

Aerial of Raven Farm Substation, Cumberland. The substation will be expanded to the northwest side in the existing gravel area. No tree removal is required.

Viewpoint 1: View looking northeast toward Raven Farm Substation in Cumberland. The existing planted earth berm will screen views of the proposed substation expansion from the majority of Greely Road within the existing transmission line corridor.

Viewpoint 2: View looking northeast toward Raven Farm Substation in Cumberland. The components of the substation expansion will be minimally visible where the access road meets Greely Road. The partially visible components will be seen to the left of the tan sided building in image and behind the three self weathering steel single poles in the center of the image. The proposed components will be the same size and color as existing components and partially screened by the existing earth berm and buffer plantings.
