Subject: Proposed mining Regulations
Date: Tuesday, September 13, 2016 1:57:17 PM

To members of B.E.P. ,

I recently learned about the mining laws that are up for debate. I do not support the current proposal because the mines will destroy the Preserved Lands. It will pollute the water supplies and potentially harm wildlife. I believe that we should work to protect our natural lands and the wildlife within them. I believe that the rules should be strict and specific so that it protect the air and the water of the state.

Thank you for considering what I have to say.

Respectfully
Carmelo Pena
