

Written Response to:

Maine Department of Environmental Protection  
Augusta, Maine  
Public Hearing, November 22, 2021  
Re: Central Maine Power Company Hydro Quebec Project

On November 2, 2021, residents of Maine voted by a 59-41 per cent margin to stop construction of the Central Maine Power Company Hydro Quebec transmission corridor in Maine.

I am opposed to the CMP Hydro Quebec corridor project. For financial reasons, the project has, at best, only negligible benefits to improve the quality of life in Maine.

In its response to the Question 1 referendum article, Central Maine Power Company has publically waged a misleading Hydro Quebec sales promotion campaign ... a ridiculous CMP word war primarily centered on CMP's hypothetical application of the word "retroactive."

I request the Department of Environmental Protection revoke the CMP permit to construct the Hydro Quebec transmission corridor in Maine.

Everett E. Simpson
