Hi Deputy Director,

I am commenting about the DEP Draft Decision of Approval with Conditions of WMDSM license application #S-010735-WD-YB-N.

I do not want an expansion of waste in the State of Maine. Maine is my life-long home. We should be protecting our resources. We should not be allowing out-of-state trash to dump here. We already have millions of out of state visitors. Why would we expand pollution in our state when tourism is our best economy?

I have environmental concerns. Flooding, as storms have become stronger. Storm water drains already do not have the capacity to handle. Fire, as this expansion would increase the risk. Water pollution and it's effect on water quality of the Kennebec River and its effect on wildlife including the ability for the wild Atlantic Salmon to survive and spawn.

I have extremely strong doubts that this proposed licensing could actually meet the environmental protection requirements. I am well educated about the environment and I have a career in the field.

I ask that you please deny this application because it does not provide sufficient evidence that it can meet environmental regulations to protect Maine's environmental resources and our tourist economy.

**Thank you,
Marissa Caminiti
