

SECTION 20

Blasting

Section 20. Blasting

A. Narrative.

Anticipated blasting will be required as per the site drawings. The full extent of blasting will be determined once construction drawings have been developed. All blasting will be in full compliance with the guidelines set out in 38 M.R.S.A §490-Z (14) and M.R.S.A. Title 25, Chapter 318.

All blasting will be performed by a Maine State Licensed company or individual

Currently there are no inhabited or uninhabited buildings within 2000 ft of anticipated blast areas and no protected natural resources are likely to be affected.

Blasting will not occur in the period between sundown and sunrise the next day or in the period of 7:00 pm and 7:00 am, whichever is greater.

Sufficient stemming, matting or natural protection cover will be used to prevent fly rock conditions.

Records of all blasting will be documented.
