Good evening and thank you so much for the meeting tonight. My name is Linda Graban. I had written you a comment a few weeks ago but now I am not sure it was received, as I did not receive information about the meeting. It was my looking for something else on Clifton's web site that I came across the "notice" for this mtg. On a side note, Clifton clerks, and selectpersons are not very good at providing information for this type of mtg.

Anyway, could you let me know if you received my comments so I can send again if you did not. Also, the 1st question asked by Steven Mogul about real estate values is extremely important. I did a quick scan through the paper on the standards you had for is to look at and I believe the fact that the property values are impacted by the senic view they provide/ or hinder/devalue could be seen in B (page 2 and 3 and I believe several other sections as well. I am a licensed Real Estate Agent and the visual/senic impact of the windmills that are already there are significant. When thefirst 5 (pishah mtn) were being permitted I inquired at a real estate office in Lincoln and the economic/senic impact on real estate values was extremely significant in that area. I would love to talk with you, or at least make sure you received my prior email.

Thank you,
Linda Graban
