Dear members of the Board of Environmental Protection

My name is Charles Eaton and I own Maine Logistic Solutions in the town of Greenbush Maine. Maine Logistic Solutions provides transportation services in the solid waste management business and employees 31 people in Maine.

I have been servicing the waste industry for close to 30 years and have transported waste to many recycling sites in New England.

I am submitting these comments in opposition to the citizen petition to initiate rulemaking to amend Chapter 400 Maine Solid Waste Management System.

The transportation we do for our customers in Maine seem to be struggling with finding places to take the material for recycling and just taking it to the landfill. We need more recycling, not less. If this petition closes the Re Energy Processing Facility in Lewiston it will not only hurt my business but several other businesses will also see a negative impact.

I would like to respectfully request the board defeat the citizen petition to amend Chapter 400 Maine Solid Waste Management Rules for these reasons.

Thank you

Charles Eaton

Maine Logistic Solutions
