

Prepared by Maine Critical Areas Program. Silver Maple
windmill project will have multiple negative impacts on
our beautiful pristine pond and surrounding extensive
wetland complexes & dramatic scenic bluffs. Very
concerned not only scenic beauty but the destruction and
degradation natural eco-systems, impact on birds,
bats and wildlife. I am a lifelong outdoors woman
enjoy fishing, hunting, trapping and hiking this beautiful
acreage. Creation of this windmill project with my experience
will prohibit these activities. There is No Tangible
Benefits to include reduction of property value & quality
of life - "it's not the way life should be!"
