Please conduct more in-depth well monitoring and hydrogeology assessment before approving this application. The new “expansion” is significantly closer to the public water supply and the Kennebec River, putting a valuable resource at risk. Maine’s waterways are of utmost importance to the state’s natural heritage and countless people rely on the water quality of the Kennebec River for their livelihoods and cultural traditions.

Please provide more convincing evidence to the people of Maine that this expansion will not pose a risk to the water quality of the Kennebec River and surrounding waterways.
