**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

I kept the witness list at February 15 to help us plan. Prefile is 2/28 with the witness testimony.

The two remaining issues that are left to deal with in order to get the 3<sup>rd</sup> PO out are greenhouse gas emissions and whether we want to change the date for the witness list. Peggy, I will wait for you to work your magic on that one. I sent you an email last night about where in the applications CMP mentions the emissions benefits of the project. As for the issue of pushing back the witness list a week, that would still give us a week to start to figure out the flow for the hearing.
