water Quality Standards. These standards have been established in the State's Water Classification Program (Title 38 MRSA Sections 464-469). These standards designate the uses and related characteristics of those uses for each class of water and establish water quality criteria necessary to protect those uses and related characteristics.
4. Any applicant for a FERC license must complete a three stage consultation process with appropriate state and federal agencies. The purpose of this process is to identify and analyze the potential environmental and socioeconomic impacts of a project.

The consultation process requires an applicant to have either requested or obtained water quality certification at the time of filing with FERC. The process also requires that an applicant serve a copy of its FERC application, including any revisions, supplements or amendments thereto, on each of the agencies consulted.

WATER QUALITY CERTIFICATION APPLICATION

FILING INSTRUCTIONS AND PROCEDURES

- i i When filing, send an original paper copy plus one (1) electronic copy of a completed Application for Water Quality Certification to the Department, along with two (2) copies of the Application for Initial License or New License that has been or will be filed with FERC. The State filing can be made prior to or concurrent with the FERC filing.
- i i The Department is required by law to assess fees for processing applications and for monitoring permit compliance. Application processing will not begin until all required fees have been paid. When filing, submit full fee payment as shown on the [DEP fee schedule](#). Please make checks payable to: Treasurer, State of Maine.
- i i A number of consulting agencies will be involved in the State review process of hydropower projects. Distribution of copies of the FERC application to these agencies may be coordinated by DEP or may be handled directly by the applicant. When filing, please notify the DEP staff to discuss distribution procedures.
- i i Most information requested by this application form can be provided by making reference to the appropriate exhibit of the FERC license application. Space is provided on the form for such references.
- °i Within 15 working days of receiving an application and all required fees, the DEP shall determine whether the application as filed is acceptable for processing.
- OEi Additional information may be required during the review process on any aspect of the project relating to compliance with applicable statutory criteria.

WATER QUALITY CERTIFICATION APPLICATION

1. **NATURE OF ACTIVITY.** Check appropriate item:

_____ Application for Initial License.

X _____ Application for New License (Relicense).

A COPY OF A COMPLETED FERC APPLICATION FOR LICENSE (THIRD STAGE CONSULTATION) MUST ACCOMPANY THIS FORM.

NOTE: A copy of any document revising, supplementing, amending, or correcting deficiencies in the application as originally filed with FERC must also be filed with D.E.P.

2. **EXISTING ENVIRONMENT.** Provide a description of the physical environment of the project site and its immediate vicinity. The project site includes all land and water areas affected by the project.

REFERENCE: FERC EXHIBIT(S) FERC License Application Exhibit E, Section 4.3

3. **PROJECT DESCRIPTION.** Provide a detailed description of the existing project. A hydropower project includes all powerhouses, dams, water conduits, transmission lines, water impoundments, roads, and other appurtenant works and structures that are part of the development. This description must include:

- A. The physical composition, dimensions, and general configuration of all project structures;
- B. The normal maximum surface area and elevation, gross storage capacity, and usable storage capacity of any impoundments;
- C. The number, type, and rated capacity of any turbines or generators; and
- D. The number, length, and voltage of any primary transmission lines.

REFERENCE: FERC EXHIBIT(S) FERC License Application Exhibit A

4. **PROJECT OPERATION.** Provide a description of project operation, to include:

- A. The mode of project operation during low, mean, and high water years, including extent and duration of flow release and impoundment fluctuations;
- B. An estimate of the dependable capacity and average annual energy production, in kilowatt hours, of the project;
- C. An estimate of minimum, mean, and maximum flows, in cubic feet per second, at the project site, including a flow duration curve;
- D. An estimate of the maximum and minimum hydraulic capacities, in cubic feet per second, of any powerplant; and
- E. A statement of the manner in which the power generated at the project is utilized.

5. **PROJECT PLANS.** Provide general design drawings showing all major project structures in sufficient detail to provide a full understanding of the project, including:
- A. Plans (overhead view);
 - B. Elevations (front view); and
 - C. Sections (side view).

REFERENCE: FERC EXHIBIT(S) FERC License Application, Exhibit F (CEII)

6. **PROJECT MAPS.** Provide maps of the project showing:
- A. The location of the project, including principal project structures and features, with reference to local geographic features; and
 - B. A project boundary enclosing all principal project structures and features proposed to be licensed.

REFERENCE: FERC EXHIBIT(S) FERC License Application, Exhibit G

7. **TITLE, RIGHT OR INTEREST.** The Department's Regulations require that any applicant must possess sufficient title, right or interest in all project lands and waters in order to have standing to seek a permit, license, or certification. Please complete the appropriate item(s) below establishing title, right or interest and attach a copy of the indicated document(s):

- ☐ Deed.
- ☐ Option to buy.
- ☐ Lease.
- ☒ Valid FERC License (including all amendments/modifications).
- ☐ Exercise of flowage rights through operation of the Mill Act (12 MRSA Section 651).
- ☐ Exercise of eminent domain under FERC License.

8. **WATER QUALITY.** Provide a description of the impact of the project on water quality, including:

- A. A description of the applicable water quality standards and stream segment classification for the project impoundment and downstream waters, including a description of designated uses;
- B. A description of existing water quality in the project impoundment and downstream waters affected by the project, including a description of existing in-stream water uses;
- C. A statement of the existing measures to be continued and new measures proposed for the purpose of protecting and improving water quality, including measures for the mitigation of project impacts on the designated uses of project waters; and
- D. A description of any anticipated continuing impact on water quality from the continued operation of the project, including impacts on the designated uses of project waters.

Additional information related to Sections 2 - 8 of this WQC Application form is provided below this form as Attachment 1 "Additional Details Document." The additional information summarizes key relevant details.

WQC Application Attachments are as follows:

- Attachment 1: Additional Details Document
- Attachment 2: Distribution List
- Attachment 3: Notice to Abutters, Abutters List, and Proof of Mailing
- Attachment 4: Notice to Municipalities, Proof of Mailing, Newspaper Notice
- Attachment 5: Pre-Filing Meeting Request
- Attachment 6: Certificate of Good Standing
- Attachment 7: Fee Payment

Further, appended to this WQC Application are the following appendices:

- Appendix 1: July 26, 2024 Letter from FERC
- Appendix 2: Shawmut Hydroelectric Project FERC No. 2322 Final License Application and FERC AIR Responses
- Appendix 3: 2024 Shawmut Fish Passage Measures
- Appendix 4: Kennebec River Management Plans
- Appendix 5: Kennebec Hydro Developers Group (KHDG) Agreement 1998
- Appendix 6: Kennebec Hydro Developers Group (KHDG) Status Summary / Chronology
- Appendix 7: 2013 Interim Species Protection Plan and Biological Opinion
- Appendix 8: 2021 Joint Permit Application for Fish Lift Construction
- Appendix 9: 2020 Preliminary Section 18 Prescriptions (NMFS, USFWS)
- Appendix 10: Fish Passage Effectiveness Memo 9/24/2021 (Normandeau)
- Appendix 11: 2023 Biological Opinion (NMFS)
- Appendix 12: 2024 Draft Environmental Impact Statement
- Appendix 13: 2024 Brookfield comments on DEIS

9. **PUBLIC NOTICE.** The Department requires that an applicant provide public notice describing the location and nature of the activity proposed for approval. The public notice requirements that apply to this application are described in the Certification of Publication below, which must be signed and dated by the applicant or authorized agent.

The following information must be submitted with this form:

- A copy of a completed Notice of Intent to File.
- A list of abutters to whom notice was provided. [For the purposes of public notice of this application, an “abutter” is any person who owns property that is both (1) adjoining and (2) within 1 mile of the delineated project boundary, including owners of property directly across a public or private right of way.]

CERTIFICATION OF PUBLICATION

By signing below, the applicant (or authorized agent) certifies that he or she has:

1. Published a Notice of Intent to File once in a newspaper circulated in the area where the project site is located, within 30 days prior to filing the application;
2. Sent a completed copy of the Notice of Intent to File by certified mail or Certificate of Mailing to abutters, as determined by local tax records or other means, within 30 days prior to filing the application; and
3. Sent a copy of the Notice of Intent to File by certified mail or Certificate of Mailing and filed a duplicate of this application with the town clerk of the municipality(ies) where the project is located, within 30 days prior to filing the application.

ADDITIONAL DETAILS DOCUMENT

Additional Information to Shawmut WQC Application Form

2. Existing Environment

- a) The Shawmut Project Hydroelectric Project FERC P-2322 (Shawmut Project) is the third dam on the mainstem Kennebec River and is one of 8 dams located on the mainstem Kennebec below The Forks, where the Dead River joins the Kennebec.
- b) The Shawmut Project dam and original powerhouse have been in place since 1912, and the hydroelectric facilities have a long history of providing clean, renewable, carbon-free electric generation for Maine.
- c) The Kennebec River is one of Maine's working rivers that has a long history of supporting industrial and economic development of the communities along the river and to the state as a whole. The lower Kennebec River remains important for the continued economic well-being of the region and the state, as is reflected in its current water quality classification and designated uses for water supply, industrial use, and hydropower production.
- d) The riverine impoundment created by the Shawmut Project dam has been in place since 1912, and supports recreational uses, provides wastewater treatment assimilation by the Town of Skowhegan, and serves as industrial process water for the Sappi Somerset mill.
- e) As explained in Sappi's comments on Maine Department of Marine Resources' (MDMR) Plan Amendment 1 filed with MDMR in January 2021, the Somerset mill is dependent on the Shawmut dam, which is inexorably tied to and economically supported by the Shawmut hydroelectric facility, and which must receive water quality certification for its continued operation. Comments on the Maine Department of Environmental Protection's (MDEP) August 11, 2021 draft order denying a water quality certification for the Shawmut Project, hereinafter "draft WQC order," submitted by Sappi, Senator Brad Farrin, Representatives Bruce White, Colleen Madigan, and Jack Ducharme, and United Steelworkers all noted the important relationship between the Somerset mill and the Shawmut Project.
- f) Two popular boat launch facilities are located on the impoundment that provide trailered boats, recreational boaters and anglers access to the river between Skowhegan and Shawmut (Final License Application, Exhibit E [Appendix 2]).
- g) In support of resident and migratory fish species (see Final License Application [Appendix 2]), Brookfield White Pine Hydro LLC (BWPH) is proposing to continue to operate the Shawmut Project as a run-of-river hydroelectric facility, install new upstream fish passage and modify and enhance existing downstream fish passage facilities and related measures to support the restoration of diadromous fish species to the lower Kennebec River. **A complete description of BWPH's updated fish passage proposals for the Shawmut Project is provided in Appendix 3.**
- h) BWPH has been an active participant in State of Maine and federal fishery agency efforts to restore diadromous fish species to the Kennebec River, as outlined in existing state and federal fishery management plans for the lower Kennebec River (Appendix 4). Since the 1980s, the federal agencies, the State of Maine and the lower Kennebec River hydropower project owners have worked together to restore migratory fish species to the Kennebec basin. The cooperation between agencies and hydropower owners was initially established in a comprehensive fish-passage agreement ("KHDG Agreement") executed by MDMR among other state and federal agencies in 1998 that is still in effect today (Appendix 5). The

Kennebec Hydro Developers Group (KHDG) Agreement has provided the basis for most of the anadromous fish passage measures undertaken on the Kennebec and Sebasticook River (a tributary to the Kennebec) to date, including the removal of the Edwards and Fort Halifax (Sebasticook River) dams, the installation of fish lifts at the Benton Falls and Burnham projects (Sebasticook River), the installation of the existing fish passage at the Lockwood and Hydro-Kennebec projects, provision of fish trap/sort/transport facilities at Lockwood (that have supported MDMR's stocking efforts), the installation of downstream passage facilities at all of the lower Kennebec River projects, and a mechanism/ process for annual agency consultation, meetings, and reporting. Further, pursuant to the KHDG Agreement, annual funding was specifically earmarked for the support of anadromous fish restoration efforts on the Kennebec. To this day, BWPH continues to meet its obligations in accordance with the terms of the KHDG Agreement. Appendix 6 provides a status summary of the KHDG Agreement obligations. As set forth in the KHDG Agreement, all disagreements between the parties, including MDMR, must be resolved through the FERC process.

3. Project Description

- a) The Shawmut Project generally consists of a dam, two powerhouses and an impoundment. BWPH is proposing to continue to operate the Shawmut Project as a run-of-river hydroelectric facility as explained in the Final License Application (Appendix 2). BWPH is proposing no modifications to the basic project features, other than fish passage facilities discussed below.
- b) Appendix 3 summarizes BWPH's proposed protection, mitigation and enhancement (PME) measures for upstream and downstream fish passage to be implemented at the Shawmut Project. BWPH's proposals are summarized accurately in FERC's Draft Environmental Impact Statement (DEIS) issued March 28, 2024 (Appendix 12) and are consistent with the preliminary fish passage prescriptions issued on August 28, 2020 by the Department of Commerce (National Marine Fisheries Service [NMFS]) and on August 27, 2020 by the Department of the Interior (U.S. Fish and Wildlife Service) under Section 18 of the Federal Power Act (Appendix 9). These measures, the effects of which were analyzed in FERC's DEIS, also comprise the entirety of the actions that the MDEP should consider in evaluating the compliance of the Shawmut Project discharge with state water quality standards pursuant to Section 401 of the Clean Water Act.
- c) BWPH is proposing to install new upstream fish passage facilities at the Shawmut Project. The proposed facilities (fish lift and fish flume) are designed to accommodate 1,540,000 blueback herring, 134,000 alewife, 177,000 American shad, and 12,000 Atlantic salmon annually, as per the MDMR's design populations for the Shawmut Project. The proposed upstream fishway was originally designed and submitted for approval under Shawmut's existing FERC license pursuant to the 1998 FERC License Amendment and 1998 Section 401 Water Quality Certification Amendment (WQC #L-19751-33-A-M dated August 4, 1998), both of which incorporated the terms of the 1998 KHDG Agreement, which requires upstream passage facilities and downstream passage improvements in a phased approach; and under the 2013 Interim Species Protection Plan (ISPP) and Biological Opinion (BO) (Appendix 7), which accelerated the timeline for implementation of the upstream passage

facilities and downstream passage improvements. Final design plans detailing the proposed upstream fishway were filed with FERC on December 31, 2019 and with the MDEP as part of a Condition Compliance application on December 31, 2019 (Appendix 8). The final design plans were developed consistent with the KHDG Agreement and in close consultation with State of Maine and federal fishery agencies, and the consultation on the plans was documented and previously filed with FERC and with the Department as part of the December 31, 2019 Condition Compliance application (Appendix 8). These same plans were again filed with the Department as part of a fishway construction MWDCA permit package that was submitted May 27, 2020; and as part of the USACE Joint Permit Application (JPA 401/404) package submitted May 20, 2020 (Appendix 8). The final design plans were developed using the latest technology and 3-D hydraulic modeling (CFD modeling) to evaluate tailrace hydraulic conditions and the fish passage approach between the two tailraces to ensure that the proposed design would work effectively and efficiently for the target species over a full range of Shawmut Project operating conditions during the upstream fish passage season. The state and federal fishery agencies were consulted and reviewed all study plans and reports.

- d) BWPH is proposing certain modifications to the downstream passage facilities at the Shawmut Project. Plans for proposed modifications to the existing downstream fish passage facilities were developed in consultation with State of Maine and federal fishery agencies. In addition, there will be some changes to the operation of the downstream passage facilities once construction of the new upstream fish lift is completed and operational. These modifications to the operation of downstream passage facilities are described in Appendix 3.
- e) BWPH is proposing to continue to provide upstream and downstream passage for American eel. BWPH currently provides interim eel passage at the Shawmut Project. BWPH's revised the proposed eel passage measures since the submittal of the Final License Application to align with U.S. Fish and Wildlife Service's fishway prescription. In the revised proposal, as outlined in Appendix 3, BWPH proposes to shut down all units for 8 hours at night and pass 425 cfs through the deep gate from August 15 to October 31, until the completion of construction and initial operation of all new upstream and downstream anadromous fish passage facilities. Once construction of the new upstream fish lift is completed and operational, BWPH will provide permanent eel passage facilities and measures, as detailed in Appendix 3. BWPH will conduct balloon tag and radio telemetry studies to determine eel passage routes and survival rates, and then implement any downstream eel passage measures required by U.S. Fish and Wildlife Service. BWPH also proposes to test the effectiveness of any new downstream eel passage measures, if required, for two years.
- f) BWPH proposes a 96% adult Atlantic salmon upstream passage effectiveness and 70% adult alosine upstream passage effectiveness at the Shawmut Project. BWPH proposes to achieve an Atlantic salmon smolt downstream survival standard of 97% of fish surviving passage through the Shawmut Project within 24 hours. BWPH proposes an alosine downstream survival standard of 95% for the Shawmut Project only. NMFS's fishway prescription for Shawmut is consistent with BWPH's proposal.

4. Project Operation

- a) The Shawmut Project is currently operated as run-of-river and BWPH is proposing to continue run-of-river operations. Under this proposal, discharge from the Shawmut Project will essentially match project inflows, with minimal routine fluctuation (< 1 ft) of the project impoundment. The proposed run-of-river operation will ensure that river flows downstream of the dam are continually passed through the Project, and that river flows and habitat downstream of the dam will remain natural and unimpaired by the operation of the Project or Project discharge (Appendix 2, Final License Application, Exhibit B and Exhibit E).
- b) In conjunction with the operation of proposed upstream and downstream fish passage facilities, BWPH proposes to make adjustments to the operation of the Shawmut Project so as to optimize fish passage. These proposals include generating unit prioritization during periods of upstream and downstream passage facility operations and are described in the updated fish passage proposal (Appendix 3). To summarize, once all upstream and downstream structural modifications are fully installed, BWPH will prioritize operation of the generating units in the 1912 Powerhouse such that Unit 1 is first on and last off, followed consecutively by Units 2 through 6), from April 1 through December 31. BWPH also proposes to revise and implement a Fish Passage Operation and Maintenance Plan (FPOMP) for the Shawmut Project (Appendix 3).

5. Project Plans

- a) In February 2013, the Shawmut Project licensee (then FPL Energy) filed with FERC an Interim Species Protection Plan (ISPP) for the four lower Kennebec River projects, including Shawmut (Appendix 7[a]). As part of that ISPP, and in compliance with the terms of the 1998 KHDG Agreement, BWPH proposed installing a new upstream fish passage facility for Atlantic salmon, American shad and river herring at the Shawmut Project under the current FERC license. In July 2013, NMFS issued its Biological Opinion (BO) and Incidental Take Statement (ITS) for the projects included in the ISPP, including the proposed upstream and downstream fish passage facilities at Shawmut (Appendix 7[b]). In May 2016, FERC issued a license amendment Order for the Shawmut Project which incorporated the ISPP fish passage measures and the terms of the ITS into the Shawmut Project FERC license (Appendix 7[c]).
- b) Consistent with the terms of the 1998 FERC License Amendment and Amended Section 401 Water Quality Certification incorporating the terms of the 1998 KHDG Agreement, the 2013 ISPP, and the 2016 FERC License Amendment for the Shawmut Project, on December 31, 2019, BWPH filed final design plans for the proposed upstream fish lift for the Shawmut Project with FERC and the Department. The final designs were developed in close consultation with state and federal fishery agencies, and conceptual plans, as well as 30%, 60%, 90% and final designs, were all reviewed with the fisheries agencies at a series of meetings held between 2017 and 2019.
- c) At no time during the development of the 2013 ISPP or the consultation process that led to the design of a proposed upstream fish lift at the Shawmut Project did any State of Maine or federal fisheries management agency suggest, claim, or demonstrate that the fish lift design that was collaboratively developed, and ultimately filed with FERC and the Department in December 2019, would not perform sufficiently to support agency

management plans and anadromous fish restoration efforts for the Kennebec River. No alternative design, whether in lieu of or in conjunction with the fish lift, was suggested or discussed by any state or federal fishery agency during the three years of collaborative design efforts for the Shawmut upstream fishway.

- d) In December 2019, BWPH filed with FERC a final Species Protection Plan (SPP) for the lower Kennebec River projects – Lockwood, Weston, Hydro Kennebec and Shawmut. Included in the 2019 SPP were provisions for further enhancement of upstream and downstream fish passage at the Shawmut Project, including the adoption of certain performance standards for fish passage effectiveness. At the same time, a draft Biological Assessment (BA) was submitted to FERC which included a complete assessment of the effectiveness of the proposed upstream and downstream fish passage facilities and related operational measures for anadromous fish species at the Shawmut Project. On July 13, 2020 FERC issued a letter indicating that any fish passage measures and requisite Section 7 ESA consultation for the Shawmut Project would be considered as part of the relicensing process, rather than through the SPP process, as part of a single federal action. Although the Shawmut Project is no longer part of the SPP, a full analysis of the proposed fishways and fish passage measures for the Shawmut Project is included in the Biological Opinion issued by NMFS on March 20, 2023 (Appendix 11) as well as in FERC’s DEIS (Appendix 12).
- e) Detailed analysis and supporting information included in the 2023 Biological Opinion and the 2024 DEIS demonstrate that with all the fish passage measures installed and implemented at Shawmut downstream survival for salmon smolts is anticipated to be 97-98%.
- f) In late 2020 and early 2021, MDMR attempted to rewrite the 1993 Kennebec River Resource Management Plan (1993 Kennebec Plan) via rulemaking. This proposed rule, which was never promulgated and the 1993 Kennebec Plan, which recognizes the critical public benefits afforded by the Shawmut Project and its affiliated hydroelectric projects on the lower Kennebec River, remains in force and is the State of Maine’s comprehensive river resource management plan for the lower Kennebec River. As such, the 1993 Plan “must provide a basis for state agency comments, recommendations and permitting decisions,” including the Department’s WQC for the Shawmut Project. 12 M.R.S. § 407. In other words, the Department’s determination with respect to Shawmut’s WQC application must be consistent with the 1993 Kennebec Plan.
- g) The Gulf of Maine Distinct Population Segment (GOM DPS) of Atlantic salmon is a federally listed endangered species under the Endangered Species Act (ESA). Atlantic salmon are not listed as threatened nor endangered under Maine’s Endangered Species Act. Accordingly, NMFS is exclusively charged with determining whether a federal action, such as the relicensing of the Shawmut Project, would jeopardize the survival or recovery of the federal ESA-listed Atlantic salmon. Neither MDMR, nor MDEP (through the 401 process) has the authority to determine actions necessary to protect a federally listed endangered species, nor should any such recommendations from MDMR be the basis for determining whether the Shawmut Project meets state water quality standards. FERC conducted Section 7 consultation with NMFS for the Shawmut relicensing, the outcome of which resulted in the issuance of a Biological Opinion with Reasonable and Prudent Measures (or Alternative) necessary to avoid, minimize and mitigate effects to Atlantic salmon. The Biological

Opinion was issued March 20, 2023. BWPH's proposed fish passage actions are consistent with the Biological Opinion and are therefore the actions the Department should consider in the certification of the Shawmut Project.

8. Water Quality

A. A description of the applicable water quality standards and stream segment classification for the project impoundment and downstream waters, including a description of designated uses;

The classification of the Shawmut Project waters are Class B and C. While the waters of the impoundment are Class C, the Shawmut Project discharges exclusively to Class B waters.

- a) Water quality standards for Class B waters, including designated uses are as follows:
- Designated uses: Class B waters must be of such quality that they are suitable for the designated uses of drinking water supply after treatment; fishing; agriculture; recreation in and on the water; industrial process and cooling water supply; hydroelectric power generation, except as prohibited under Title 12, section 403; navigation; and as habitat for fish and other aquatic life. 38 M.R.S. § 465(3)(A); 38 M.R.S. § 465(4)(A). Additionally, habitat in Class B waters must be characterized as unimpaired. 38 M.R.S. § 465(3)(A). "Unimpaired" means without a diminished capacity to support aquatic life. 38 M.R.S. § 466(11).
 - Numeric Standards: The dissolved oxygen (DO) content of the Class B waters of the Kennebec River, as established in 38 M.R.S. § 465(3)(B), may not be less than 7 parts per million or 75% of saturation, whichever is higher, except that for the period from October 1 to May 14, in order to ensure spawning and egg incubation of indigenous fish species, the 7-day mean dissolved oxygen concentration may not be less than 9.5 parts per million and the one-day minimum dissolved oxygen concentration may not be less than 8.0 parts per million in identified fish spawning areas.
 - Narrative Standards for Aquatic Life: Discharges to Class B waters may not cause adverse impact to aquatic life in that the receiving waters must be of sufficient quality to support all aquatic species indigenous to the receiving water without detrimental changes in the resident biological community. The habitat must be characterized as unimpaired. 38 M.R.S. § 465(3)(C). "Without detrimental changes in the resident biological community" means no significant loss of species or excessive dominance by any species or group of species attributable to human activity. 38 M.R.S. § 466(12). "Unimpaired" means without a diminished capacity to support aquatic life. 38 M.R.S. § 466(11).

B. A description of existing water quality in the project impoundment and downstream waters affected by the project, including a description of existing in-stream water uses;

- b) BWPH conducted water quality studies as requested by the Department, and consistent with the Department's standard methods and protocols, as part of the FERC relicensing effort. Results of those studies demonstrate that the continued operation of the Shawmut Project, as proposed, will meet the applicable designated uses and water quality standards. In its draft WQC order, the Department confirmed that the applicable numeric and narrative aquatic life standards are met at the Shawmut Project. Specifically, regarding numeric

standards for dissolved oxygen in the Project impoundment, the Department found that there was “a single DO excursion below the Class B criterion of 7 ppm, but exceeding 5 ppm, in unstratified waters subject to Class C criterion and that all impoundment DO measurements met the percent saturation standard.” BWPH notes the Project discharges exclusively into Class B waters. In the Project tailwaters, the Department found that DO data collected downstream of the Project showed DO excursions below the class B criterion during the nights of August 9-11, 2016. The Department concluded that the operations of the Project “do not cause or contribute to the DO excursions but, rather, they DO excursions result from conditions related to discharge of nutrients at a non-Project upstream facility or nighttime respiration of plants.”

C. A statement of the existing measures to be continued and new measures proposed for the purpose of protecting and improving water quality, including measures for the mitigation of project impacts on the designated uses of project waters; and

- c) As described in Section 3 of this application, BWPH is proposing to continue to operate the existing Shawmut Project, which generally consists of a dam, two powerhouses and an impoundment as a run-of-river hydroelectric facility. BWPH is proposing no modifications to the basic project features, but is proposing to install new upstream fish passage facilities and make modifications and enhancements to existing downstream passage facilities for diadromous fish including Atlantic salmon, American shad, river herring (blueback herring and alewife), sea lamprey, and American eel at the Shawmut Project (see Appendix 3).
- d) In its August 28, 2020 preliminary prescriptions, NMFS calls for the installation of 1 or 1.5 inch clear space trash racks or overlay screens at the Project intakes for the Francis (Units 1-6) and propeller units (Units 7 and 8). Because Section 18 prescriptions are mandatory and must be incorporated by FERC into the Project license, BWPH, in anticipation of this requirement will install 1 or 1.5 inch racks or overlays at the Project or because the close-spaced racks may create approach velocities that will result in potential impingement of Atlantic salmon smolts and/or kelts, implement seasonal nighttime shutdowns of the generating units—a measure that has worked effectively at many other hydropower projects in Maine. BWPH is also planning to comply with the other Section 18 prescriptions, as outlined in Appendix 3.

D. A description of any anticipated continuing impact on water quality from the continued operation of the project, including impacts on the designated uses of project waters.

- a) BWPH proposes to continue to operate the Shawmut Project as run-of-river, with minimal fluctuations in impoundment levels, and minimal effects to downstream river flows. Operation of the Project in this manner will ensure that the Project continues to meet applicable water quality standards for Class B waters. Continued operation of the Project, as proposed, will also ensure that the designated use of Class B waters for hydroelectric generation continue to be met.
- b) BWPH’s proposals to install, enhance, and operate upstream and downstream fish passage facilities at the Shawmut Project, will have no impact on existing Project water quality other than short-term effects associated with construction activities which will be addressed through the construction permitting process, as shown in Appendix 9. Discharges from the

Project will continue to meet all state water quality standards for Class B waters, as it does today. The Department erroneously concluded in the draft WQC order that the Project, as proposed, does not meet water quality standards because “the applicant has not demonstrated that under its proposed operation the Project will meet the narrative classification standards for Class B and Class C waters of the designated use of habitat for fish and other aquatic life because the dam and its discharge do not allow species of indigenous fish to pass upstream or downstream in a safe, time, and effective manner.” BWPH notes the Project discharges exclusively into Class B waters. BWPH’s proposals for fish passage at Shawmut will allow fish to pass in a safe, timely, and effective manner. Moreover, discharges from the Project will continue to meet all state water quality standards.

- c) The aquatic life standard for Class B waters specifies that “discharges to Class B waters may not cause adverse impact to aquatic life in that the receiving waters must be of sufficient quality to support all aquatic species indigenous to the receiving water without detrimental changes in the resident biological community. The habitat must be characterized as unimpaired.” As BWPH is proposing to provide substantial fish passage facilities at the Project to allow indigenous fish to pass upstream and downstream of the Project at the high rates specified herein, the Project waters will be of such quality to support fish species indigenous to the Kennebec River, including both resident and migratory fish species, without detrimental changes in the resident biological community, and the habitat will not be impaired.
- d) In its comments on FERC’s DEA for the Shawmut Project, MDMR suggested that a nature-like fishway (NLF) installed at the Shawmut Project would achieve MDMR’s fish passage objectives for anadromous fish. An NLF at Shawmut had been considered among the fish passage alternatives initially discussed between BWPH and the fisheries agencies, including MDMR, but was dismissed early in the planning process as not feasible due to site constraints at the Project and as a result of siting studies indicating the greatest attraction in the vicinity of the Unit 1–6 powerhouse. In its DEIS, FERC evaluated the possibility of an NLF at Shawmut and concluded that an NLF is not feasible at Shawmut. BWPH is unaware of any other information demonstrating an NLF would improve passage over the planned upstream fish lift and downstream facility improvements.

Re: Notice of Intent to File Water Quality Certification Application for the
Shawmut Hydroelectric Project (FERC P-2322) to Town of Benton

Dear Municipality:

Brookfield White Pine Hydro LLC (Brookfield), holds a license issued by the Federal Energy Regulatory Commission (FERC) for the Shawmut Hydroelectric Project (P-2322) (Shawmut Project), located on the Kennebec River within the towns of Skowhegan, Fairfield, Clinton, and Benton, Maine. Brookfield is in the process of obtaining a new license from FERC.

In order for FERC to issue a new license, Brookfield must apply for and obtain a Water Quality Certification (WQC) from the State of Maine Department of Environmental Protection (Maine DEP) under the provisions of Section 401 of the Clean Water Act. The Maine DEP WQC application process requires that Brookfield provide notice of intent to file the WQC application to municipalities where the Shawmut Project is located, which is why you are receiving this letter. Attached is the notice of intent to file a WQC application on or about October 23, 2024, unless application submittal is delayed due to changes in FERC's regulatory process schedules. Following the submittal of the WQC application to Maine DEP, a copy of the WQC application will be mailed to the Town of Benton separate of this notification. We respectfully ask that you house this application of the WQC for public viewing, once it arrives.

If you have any questions regarding this notice, please contact me by phone at (207) 755-5605 or by email at Randy.Dorman@BrookfieldRenewable.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Randy Dorman". The signature is stylized with a large "R" and "D".

**NOTICE OF INTENT TO FILE WQC APPLICATION
FOR THE SHAWMUT HYDROELECTRIC PROJECT (FERC P-2322)**

**Notice of Intent to File
Maine Water Quality Certification Application**

Please take notice that Brookfield White Pine Hydro LLC of 150 Main Street, Lewiston, Maine 04240, 207-755-5605, is intending to file an application with the Maine Department of Environmental Protection (Maine DEP) for Water Quality Certification pursuant to the provisions of the Federal Clean Water Act, Section 401. The application is for the Federal Energy Regulatory Commission (FERC or Commission) relicensing of the continued operation for the Shawmut Hydroelectric Project (FERC No. 2322) located on the Kennebec River in the towns of Skowhegan, Fairfield, Clinton, and Benton, Maine under the terms of a new license from the Commission.

The application will be filed on or about October 23, 2024, unless application submittal is delayed due to changes in FERC's regulatory process schedules. After the application is filed it will be available for public inspection at the Maine DEP's offices in Augusta during normal working hours. A copy of the application may also be seen at the municipal offices in Fairfield, Skowhegan, Clinton, and Benton, Maine.

A request for a public hearing or a request that the Board of Environmental Protection assume jurisdiction over this application must be received by the Department in writing, no later than 20 days after the application is filed with the Maine DEP. Public comment on the application will be accepted throughout the processing of the application.

For Federally licensed, permitted, or funded activities in the Coastal Zone, review of this application shall also constitute the State's consistency review in accordance with the Maine Coastal Program pursuant to Section 307 of the Federal Coastal Zone Management Act.

Written public comments may be sent to the Maine Department of Environmental Protection, Bureau of Land and Water Quality, 17 State House Station, Augusta, Maine 04333.

State of Maine Maine Public Utilities Commission RFP# 202408153 Consulting Services to Review Available Grid Enhancing Technologies to Reduce or Defer Need for Investment in Grid Infrastructure

The Commission is seeking proposals for expert consulting services from bidders with strong and relevant expertise in grid-enhancing technology (GET) to conduct a review of available GETs that could be implemented by large investor-owned transmission and distribution utilities (IOU) to reduce or defer the need for investment in grid infrastructure in the State pursuant to RL 2023, ch. 553.

A copy of the RFP as well as the Question & Answer Summary and all amendments related to the RFP can be obtained at: <https://www.maine.gov/dots/bm/procurement/services/vendors/rfps>

Proposals must be submitted to the State of Maine Division of Procurement Services, via e-mail, at: Proposals@maine.gov. Proposal submissions must be received no later than 11:59 p.m., local time, on October 7, 2024. Proposals will be opened the following business day. Proposals not submitted to the Division of Procurement Services, aforementioned e-mail address by the aforementioned deadline will not be considered for the contract award.

Public Notice

Notice of Intent to File Maine Water Quality Certification Application

Please take notice that Brookfield White Pine Hydro LLC, of 150 Main Street, Lewiston, Maine 04240, 207-755-5605, is intending to file an application with the Maine Department of Environmental Protection (Maine DEP) for Water Quality Certification pursuant to the provisions of the Federal Clean Water Act, Section 401. The application is for the Federal Energy Regulatory Commission (FERC or Commission) relicensing of the continued operation of the Shawmut Hydroelectric Project (FERC No. 2322) located on the Kennebec River in the towns of Skowhegan, Fairfield, Clinton, and Benton, Maine under the terms of a new license from the Commission.

The application will be filed on or about October 23, 2024, unless application submittal is delayed due to changes in FERC's regulatory process schedules. After the application is filed it will be available for public inspection at the Maine DEP's offices in Augusta during normal working hours. A copy of the application may also be seen at the municipal offices in Fairfield, Skowhegan, Clinton, and Benton, Maine.

A request for a public hearing or a request that the Board of Environmental Protection assume jurisdiction over this application must be received by the Department in writing, no later than 20 days after the application is filed with the Maine DEP. Public comment on the application will be accepted throughout the processing of the application.

For Federally licensed, permitted, or funded activities in the Coastal Zone, review of this application shall also constitute the State's consistency review in accordance with the Maine Coastal Program pursuant to Section 307 of the Federal Coastal Zone Management Act.

Written public comments may be sent to the Maine Department of Environmental Protection, Bureau of Land and Water Quality, 17 State House Station, Augusta, Maine 04333.

State of Maine Governor's Office of Policy Innovation and the Future RFP# 202408156 Energy Efficiency Planning for Rural Communities

The State of Maine is seeking proposals for a qualified consultant to support up to 20 Maine communities with high climate vulnerabilities to assess energy use in their public buildings and develop energy conservation implementation plans.

A copy of the RFP and all related documents can be obtained at: <https://www.maine.gov/dots/bm/procurement/services/vendors/rfps>

Proposals must be submitted to the State of Maine Office of State Procurement Services, via e-mail, at: Proposals@maine.gov. Proposal submissions must be received no later than 11:59 p.m., local time, on Friday November 1, 2024. Proposals will be opened the following business day.

Public Notice

Legal Notice Certificate of Need

The Maine Department of Health and Human Services - Division of Licensing and Certification announces that an application for a Certificate of Need has been received. An expanded review of the application will be conducted by representatives of the Department from the Health Care Compliance and Operations Program in accordance with the provisions of the Maine Certificate of Need Act, as amended (22 M.R.S.A. chapter 103-A).

Applicant: Millinocket Regional Hospital
200 Somerset Street
Millinocket, ME 04462

Proposal: Emergency Department Renovation and Expansion

Description of Proposal: This project will include a complete renovation of the current 4,386 sq. ft. Emergency Department and the construction of a 10,728 sq. ft. addition. This will significantly increase the space available for patient treatment. The goal of this project is to increase the hospital's operational efficiency, overall capacity and resilience to meet current and future demand in the community. Capital expenditures associated with this project are estimated at \$17,795,019.

Subject to Review under M.R.S.A. §329 (3).

Any person may examine all or part of the public records relating to this application and purchase copies of any or all of those records during the normal business hours of the department. Any person may submit comments or additional information in writing to the Department regarding the application at any time from the date of publication of this notice until the application process is closed for comment. Comments and additional information should be sent to the address below. This comment period will be for no less than 30 days.

The Commissioner, or the Commissioner's designee, will hold a public hearing if any person directly affected by a review requests, in writing, that such a public hearing be held, and the request is received no later than 15 days following the publication of this notice pursuant to section 339, subsection 2. Requests to hold a public hearing should be sent to the address below.

As soon as practicable, once the public comment period closes, the department staff shall provide the preliminary analyses of the application and the record to this applicant, the Commissioner and any person who requests a copy of the analyses and record. Notice of the availability of the analyses will be published in a newspaper in general circulation in Kennebec County, where the project is located. It will also be posted to the department's publicly accessible site on the Internet.

Additional information concerning this proposal and the expanded review process, and the expanded review schedule may be obtained by contacting DHHS, Division of Licensing and Certification. All comments, questions or inquiries should be directed to: Division of Licensing and Certification, Attn: Richard Lawrence, Health Care Compliance and Operations, 41 Anthony Avenue, Augusta, Maine 04333-0011 (Tel: 287-9300; FAX 287-5815).

Re: Notice of Intent to File Water Quality Certification Application to Owners of Property Adjoining the Shawmut Hydroelectric Project (FERC P-2322)

Dear Recipient:

Brookfield White Pine Hydro LLC (Brookfield), holds a license issued by the Federal Energy Regulatory Commission (FERC) for the Shawmut Hydroelectric Project (P-2322) (Shawmut Project), located on the Kennebec River within the towns of Skowhegan, Fairfield, Clinton, and Benton, Maine. Brookfield is in the process of obtaining a new license from FERC.

In order for FERC to issue a new license, Brookfield must apply for and obtain a Water Quality Certification (WQC) from the State of Maine Department of Environmental Protection (Maine DEP) under the provisions of Section 401 of the Clean Water Act. The Maine DEP WQC application process requires that Brookfield provide notice of intent to file the WQC application to those landowners whose property abuts the Shawmut Project, which is why you are receiving this letter. Attached is the notice of intent to file a WQC application on or about October 23, 2024, unless application submittal is delayed due to changes in FERC's regulatory process schedules.

If you have any questions regarding this notice, please contact me by phone at (207) 755-5605 or by email at Randy.Dorman@BrookfieldRenewable.com.

Sincerely,

Randall Dorman
Manager, Compliance NE
Brookfield Renewable

Re: *Shawmut Hydroelectric Project FERC No. 2322-060*
Section 401 Water Quality Certification Request for Pre-Filing Meeting

Dear Ms. Paye:

On January 31, 2020, Brookfield White Pine Hydro LLC ("Brookfield"), filed its Final License Application for the Shawmut Hydroelectric Project (P-2322) ("Shawmut Project") with the Federal Energy Regulatory Commission ("FERC" or "Commission"). On August 28, 2020, Brookfield filed an application for Water Quality Certification ("WQC") under Section 401 of the Clean Water Act ("CWA") with the Maine Department of Environmental Protection ("Maine DEP"). On August 18, 2021, Brookfield withdrew this application and on August 26, 2021, the Maine DEP acknowledged the withdrawal. On October 15, 2021, Brookfield again applied to Maine DEP for a WQC for the Shawmut Project. In a letter filed with the Commission on October 12, 2022, Maine DEP denied Brookfield's request for a WQC without prejudice.

In accordance with the Commission's policy and the Commission's July 26, 2024, letter to Brookfield, Brookfield must notify the Commission within 90 days (by October 24, 2024), whether Brookfield has refiled the certification request with Maine DEP. Brookfield is now preparing to file with the Maine DEP a new WQC application for the Shawmut Project on or before October 24, 2024. In preparation for the filing the WQC application, Brookfield hereby requests a pre-filing meeting for the Shawmut Project.

I will follow up by phone or email to discuss a possible meeting date. In the meantime, if you have any questions, please contact me by phone at (207) 755-5605 or by email at Randy.Dorman@BrookfieldRenewable.com.

Sincerely,

Randall Dorman
Manager, Compliance NE
Brookfield Renewable

CERTIFICATE OF GOOD STANDING

State of Maine

Department of the Secretary of State

I, the Secretary of State of Maine, certify that according to the provisions of the Constitution and Laws of the State of Maine, the Department of the Secretary of State is the legal custodian of the Great Seal of the State of Maine which is hereunto affixed and of the records of qualification of foreign limited liability companies in this State and annual reports filed by the same.

I further certify that BROOKFIELD WHITE PINE HYDRO LLC formerly FPL ENERGY MAINE HYDRO LLC, a DELAWARE limited liability company, is a duly qualified foreign limited liability company under the laws of the State of Maine and that the qualification to conduct activities in this State was filed on April 27, 1998.

I further certify that said foreign limited liability company has filed annual reports due to this Department, and that no action is now pending by or on behalf of the State of Maine to forfeit the qualification to conduct activities in this State and that according to the records in the Department of the Secretary of State, said foreign limited liability company is a legally existing limited liability company in good standing under the laws of the State of Maine at the present time.

In testimony whereof, I have caused the Great Seal of the State of Maine to be hereunto affixed, given under my hand at Augusta, Maine, this tenth day of October 2024.

Augusta, ME 04333-0017

Re: Shawmut Hydroelectric Project (FERC No. 2322) Water Quality Certification
Application Fee

Dear Ms. Paye:

Brookfield White Pine Hydro, LLC (BWPH) holds a license issued by the Federal Energy Regulatory Commission (FERC) for the Shawmut Hydroelectric Project (FERC No. 2322) (Shawmut Project), located on the Kennebec River in the towns of Skowhegan, Fairfield, Clinton and Benton, Maine. BWPH is in the process of obtaining a new license from FERC. In order for FERC to issue a new license, BWPH must also apply for and obtain a Water Quality Certification (WQC) from the State of Maine Department of Environmental Protection (Maine DEP) under the provisions of Section 401 of the Clean Water Act.

On behalf of BWPH, please find the enclosed payment of \$6,565.35 for the Shawmut Hydroelectric Project Water Quality Certification application fee. BWPH will file the WQC application associated with this payment with the Maine DEP on or about October 21, 2024. Should you have any questions regarding this submittal, please contact Randy Dorman at (207) 755-5605 or by email at randy.dorman@brookfieldrenewable.com.

Sincerely,

KLEINSCHMIDT ASSOCIATES

ATTACHMENT A

CHECK PROCESSING FORM

STATE OF MAINE
DEPARTMENT OF ENVIRONMENTAL PROTECTION
Individual Permit Application Fee – Check Processing Form

The Department is now requiring the submission of the following permit applications by email:

- Site Location of Development Law (Site Law)
- Natural Resources Protection Act (NRPA)
- Stormwater Management Law
- Maine Waterway Development and Conservation Act (MWDCA)
- Borrow Pits and Quarries – Variances and Notices of Intent to Comply

All applications must include the application fee. The Department's review of an application for completeness begins upon receipt of the application and application fee. The fee for each permit type is listed in the Department's fee schedule (<https://www.maine.gov/dep/feeschedule.pdf>).

Payment by Credit Card. Application fees up to \$5,000 may be paid by credit card on the Department's [payment portal](#). Instructions for using the portal and including payment confirmation with an application are available on the Department's website:

(<https://www.maine.gov/dep/land/permits/individual/index.html>).

(You do not need to complete this form if you pay the application fee using the portal.)

Payment by Check. Individual permit applicants paying the application fee by check must:

- a. Complete this form and include a copy along with the email submission of the application to DEP.LandApplication@maine.gov; AND
- b. Mail a check for application fee and completed copy of this form to: Department of Environmental Protection, 17 State House Station, Augusta, ME 04333-0017. Checks should be payable to "Treasurer, State of Maine."
