Subject: No to proposed landfill in Norridgewock

EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Victoria; This is about water, plain and simple...to destroy wetlands, threaten streams and rivers and risk possible contamination of groundwater and wells with very dangerous pollutants simply for convenience of communities and businesses who do not want to take care of their own waste as well as the profit motive of a corporation is thoroughly unconscionable...please use all the power you have to deny Waste Management expansion of the Norridgewock landfill...when considering the grave risk of this project, there is no benefit for the people of Maine that could possibly justify moving forward with this proposed landfill expansion...

Also, to be fair, you must allow a longer time frame for public comment...

Fresh water in Maine and all across the United States and beyond is being seriously threatened...do not forget that Water Is Life on Planet Earth...human beings and fellow beings cannot live without clean fresh water...

I humbly ask you again to use your power and influence to deny Waste Management any permits to move forward with this project.

Please say no to this life threatening proposal...

Thank you!

Peace to you,

Byron
