**Re: Thermal Analysis of Native Soil Samples
Blue Sky Wind Power Project, Bingham, ME, Project No. 10-0014.3**

The following is the report of thermal dryout characterization tests conducted on ten (10) bulk samples of native soil from the referenced project.

Thermal Resistivity Tests: The samples were re-compacted at the moisture content and density ***provided by SW Cole***. A series of thermal resistivity measurements were made in stages with moisture content ranging from the 'wet' to the totally dry condition. The tests were conducted in accordance with the IEEE standard. The results are tabulated below and the thermal dryout curves are presented in **Figures 1 & 2**.

Sample ID, Description, Thermal Resistivity, Moisture Content and Density

Sample ID	Visual Description (SW Cole)	Thermal Resistivity (°C-cm/W)		Moisture Content (%)	Dry Density (lb/ft ³)
		Wet	Dry		
8032A @ 6'-8'	TILL	49	165	10	123
8033A @ 4'-6'	TILL	47	162	9	123
8034A @ 5'-6.5'	TILL	48	148	8	127
8035A @ 5'-6'	TILL	47	135	9	131
8036A @ 10'-12'	TILL	42	150	9	126
8037A @ 4'-6'	TILL	47	169	10	120
8039A @ 3'-4'	TILL	44	119	7	133
8040A @ 3'-4'	TILL	49	171	13	114
8041A @ 4'-5'	TILL	53	173	7	125
8061A @ 4'-6'	TILL	51	170	9	125

**Re: Thermal Analysis of Native Soil Samples
Blue Sky West Wind Project**

The following is a report of thermal dryout characterization tests conducted on the three (3) disturbed bulk soil samples collected on November 15, 2012.

Test Procedure and Equipment:

The tests included the measurement of moisture content, density and thermal dryout characterization (thermal resistivity as a function of moisture content). The samples were re-compacted at the “optimum” moisture content and at 95% of the modified Proctor density ***provided by SW Cole***. A series of measurements were made in stages with the moisture contents ranging from ‘moist’ to the totally dry condition. The tests were conducted in accordance with the IEEE standard. The results are tabulated below and the thermal dryout curves are presented in **Figure 1**.

Sample ID, Moisture, Density and Thermal Resistivity

ID	SW Cole Sample Lab ID	Sample Depth (ft)	Visual Description	Thermal Resistivity (°C-cm/W)		Moisture Content (%)	Dry Density (lb/ft³)
				Wet	Dry		
TP-1 S-1 TURBINE 28	16135G	N/A	sandy silt, some gravel	46	174	11	125.5
TP-2 SUBSTATION	16133G	3' – 3.5'	till	45	178	14	123.3
TP-9 S-1 TURBINE 14	16134G	N/A	silt and sand; some gravel	50	148	8	132.3
