To Victoria Eleftheriou, Deputy Director, Bureau of Remediation and Waste Management:

I am writing to ask you to disapprove Waste Management license application #S-010735-WD-YB-NY unless the following concerns are addressed:

- Will the license allow WM to take medical waste, and if so, how much? This should be clearly stated and the knowledge made public before licensing.
- The license application currently does not provide adequate information to demonstrate that the proposed waste facility will not pollute groundwater, contaminate ambient air, create a nuisance, or constitute a hazard to health or welfare. This information is vital and should be provided!
- Why is the State of Maine accepting waste from other states that will affect our water, soils and air? WM will make money while citizens have to deal with contamination!
- What are the limits that would be imposed on this landfill? They should be clear and demonstrate that the company would be in compliance with the State's Solid Waste Management Hierarchy.

State Government owes Maine Citizens complete and accurate information. It is your responsibility to get it.

THank you.
