TO: Maine Department of Environmental Protection

The support of Nordic Aquafarms, the foreign, industrial fish factory proposed to be constructed in mid-coast Maine is environmentally untenable. This factory, which would not be permitted under Norwegian environmental laws, will dramatically raise our state's carbon footprint and pollute the Penobscot Bay, destroy wetlands and wildlife habitat, and deplete surrounding aquifers. The Nordic factory will add up to 759,000 metric tons of carbon dioxide equivalents to our air each year, the same as adding about 150,000 new cars to our roads.

Please, I implore you; do everything in your power to stop this horribly misguided factory. Thank you very much.
