Dear Ms, Eleftheriou,

I write as a citizen of Maine to express my concern about the landfill extension application from Waste Management. I am deeply concerned about protecting the waters of our state and all of the people. I am concerned that this expansion will damage water quality in the area and further, and I do not think that we in Maine should be accepting out of state waste of items that are deemed too toxic to dispose of in the states and Canada where they are coming from! I strongly urge you to require that more accurate, independent studies be required of the impact on surrounding waters. I'd like to see the state reject any expansions that could pollute our land and waters. I believe we are committed in Maine to preserving our environment, and I think we should reject this waste to put pressure on manufacturers to move towards production processes that are sustainable and where producers take responsibility for waste produced. Thank you for your work!
