Hello, my name is Andrea Stevens. I am a member of the Penobscot nation. I live very close to junior Ridge landfill and I wanted to reach out and give my thoughts on the expansion of Junior Ridge. As of tonight like many nights before but tonight in particular, there is a major fire going on at that landfill right now is the chemicals that are going into the air that we are breathing in from that not only us but the wildlife that live around that landfill is alarming. What also has been an issue is the worry of wondering what's gonna happen to our water supply if this landfill continues to grow , not only for the Scott nation, but for other towns surrounding that landfill. I really feel like many others do who are opposed to the landfill. It's not good for the environment at all. It's not good for the wildlife and most of all it's not good for the people that live around it. I hope that this landfill could be shut down completely has done nothing but bring pollution into this area which is not gonna just affect this area but overall it's going to affect the entire state of Maine in time. I hope this email finds you well and I hope , that with what I have explained that maybe you would take my words into consideration as a concerned person I can only speak for myself, but I know there's many others that are just as concerned as I am.

Thank you,
Andrea Stevens
