DOW CORNING
HIGH VACUUM GREASE
for demountable or movable joints in high vacuum systems.
• Useful at pressures of at least 10^{-6} mm.
• Stable from -40° to $+400^{\circ}$ F.
• Oxidation resistant
• Insoluble in water
• Nontoxic

INGREDIENTS

Hydrocarbon oil	20%
Cyclohexanone	10%
Perchloroethylene	68%
Paranitrophenol	2%

CH-24

Apple

150

DIRECTIONS

Wash the leather items with soap and water at a temperature not to exceed 100°F. A washing machine or other device in which the shoes are tumbled may be used. Remove dirt remaining after treatment by rubbing with a cloth or a brush. Rinse with clean water. Allow leather to drain for five minutes. Apply the compound by immersing the leather in the solution for 10 seconds. When only a small quantity is needed, application may be made with a soft bristled brush, air dauber or cloth. Apply in a well ventilated place and avoid inhaling the toxic solvent. After application, wash hands thoroughly with cool water and soap. Allow leather items to dry thoroughly in the open air before wearing. Avoid skin contact.
