Dear Madams or Sirs, Please do not let this tearing down and destruction of our pristine mountains take place. This would be a very regretful decision and monumental neglect of our forests. Not only is this a wide swath the first time around, CMP will need to have access to the power lines for generations to come. I remember when I was a little girl and interstate 95 was being built through Topsham, which was necessary. The clear stream that ran through my parent's property turned orange and was never clear again. There were no more fish and the wild life either died or went away. Do we want Western Maine to become built up like concrete cities, where the wild habit die off? Please keep our entrance sign reading "Maine-the way life should be". Thank you, Elizabeth Hurd
