RE: DEP License #00-4892-11020; Condition Compliance for East Augusta Landfill

Dear Mr. Arledge:

The Bureau of Hazardous Material and Solid Waste Control has reviewed the information you have submitted in accordance with Special Condition No. 14 of Board Order #00-4892-11020, dated June 27, 1979, and issued pursuant to Title 38 MRSA Section 483 and Title 38 MRSA Section 1301 et seq.

Condition No.14 reads as follows: "The applicant shall submit for review and approval to the Dept. prior to any construction work other than construction of the access road, land clearing and grubbing activities, construction specifications provided to the contractor or contractors engaged to construct all or parts of the facility. These specifications shall include leachate collection and transport system integrity testing."

In response to this condition you have submitted plans and construction specifications to raise the Phases I and II western and eastern dams to their prior authorized final elevation of 130 feet. This submission includes a Construction Quality Control Program.

As the result of this review the Department has found that this submission does satisfactorily address the requirements of Condition No 14. Please note Special Condition 14 is an ongoing requirement and remains in effect for the duration of the facility or until rescinded.

Please contact Robert Brochu or myself if you have any questions regarding this matter.

Sincerely,

*Paula M. Clark*  
Paula M. Clark, Director  
Division of Solid Waste Facilities Regulation  
Bureau of Hazardous Materials & Solid Waste Control
