Section 8

Historic Sites

Section 8. Historic Sites

8.1 State Standards

Pursuant to the State's Site Law, applicants shall:

Submit information demonstrating that the proposed development will not adversely affect any historic sites, historic structures or archaeological sites.

8.2 Historic Sites Approach

The Applicant contracted with the Public Archaeology Laboratory ("PAL") to perform a historic architectural reconnaissance survey. PAL has performed these surveys for numerous wind projects in Maine, including those existing wind projects local to the Project.

8.3 Historic Sites Assessment

PAL conducted the Project's initial reconnaissance survey (the "Architectural Survey Report") in early 2022. The Architectural Survey Report identified properties that were at least 50 years old within the Project's Area of Potential Effects ("APE"). PAL reviewed 419 properties within the Project's APE that had been previously recorded by the Maine Historic Preservation Commission ("MHPC"). During the field survey, PAL surveyed 663 additional resources. PAL applied the findings from the visual assessment (Section 30) to the survey to assess the potential effect of the Project on surveyed resources. The Architectural Survey Report is Exhibit 8-1.

The Project submitted the Architectural Survey Report to MHPC while simultaneously initiating the consultation process with MHPC.[1] MHPC responded in July 2022 requesting additional architectural information. In the July 2022 letter, MHPC also stated that "No archaeological properties will be affected by this undertaking." See attached letter Exhibit 8-2.

PAL, on behalf of the Applicant, responded to MHPC and provided additional information in August 2022. See attached letter and supporting documents in Exhibit 8-3.[2]

[1] MHPC assigned the project #1201-22

[2] Note: The Architectural Survey Report referenced in the cover letter in Exhibit 8-3 is the same report included as Exhibit 8-1.

In September 2022, MHPC concurred with PAL's finding and requested additional information. See attached letter Exhibit 8-4.

On October 5, 2022, PAL, on behalf of the Applicant, responded to MHPC and provided additional documentation. See attached letter and supporting documents in Exhibit 8-5.

MHPC concurred with PAL's findings of no adverse effect on historical properties on October 19, 2022. See attached letter Exhibit 8-6.

I. EXECUTIVE SUMMARY

Twin Energy LLC (TE) is proposing to develop the Twin Energy Wind Project (the Project), a three-turbine wind project in Rumford, Oxford County, Maine. The Project is south of the operational Record Hill Wind and RoxWind projects in in Roxbury, Oxford County, Maine. The proposed Project is within the area designated as expedited for permitting under the Maine Wind Energy Act (WEA).

The Public Archaeology Laboratory, Inc. (PAL) was contracted by TE to complete this historic architectural reconnaissance survey for the Project to identify properties that are at least 50 years of age within the Area of Potential Effects (APE) for the Project and assess effects on those properties that are listed or potentially eligible for listing in the National Register of Historic Places (National Register). Because no historic properties are in the vicinity of the construction limits of the Project, the Project's potential effects are limited to the possibility that it may cause changes to a historic property's setting due to visual impacts. The APE established to account for those potential effects includes the area within 5 miles of the turbine development and up to 8 miles for properties that have previously been listed or determined eligible for listing in the National Register that have potential views of the Project.

The methodology for conducting the historic architectural reconnaissance survey included research to identify previously inventoried properties in the APE and fieldwork to confirm the condition of previously documented properties and identify other potentially significant properties. During the research, PAL identified 419 properties within the Project APE that have previously been recorded in the Maine Historic Preservation Commission's (MHPC's) Inventory. Of those, 6 are listed in the National Register and 19 have previously been evaluated as National Register eligible by the MHPC. During the survey fieldwork, PAL surveyed an additional 663 resources. Of those additional resources, PAL recommends 6 properties comprising 18 individual resources as potentially eligible for listing in the National Register.

Since the Project's APE overlaps most of the RoxWind Project APE (MHPC No. 0300-18) for which a historic architectural reconnaissance survey was completed in 2018, the MHPC granted approval to conduct the Project's survey in a slightly different manner. Per communication with the MHPC on January 2, 2022, PAL resurveyed only those resources within both RoxWind's and the Project's APEs that are listed in or eligible for listing in the National Register (see **Section E. Survey Methodology** below).

PAL used the data gathered during the field survey and the findings of the visual assessment prepared by the Project's visual consultant (TJD&A 2022) to assess the potential effects of the Project on historic properties. On the basis of the results of the survey, PAL recommends that none of the historic properties identified during the survey will be directly affected by the Project. Of the 31 properties that are listed or eligible for listing in the National Register, 21 properties will have no views of the Project, and 10 will have partial views of the Project that are minimized by intervening vegetation, development, or topography. Many of these properties have existing distant views of RoxWind and Record Hill, but no properties will have open views of the Project. Changes to the long-distance views from these properties will not alter the qualities of their primary significance. On the basis of this assessment, PAL concludes that the Project will have no adverse effect on historic properties.

II. RESEARCH DESIGN AND BACKGROUND RESEARCH

A. Basis:

Describe the purpose of this survey. Identify the Federal or State regulations mandating this survey, or any Programmatic Agreements associated with this project.

This report presents the results of a historic architectural reconnaissance survey conducted for the proposed Project in Carthage and Weld in Franklin County and (alphabetically) Andover, Byron, Dixfield, Hanover, Mexico, Milton, Newry, Roxbury, and Rumford in Oxford County, Maine. The purpose of the survey was to identify historic properties (i.e., any building, site, structure, object, or district) listed or eligible for listing in the National Register within the Project APE and to assess the Project's potential to cause effects on the characteristics of significance that make those properties eligible for the National Register. The survey was conducted to assist TE in its application for certification to the Maine Department of Environmental Protection and its Application for a Department of the Army Permit from the U.S. Army Corps of Engineers (USACE).

B. Project Description/ Scope of Work:

Describe the underlying project, specifically citing the type of project and duration of project. Summarize planned or anticipated alterations to landscapes, buildings, structures, districts, objects or sites.

Twin Energy LLC (TE) has designed and proposes the siting of a three-turbine wind energy facility in Rumford, Oxford County, Maine. The Project will be on South Twin Mountain (elevation 1,900 feet [ft] to 2,156 ft), 0.85 miles south of the operational RoxWind Project, and within the area designated as expedited for permitting under the Maine Wind Energy Act (WEA). The Project location is immediately south of the border of Rumford and Roxbury, Maine.

Project components include three wind turbine generators (GE-6.1-158 or similar machines) with a nameplate capacity of approximately 6.1 megawatts (MW) each, access roads, overhead and underground collection lines, and laydown areas. The Project site will be accessed off Horseshoe Valley Road, through a shared use and easement agreement over the RoxWind access road. From there, a new road will be constructed connecting North Twin and South Twin. The interconnection route will follow the new road and then along the existing transmission line (south of the existing transmission corridor) interconnecting to an existing collector substation off State Route 120 in Roxbury.

The siting of individual turbines has taken into account the wind resource, site-specific topography, access road locations, proximity to wetlands and wildlife habitat, and other site conditions, including setback requirements. The proposed turbines have an 117-m hub height, a rotor diameter of 158 m, and a maximum tip of blade height of 196 m (approximately 643 ft). The turbines are controlled electronically so they will always face into the wind when operating.

An existing access road originating from Horseshoe Valley Road will be used to provide access to the Project. This road will then be extended along private property, connecting North Twin to South Twin. A ridgeline road along South Twin connecting each of the turbines has been designed to avoid wetlands and wildlife habitat and minimize cut and fill slopes. In most locations, the new access road and ridgeline road are screened by existing vegetation and will not be highly visible from outside the immediate area.

Power from the turbines will be collected in a series of 34.5 kilovolt (KV) collection lines and connect to an existing collector substation off Route 120 in Roxbury.

C. Area of Potential Effects:

1. On a USGS topographical map draw the outermost boundary of the area of potential effect in red. Label this line "Project APE". If necessary, additional topographic maps or overlays may be submitted showing the limits of each specific APE if more than one potential effect is present within the project area.

2. List all the potential effects associated with the above cited scope of work. Distinguish between direct and indirect effects when applicable.

In regulations governing Section 106 of the National Preservation Act, as amended, as the "geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character of or use of historic properties, if any such properties exist" (36 CFR 800.16(d)). The Project had the potential to cause both physical and visual effects to historic properties. Physical effects could be caused by a physical undertaking, alteration, or removal of a property from its physical location. Visual effects could be caused by a change in the character of a property's use or of physical features within a property's setting that contribute to its significance, and/or the introduction of visual or atmospheric elements that diminish the property's significant historic features (36 CFR 800.5(2)).

No historic properties are in the vicinity of the construction limits of the Project. The Project's potential effects are therefore limited to the possibility that it may cause changes to a historic property's setting due to visual impacts. The APE established to account for those potential visual effects includes the area within 5 miles of the turbine development and up to 8 miles where properties that previously have been listed or determined eligible for the National Register will have potential views of the Project.

3. Provide a narrative of how the geographical limit of each potential effect within the project area are established.

The APE for the Project includes the proposed wind turbine complex, construction laydown areas, associated facilities, and the larger area where the aboveground facilities have the potential to introduce new and incompatible elements that may alter the setting or other qualities of significance of historic properties (Figure 1a). To determine the locations where the constructed Project might be visible, PAL used a preliminary viewshed analysis prepared for the Project and drove all accessible roads within a 5-mile radius of the turbine locations. PAL indicated on the survey base map which roads did and did not have views of the Project. The APE was determined to be an irregularly shaped area, approximately 53,231 acres, extending at least 5 miles and up to 8 miles from the turbine locations where a property listed or evaluated as eligible for listing in the National Register is located. Approximately 47,000 acres of the APE overlap the APE for the RoxWind Project completed in 2018 (Figure 1b) (Andrade and Olausen 2018).

D. Survey Boundaries:

1. Draw the boundaries of the survey on the topographic map in blue or black and label this line "Survey Boundaries." The boundaries of a survey map include portions of a property that lie outside the APE.

2. Describe the limits of the surveyed area. The survey boundary may be larger then the APE. Make reference to geographic landmarks, addresses or political boundaries. Utilize reasonable demarcations – tree lines, back lots.

The Project survey area totaled approximately 133,082 acres, which encompasses the area within an 8-mile radius of the proposed turbine development and includes the APE. This survey area is based on the Maine Wind Energy Act (35-A MRSA § 3401) and its specific regulations, which provide that determinations of effects on scenic resources, including historic properties, of national or state significance shall consider whether the wind project will cause unreasonable adverse effects. PAL drove all accessible public roads within the survey area and assessed potential views toward the Project from the identified historic resources.

E. Survey Methodology: *1. Describe background research method.*

The methodology for the reconnaissance survey was designed to identify all aboveground properties (including any districts, buildings, structures, objects, and sites) within the Project APE that are listed, evaluated as eligible, or potentially eligible for listing in the National Register. The survey was conducted in accordance with the *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation*, as amended (48 FR 44716–44742); the MHPC's *Above Ground Cultural Resources Survey Manual, Guidelines for Identification: Architectural and Cultural Landscapes, Federal and State Regulatory Project Review Specific* (December 2013); the National Park Service's (NPS's) *National Register Bulletin No. 24, Guidelines for Local Survey: A Basis for Preservation Planning* (NPS 1985); and the NPS's *National Register Bulletin No. 15, How to Apply the National Register Criteria for Evaluation* (NPS 1997).

As a result of a communication with the MHPC on January 2, 2022, PAL did not survey resources included in the 2018 RoxWind Architectural Survey Report and within the Twin Energy Wind APE evaluated as not eligible for listing in the National Register because the APE for the RoxWind Project and the APE for the Twin Energy Wind Project mostly overlap and the RoxWind Project was completed in a more recent timeframe. However, all properties over 50 years of age within the Twin Energy Wind APE that do not overlap with RoxWind APE were surveyed. All properties within the Project APE that overlap with the RoxWind APE are included in the Survey Matrix (included as an attachment to this report).

After additional communication with the MHPC on March 7, 2022, PAL continued numbering the resources from where RoxWind numbering left off instead of beginning with number 1 for individual resources and letter A for historic districts. Therefore, resources surveyed in the Project that were not included in the RoxWind survey begin with number 512 for individual properties and with letter D for historic districts. In addition, resources 1–8 and 438–484 from the RoxWind survey are outside the Twin Energy Wind Project APE and therefore are not included in the associated submittal products.

2. Describe field research method.

Two PAL architectural historians/surveyors conducted fieldwork for the reconnaissance survey on March 7–11, 2022. The fieldwork involved identifying all properties within the Project APE that does not overlap with the RoxWind APE that are at least 50 years old or were included in previous inventories and documenting information about the viewsheds from recorded properties toward the Project area. Properties previously listed or determined eligible for listing in the National Register within the overlapping Project and RoxWind APEs were surveyed according to the same MHPC’s survey methodology.

Each surveyed property was photographed using a high-resolution digital SLR camera. Data about the current condition and significant characteristics of each resource were recorded, and the information on the inventory forms for previously surveyed properties was verified. In compliance with the MHPC's survey methodology, unique sets of data were collected and recorded for

individual farmsteads, barns, and other buildings. All identified properties were marked on USGS base maps. Site plans depicting farmsteads or other complexes with multiple resources were hand-drawn on survey forms.

The surveyors drove all accessible public roads within the survey area, including unmarked, navigable gravel/dirt trails, and recorded all properties that met the criteria for inclusion in the survey that were visible from public rights-of-way. To ensure that no properties were overlooked, the surveyors added notes on the base maps to indicate which roads were traversed and which buildings were less than 50 years old. For roads that were gated or otherwise marked as private, current topographic maps and aerial images were used to verify the presence or absence of existing structures. Historic topographic maps were then used to determine whether any of these inaccessible properties contained resources at least 50 years old.

3. Did you undertake a file search at MHPC for NR or previously recorded properties?

Prior to any fieldwork, PAL conducted research to identify properties within the APE that are listed or evaluated as eligible for listing in the National Register or that have been recorded as part of the MHPC's Maine State Architectural Survey Program. PAL used the NPS's online National Register database and then visited the MHPC on March 7, 2022, to review and obtain copies of the National Register forms, relevant town files, MHPC inventory forms, and any reports for surveys previously conducted in the area. The National Register eligibility status of each property within the APE was noted.

III. SURVEY FINDINGS

A. Acres:

Provide the total number of acres within the survey boundaries.

The entire survey area encompasses approximately 133,082 acres and includes all or portions of the following towns in Carthage, and Weld in Franklin County and (alphabetically) Andover, Byron, Dixfield, Hanover, Mexico, Milton, Newry, Roxbury, and Rumford, in Oxford County, Maine.

B. Setting:

Provide a general overview of the setting, including topography, development, and landscape.

The Project is in Rumford, Oxford County, Maine. The proposed turbine complex spans the ridgeline of South Twin Mountain (2,156 ft) in the Twin Mountain Range in the White Mountains. Black Mountain is to the southwest (2,340 ft) and North Twin Mountain (2,150 ft) is to the northeast. The bodies of water in the APE are the Swift River, which extends generally north–south in the east portion of the survey area (east of the proposed turbine locations); the Androscoggin River (running east–west in the southern end of survey area); Ellis Pond (northwest of the proposed turbine locations); and a variety of smaller-scale ponds and streams/brooks. Most of the survey area is undeveloped and rural and consists of large expanses of dense deciduous and evergreen forests, winding rivers, freshwater lakes, and an undulating rocky terrain with an occasional cleared area of agricultural fields with associated farmstead development. State Route 17 (east of the proposed turbine locations) is the primary north–south transportation corridor between the north and south ends of the Project area, and State Route 120 (north of the proposed turbine locations) is the primary east–west transportation corridor

between the east and west ends of the survey area. Numerous secondary roads and unpaved roads or logging trails extend through the area.

A small neighborhood of seasonal cottages is at east end of Ellis Pond in Roxbury. The town centers of Mexico and Rumford are approximately 5 miles to the south of the Project site. These town centers are characterized by a dense grid of streets extending from U.S. Route 2, which follows Main Street through downtown Mexico and follows Lincoln Avenue and Hancock Street through downtown Rumford. The smaller villages of Carthage (to the east) and Andover (to the west) are 5–8 miles from the Project site in the survey area.

C. Number of Resources Recorded:

Count each individually recorded building, structure, object, or site. Do not include continuation sheets in this count.

PAL recorded a total of 1,082 properties (663 newly identified properties and 419 previously inventoried properties) containing a total of 1,340 resources (Figures 2a–2c). Of the total number of properties and resources, 333 properties (containing 464 resources) are within the overlapping APEs for the RoxWind and Twin Energy Wind projects.

The 663 newly identified properties contain a total of 771 resources: 2 districts, 636 houses, 76 garages, 17 barns/outbuildings, 3 governmental building, 4 schools, 11 commercial buildings, 1 mixed-use commercial/industrial building, 13 mixed-use commercial/residential buildings, 1 hospital, 1 medical building, 2 churches, 1 storage building, and 3 cemeteries.

D. Previously Inventoried Properties:

Address whether any of the resources had been previously surveyed. If so, how many, and how were these properties represented and evaluated within the current project?

The 419 previously inventoried properties included in the survey contain a total of 569 resources: 300 houses, 61 garages, 50 barns/outbuildings, 53 camps/summer cottages, 6 cemeteries, 29 commercial buildings, 10 farmsteads, 10 governmental/civic buildings, 4 religious building, 9 industrial buildings, 7 sheds, 2 schools, 1 wagon shed, 1 wellhouse, 1 storage building, 1 recreation/culture building, 2 war monuments, 1 health care building, 1 social building, 2 unknown use buildings, 6 bridges, 1 footbridge, 1 satellite communications site, 1 hydro station, 1 mill footbridge, 2 dams, 1 canal headgate, 2 hose houses, 1 penstock building, 1 auxiliary building, and 1 hotel. Of the 569 previously recorded resources, 84 are in recorded historic districts.

Of the 419 previously inventoried properties, 6 are listed in the National Register and 19 have been previously evaluated as eligible for listing in the National Register by the MHPC or another agency (see descriptions below). During the survey, PAL found that 3 previously inventoried resources have been demolished since they were recorded (Figures 3–10).

E. Types of Properties:

1. Summarize general trends within the project area: commercial, residential, urban, rural, etc.

The Project APE is composed of a primarily undisturbed natural landscape defined by large expanses of dense deciduous forest, winding rivers, freshwater ponds, a rocky terrain with glacial deposits, and low mountains. A linear north–south mountain range, at an elevation of 2,000–2,200 ft, extends through the middle of this landscape and stands approximately 1,000–1,500 ft higher than the developed areas. The Swift River winds southeast through the area into the town of Mexico where it empties into the Androscoggin River. The Swift River is characterized as a scenic, recreational destination that is notable for its falls, bedrock gorges, and history of gold deposits. The west side of the study area also contains scenic recreational landscapes, including Ellis Pond in Roxbury and Byron that is approximately 1.5 miles at its widest points.

Development in the Project APE is sparse and closely tied to the natural landscape. Clusters of seasonal cottages on compact lots line the edges of Ellis Pond, and several recreational camp buildings are near the river or along narrow dirt roads and trails. Residential and agricultural development is primarily along two state routes, which are the only local roads that provide through access. State Route 17 extends north from Mexico and continues along the east side of the Swift River through Roxbury into Byron, where it crosses the river before terminating at the north end of Oxford County. State Route 120 extends north from Rumford along the west side of the river, then continues west through Roxbury to State Route 5 in Andover.

The residential lots and farmsteads typically consist of several acres and most have views of the river or mountain landscape. Pockets of denser residential development are in the small village centers of Byron, Roxbury, and East Andover, which are accessible from Routes 17 and 120. Rumford and Mexico, in the southeast end of the APE and at the confluence of the Swift and Androscoggin rivers, contain densely developed downtowns that represent small urban centers with a mix of commercial, industrial, civic, and residential buildings.

2. Summarize the age, style, and condition of the resources within the project area.

The majority of the resources recorded during the survey are vernacular, wood-frame, residential buildings and outbuildings. The residential structures include primarily modest-sized single-family homes and seasonal cottages constructed ca. 1790–1977. The agricultural resources include several farmsteads, barns, workshops, and other outbuildings constructed in 1800–1955. Buildings with distinct architectural styles are rare in the more rural areas. Most have minimal exterior details and are in fair to good condition. Multiple examples of vernacular interpretations of Georgian, Federal, Greek Revival, Gothic Revival, Italianate, Queen Anne, Shingle, Colonial Revival, Craftsman, and Art Deco styles are present in the APE.

In contrast to the rural/agrarian areas, the densely developed downtown areas in Rumford and Mexico have a wide variety of resource types and styles. The residential structures are a mix of large-scale single-family homes, modest-sized single-family dwellings, and various multi-family working-class housing, including triple deckers, row houses, and apartment buildings, constructed primarily in the nineteenth and early twentieth centuries.

Although vernacular interpretations of the popular architectural styles from these periods predominate, several high-style examples of the Gothic Revival, Queen Anne, Shingle, and Colonial Revival styles exist.

Resources within the downtown areas also include industrial, commercial, religious, and civic buildings, most of which are clustered along the Androscoggin River and constructed with brick. Additional surveyed resource types are several nineteenth-century cemeteries with informal plans and church cemeteries, a couple of schools, a hydroelectric complex, industrial complexes, and bridges.

3. Describe in detail any eligible individual properties or historic districts.

Properties Listed in the National Register

The following six properties (two historic districts and four buildings) in the APE (all in Rumford) are listed in the National Register (see Figures 3a and 3b):

- Rumford Commercial Historic District, Lowell, Congress, River, Portland, Hartford, Exchange, and Bridge streets (Survey Map Nos. B, 241–273, see Survey Matrix);
- Municipal Building, 145 Congress Street (Survey Map No. 246; MHPC No. 377-0102)
- Mechanic Institute, 52–60 Congress Street (Survey Map No. 269; MHPC No. 377-0105);
- Rumford Falls Power Co. Building, 49 Congress Street (Survey Map No. 270; MHPC No. 377-0104);
- Strathglass Building, 23 Hartford Street (Survey Map No. 273; MHPC No. 377-0103); and
- Strathglass Park Historic District, Erchles, Lochness, and Urquhart streets and Claclan Place (Survey Map Nos. E, 1250–1299, see Survey Matrix).

The Rumford Commercial Historic District on Lowell, Congress, River, Portland, Hartford, Exchange, and Bridge streets (Survey Map Nos. B, 241–273; see Survey Matrix) is a dense commercial district on "the island" in Rumford with the Androscoggin River to the south and west and an industrial canal and mill site to the north and east (Photos 1–3; Figure 4). The island is a flat parcel of land within the district that is two blocks wide and three blocks long. The district includes the majority of the buildings on the island, except for those that lack architectural integrity on the outskirts of the district boundaries and the industrial buildings to the east and northeast.

The district consists of 33 buildings (29 contributing and 4 non-contributing). Four buildings in the district are listed in the National Register (see below for separate descriptions). The district's buildings are a visually cohesive group of commercial, governmental, and institutional buildings that were constructed between 1892 and 1967, with the majority constructed before 1935. Architectural styles include Italianate, Romanesque Revival, Beaux Arts, Colonial Revival, and Art Deco. The tallest buildings are five stories, and several are only one story. Imposing masonry buildings anchor most of the

corners of the main intersections of roads in the district. Three governmental buildings (the Post Office, Municipal Buildings, and the Fire Station) are in the northern end of the district. The Municipal Building's six-story clock tower is the tallest point in the district.

The Municipal Building at 145 Congress Street, Rumford (Survey Map No. 246; MHPC No. 377-0102) is a four-story (with a raised basement), five-bay-by-three-bay, steel frame building with brick walls and concrete trim (see Photo 1). It was designed and constructed in 1906 by Harry S. Coombs of Lewiston, Maine, in the Colonial Revival style. The building has an asphalt-shingle-clad hip roof and is topped with a clock tower and decorated with a deep, denticulated cornice between the upper second and third levels. A large rectangular ell extends from the rear (west) elevation of the building. The east (facade) elevation has a denticulated portico in the Doric order above the main, central entrance. A Palladian window and swag motif are above the entrance. Windows are a mix of original and replacement, consisting of primarily 12-over-16-light, double-hung wood sash in the second story and paired nine-over-nine, double-hung vinyl sash with a double transom in the first story, and paired six-over-six, double-hung vinyl sash in the basement level. Windows have brick trim, sills, and lintels with concrete keystones.

The Mechanic Institute at 52–60 Congress Street, Rumford (Survey Map No. 269; MHPC No. 377-0105) is a four-story, 13-bay-by-11-bay, steel-frame building with brick walls (Photo 4). It was designed and constructed in 1911 in the Neo-Classical Revival style by Miller and Mayo, a prominent Portland, Maine architecture firm. The building has a flat roof with a projecting, molded concrete cornice. It has brick walls with decorative concrete trim. The west (facade) elevation is dominated by a large, Doric colonnade at the second and third stories. Stores are in the first story and upper levels are used as a community center and offices. Windows are mostly replacement storefront windows and doors and one-over-one, double-hung original metal sash. Many of the window openings on the upper stories have been infilled.

The Rumford Falls Power Co. Building at 49 Congress Street, Rumford (Survey Map No. 270; MHPC No. 377-0104) is a two-story, nine-bay-by-nine-bay, steel frame building with brick walls (Photo 5). It was designed and constructed in 1906 in the Neo-Classical Revival style by Henry J. Hardenbergh, a notable New York City architect. The building has a flat roof with a denticulated concrete cornice. The two primary elevations (north and east elevations) are highly decorative and consist of buff brick exteriors with concrete decorative elements and trim. The west and south elevations are simple red brick walls with minimal decorative architectural elements. Entrances are at each corner of the north and east elevations. The entrance at the northeast corner of the building is recessed beneath a highly decorative engaged entry porch with round-arch openings. Windows are a mix of original and replacement storefront windows and one-over-one, double-hung, metal sash windows. The building originally had a parapet with concrete urns and a low false front with the name of the building in raised letters on it, but these elements were removed in the mid-twentieth century.

The Strathglass Building at 23 Hartford Street, Rumford (Survey Map No. 273; MHPC No. 377-0103) is a four-story, six-bay-by-seven-bay, steel-frame building with brick walls (Photo 6). It was designed and constructed in 1906

in the Neo-Classical Revival style by Stone, Carpenter, & Wilson, a notable architecture firm in Providence, Rhode Island. The building has a flat roof with a wide molded and denticulated cornice. It has brick walls with large, fluted, limestone, engaged Ionic columns separating the bays of the building and rests on a concrete foundation. The primary entrance is in the center of the south elevation beneath an elaborate round-arch decorative element. The building originally consisted of three stories with a concrete balustrade topped with decorative urns; however, the fourth story was added and the building was converted into a hotel ca. 1931 after a fire gutted the entire building. Windows and doors throughout the building are replacements. Windows on the first story have decorative, copper lintels and fabric awnings.

The Strathglass Park Historic District on Erchles, Lochness, and Urquhart streets and Claclan Place (Survey Map Nos. E, 1250–1299; see Survey Matrix) is a dense residential district on the hills above the west bank of the Androscoggin River in Rumford (Photos 7 and 8; Figure 5). Encompassing a roughly two-block area bounded by Lincoln Avenue on the north, Hancock Street on the east, York Street on the west, and Maine Street on the south, the district consists of 50 buildings, all of which are contributing. These buildings are a visually cohesive group of two-story brick duplexes that were designed by prominent New York-based architect Cass Gilbert and constructed by Hugh J. Chisholm in 1902 to provide housing for workers employed by his Oxford Paper Company. Architectural styles in the district include Shingle, Flemish Revival, and Queen Anne.

Properties Previously Determined or Evaluated as Eligible for Listing in the National Register by the MHPC or Other Agency
The following 19 properties in the Project APE have previously been evaluated as eligible for listing in the National Register by the MHPC or another agency:

- Farmstead, 1805 Roxbury Road, Roxbury (Survey Map No. 51–55; MHPC Nos. 376-0025-HFS, 376-0025, 376-0025a/376-0150b, 376-0026, 376-150a);
- Mitchell Farmstead, 816 Roxbury Road, Mexico (Survey Map No. 85–91; MHPC Nos. 278-0065-HFS, 278-0065, 278-0065a-d, h);
- Residence, 34 Penley Street, Mexico (Survey Map No. 730, MHPC No. 278–0048);
- Rumford Falls Paper Co. Historic District, Lowell and Canal streets, Rumford (Survey Map Nos. A, 232–240, 1375; MHPC Nos. 377-0090, 377-0091, 377-0269 – 0276, 377-0360);
- Rumford Falls Paper Co. Mill, 60 Lowell Street (Survey Map Nos. 239; MHPC No. 377-0091);
- Rumford Falls Paper Co. Office Building, 60 Lowell Street (Survey Map Nos. 240; MHCP No. 377-0090);
- Hancock-Somerset-Kennebec-Penobscot Street Historic District, Hancock, Somerset, Kennebec, and Penobscot streets, Rumford (Survey Map Nos. C, 274–312, MHPC Nos. 377-0293 – 0320);
- Hancock Apartments, 520 Hancock Street, Rumford (Survey Map No. 909, MHPC 377–010);
- Residence and Barn, 175 Essex Street, Rumford (Survey Map No. 1306, 1307; MHPC Nos. 377–0008, 3777–0008a);

- St. Athanasius-St. John the Baptist Church, 126 Maine Avenue, Rumford (Survey Map No. 1325; MHPC No. 377–0162);
- St. Barnabas Church, 71 Rumford Avenue, Rumford (Survey Map No. 1343; MHPC No. 377–0356);
- WWI Monument, Rumford Avenue, Rumford (Survey Map No. 1344; MHPC No. 377–0353);
- Residence, 55 Holyoke Avenue, Rumford (Survey Map No. 1363, MHPC No. 377–0150);
- Morse Bridge #2585, Bridge Street, Rumford (Survey Map No. 1370; MHPC No. 377–0351);
- Hartford Street Bridge #3638, Hartford Street, Rumford (Survey Map No. 1371; MHPC No. 377–0350);
- Chisholm Park Bridge #2990, Portland Street, Rumford (Survey Map No. 1372; MHPC No. 377–0352);
- High Bridge, South Rumford Road, Rumford (Survey Map No. 1373, MHPC No. 377–0290);
- Rumford Falls Hydroelectric Facility and Canal Historic District, Androscoggin River between South Rumford Road, Prospect Avenue, and Bridge Street, Rumford (Survey Map Nos. G, 1374–1382; MHPC Nos. 377–0002, 377–0362 – 067, 377–0088); and
- Kimball Farmstead, 63 Kimball Road, Rumford (Survey Map No. 501–507, MHPC Nos. 377–0348–HFS, 377–0348 - 0348e).

One of the above-listed properties, the Mitchell Farmstead at 816 Roxbury Road, Mexico, was documented in the Record Hill Wind Farm Project on Historic American Building Survey (HABS) forms in fulfillment of the Memorandum of Agreement (MOA) between the New England District, USACE, and the Maine Historic Preservation Commission regarding the Record Hill Wind Project.

The Farmstead at 1805 Roxbury Road, Roxbury (Survey Map Nos. 51–55; MHPC Nos. 376-0025-HFS, 376-0025, 376-0025a/376-0150b, 376-0026, 376-0150a) comprises a house, barn, cottage, and non-historic sheep shed (Photos 9 and 10). It is a one-and-one-half-story, five-bay-by-three-bay, wood-frame building constructed ca. 1870. The house has a metal-clad front-gable roof, clapboard-covered walls and a granite foundation. A brick chimney extends from the center ridgeline of the roof. The house has a rear ell, side ell, and dormers. A one-story, full-width porch extends from the southwest (facade) elevation. The main entrance is in the center of the facade and is flanked by two windows. Windows consist of mostly replacement, six-over-six, double-hung vinyl sash. The barn is northwest of the house. It was constructed ca. 1900 and is a vernacular, New England type barn. It is a two-and-one-half-story, four-bay-by-four-bay, rectangular, wood-frame building. It has a metal-clad front-gable roof, clapboard-covered walls, and rests on a granite foundation. It has a central entrance in its southeast (facade) elevation that consists of a vertical-board, interior-sliding barn door. The door is flanked by a window and a pedestrian-sized entrance with a vertical-board door is in the southernmost bay.

A ca. 1900 cottage is southeast of the house. It is a one-story, three-bay-wide, vernacular building. It has a metal-clad hip roof topped with a cupola. The walls are clad in wood shingle and the foundation is not visible. The primary entrance is in the northwest bay of the southwest (facade) elevation. A non-historic shed is southeast of the house and cottage.

The Mitchell Farmstead at 816 Roxbury Road, Mexico (Survey Map Nos. 85–91; MHPC Nos. 278-0065-HFS, 278-0065, 278-0065a-d, h) comprises a main house and side ell, a connected workshop, a large detached barn, two smaller detached barns, and one detached cottage (Photos 11 and 12). The silo and two of the cottages have been demolished since 2011. The farm was established ca. 1804. The main house and its connected outbuildings and dairy barn were built between 1840 and 1870, and the additional outbuildings were constructed between 1900 and 1930. The main house is a one-story, five-bay-by-three-bay, center hall and parlor plan, wood-frame building. It is designed as a Cape Cod cottage and has a side-gable roof, is clad in wood clapboards, and sits on a granite foundation. The south (facade) elevation is symmetrical with a center entrance flanked by two outer bays of single windows. Extending at a right angle from the west wall is a one-story, three-bay connector. The main complex terminated with a one-and-one-half-story, front-gable workshop. A one-story, enclosed, one-bay-by-three-bay porch extends from the east elevation and a one-story, full-width porch with simple narrow wood columns extends from the ell.

The farmstead has five outbuildings: the primary barn, two secondary barns, a connected shop, and one worker's cottage. The primary barn is north of the main house complex. It was built into the hill and the basement level on the west wall is exposed. It is a large, detached, rectangular, one-and-one-half-story, three-bay-by-twelve-bay, wood-frame barn. The detached, west-facing barn south of the main house is a rectangular, one-story, three-bay-by-two-bay wood-frame building. It has a lean-to attached as the east elevation, creating a saltbox roof that is clad in metal. The barn at the northeast corner of the property faces south and is at the end of the long, cleared path and is surrounded by dense vegetation. It is a rectangular, one-story, two-bay-by-one-bay, front-gable structure with no visible foundation. Connected to the side ell of the main house is a rectangular, one-and-one-half-story, two-bay-by-one-bay, front-gable workshop. The cottage on the property is south of the house. It is a rectangular, one-and-one-half-story, three-bay-by-two-bay, wood-frame, front-gable building. The farmstead complex has not been altered since 2018.

The Residence at 34 Penley Street, Mexico (Survey Map No. 730, MHPC No. 278–0048) is a one-and-one-half-story, three-bay-by-two-bay, wood-frame building erected ca. 1885–1890 in the Queen Anne style (Photo 13). The house has an asphalt-shingle-clad side-gable roof, clapboard covered walls and a brick foundation. A brick chimney extends from the center ridgeline of the roof, and a prominent front-facing cross gable projects from the roof above the first story on the southwest (facade) elevation. The cross gable contained paired windows framed by curved flanking walls. The house has a rear ell. A one-story, two-bay porch extends along the facade beneath the cross gable, which is ornamented with sawtooth trim. It has a cornice inlaid with a zigzag pattern above an arched spindle work frieze. The main entrance is in the northernmost bay beneath the porch and is flanked by two windows.

Windows consist of mostly replacement, one-over-one, double-hung vinyl sash.

The Rumford Falls Paper Co. Historic District on Lowell and Canal streets, Rumford (Survey Map Nos. A, 232–240, 1375; MHPC Nos. 377-0090, 377-0091, 377-0269 - 0276, 377-0360) is on the northeast tip of land known as "the island" in downtown Rumford (Photos 14 and 15; Figure 6). The Androscoggin River is to the north, east, and west of the district and a canal system and dam bring water to the facility from Androscoggin River to the south. The district's 11 resources (10 contributing and 1 non-contributing) consist of two historic paper mills, a mill footbridge, and the railroads and canal system that served them. It includes the late nineteenth-century Rumford Falls Paper Company and the early twentieth-century Oxford Paper Company. The district has not been altered since 2018.

The Rumford Falls Paper Co. Mill at 60 Lowell Street (Survey Map No. 239; MHPC No. 377-0091) is a four-story, 25-bay-by-8-bay, rectangular, brick building constructed in 1891–1892 with Italianate-style elements (see Photo 15). The building has not been altered since 2018.

The Rumford Falls Paper Co. Office Building at 60 Lowell Street (Survey Map No. 240; MHCP No. 377-0090) is immediately south of the Rumford Falls Paper Co. Mill (see Photo 15). It is a one-story, nine-bay-by-four-bay, rectangular, brick building constructed by 1894 with some Italianate architectural elements. The building has not been altered since 2018.

The Hancock-Somerset-Kennebec-Penobscot Street Historic District on Hancock, Somerset, Kennebec, and Penobscot streets and Androscoggin and Swift avenues, Rumford (Survey Map Nos. C, 274–312, MHPC Nos. 377-0293 – 0320) is a residential neighborhood in the northeast section of the downtown (Photo 16; Figure 7). Mountain Valley High School is to the north, the Swift River and Hancock Street are to the east, and a densely wooded area characterized by mature trees are to the south and west. This district consists of 39 resources, consisting of a mix of post-World War II single-family ranch, cape, and split-level residences and garages. All the buildings are vernacular in style, although some exhibit Colonial Revival decorative elements. Numerous buildings within the district possess replacement materials.

The Hancock Apartments at 520 Hancock Street, Rumford (Survey Map No. 909, MHPC No. 377–010) is a three-story, three-bay-by-eleven-bay, rectangular, wood-frame building erected ca. 1910 in the Colonial Revival style (Photo 17). The apartment building has a flat roof above a dentilled cornice and a wide entablature and asbestos-shingled walls with corner pilasters. The apartment building has a rear ell. Three-story, four-bay porches span the north and south (side) elevations adjacent to the rear ell. The main entrance is centered on the west (facade) elevation. The entrance is recessed beneath the second story and consists of a multi-light paneled wood door with flanked sidelights. Two-story pilasters topped by a dentilled entablature and a flat roof frame the entrance. Windows consist of replacement one-over-one, double-hung vinyl sash set in plain wood surrounds. The paired round arched windows on the third story have molded wood lintels with keystones and are framed by pilasters. The building rests on a parged foundation.

The Second A. E. Morrison Residence and Carriage House at 175 Essex Street, Rumford (Survey Map No. 1306, 1307; MHPC Nos. 377–0008, 3777–0008a) is a Colonial Revival style, two-and-one-half-story, three-bay-by-four-bay, brick house built in 1905 (Photos 18 and 19). It has an asphalt-shingle-clad hip roof with a modillioned cornice above a wide entablature. A brick chimney pierces the southwest roof slope, and gabled dormers are centered on the southeast (facade), northeast, and northwest (rear) elevations. The walls are in running-bond brick with brick corner pilasters and rest on a concrete foundation. The facade has a segmentally arched central entrance with a Colonial Revival-style surround, is symmetrical and houses a triple window in the middle bay on the second story above the entrance flanked by single windows to the east and west. A one-story, one-bay, flat-roof, circular porch with Tuscan columns shields the entrance. Fenestration is a mix of double-hung, two-over-two original wood sash and one-over-one, replacement wood sash windows, with some fixed four-light and multi-light casement wood sash windows. All the windows have splayed brick lintels with stone keystones and hammered granite sills above lower brick dropped tab sills.

Northeast of the house is a one-and-one-half-story, two-bay-by-two-bay, wood-frame carriage house. It has an asphalt-shingle-clad hip roof and wood clapboard walls that rest on a brick foundation. A cupola projects from the center ridgeline, and a front-cross gable pierces the roof on the southeast (facade) elevation. An overhead six-light panel garage door occupies the eastmost bay on the facade on the first story beneath a vertical wood hayloft door. Two windows sit west of the entrances. Fenestration consists predominantly of double-hung, six-over-six wood sash.

St. Athanasius-St. John the Baptist Church at 126 Maine Avenue, Rumford (Survey Map No. 1325; MHPC No. 377–0162) is a three-story, three-bay-by-six-bay, steel-frame church (Photo 20). Begun in 1905, the church was completed in 1925–1928 in the High Victorian Gothic style. It has an asphalt-shingle-clad gable-front roof above a corbelled brick cornice. The walls are running-bond red brick interspersed with brick buttresses and rest on a granite foundation. The main entrance is centered on the southeast (facade) elevation in an enclosed porch. It consists of double-leaf replacement metal doors set within a pointed arch Gothic Revival limestone surround and surmounted by a transom. A large pointed arch stained-glass window with a central rose window pattern occupies the second and third stories above the main entrance. Two towers containing secondary entrances with pointed arch Gothic Revival limestone surrounds flank the main entrance to the east and west. Stained-glass windows are in the first story on all four elevations. All windows have pointed arch limestone surrounds. A rear ell extends from the northwest (rear) elevation of the church.

St. Barnabas Church at 71 Rumford Avenue, Rumford (Survey Map No. 1343; MHPC No. 377–0356) is a one-story, one-bay-by-seven-bay, concrete-frame church built in 1903–1905 in the Tudor Revival style (Photo 21). It has an asphalt-shingle-clad gable-front roof and walls and buttresses finished with rubblestone. A spire extends from the center ridgeline above the transept. The main entrance is centered on the southeast (facade) elevation and consists of double-leaf vertical plank wood doors with iron hinges set beneath a transom. Side ells project from the northeast and southwest elevations, and

the L-shaped rubblestone staircase on the southeast (facade) elevation was added ca. 1925. Fenestration primarily consists of fixed diamond-pattern leaded-glass sash windows with wood storms.

The WWI Monument on Rumford Avenue, Rumford (Survey Map No. 1344; MHPC No. 377–0353) is a rough-cut granite marker with a bronze plaque erected in 1930 (Photo 22). It occupies Memorial Green, a grass circle formed by the intersection of Rumford Avenue and Penobscot and Portland streets, and bears an inscription dedicating the adjacent Chisholm Park Bridge to World War I veterans.

The Residence at 55 Holyoke Avenue, Rumford (Survey Map No. 1363, MHPC No. 377–0150) is a one-and-one-half-story, two-bay-by-two-bay, vernacular, wood-frame building built ca. 1920 (Photo 23). It has an asphalt-shingle-clad gable-front roof and vinyl-clad walls on a rusticated concrete-block foundation. A brick chimney projects from the center roof ridgeline. The dwelling has a rear ell. The main entrance is on the east elevation of the enclosed full-width porch that spans the north (facade) elevation beneath a hip roof. Fenestration primarily consists of replacement one-over-one, double-hung vinyl sash.

The Morse Bridge #2585 on Bridge Street, Rumford (Survey Map No. 1370; MHPC No. 377–0351) is a two-span, 285-ft-long bridge consisting of a 230-ft-long, three-hinge, steel-tied thru-arch main span erected in 1935 and a 55-ft-long, steel stringer approach span built in 1937–1938 supported by concrete abutments and a concrete pier (Photo 24). It carries Bridge Street, a two-lane asphalt road on a concrete deck supported by steel H-section hangers, and two cantilevered concrete sidewalks enclosed by concrete balustrades across the Androscoggin River.

The Hartford Street Bridge #3638 on Hartford Street, Rumford (Survey Map No. 1371; MHPC No. 377–0350) is a two-span, 174-ft-long reinforced concrete deck arch bridge with paneled spandrel walls built ca. 1915 (Photo 25). The bridge is supported by concrete abutments and a concrete pier. It carries Hartford Street, a two-lane asphalt road, and two concrete sidewalks enclosed by metal pipe railings with bar fill across the Androscoggin River Canal.

The Chisholm Park Bridge #2990 on Portland Street, Rumford (Survey Map No. 1372; MHPC No. 377–0352) is a 16-span, 784-ft-long bridge consisting of three reinforced concrete open spandrel arch main spans flanked by T-beam approach spans built in 1929 (Photo 26). The arch spans have three ribs and spandrel columns with arch soffits that support concrete floor beams and a slab deck. The T-beam spans have arched fasciae beams. The bridge carries Portland Street, a two-lane asphalt road, and two cantilevered bracketed concrete sidewalks enclosed by concrete balustrades with raised panel posts across the Androscoggin River.

The High Bridge on South Rumford Road, Rumford (Survey Map No. 1373, MHPC No. 377–0290) is a single-span, 205-ft-long, rivet-connected Camelback thru truss bridge built in 1951 that is supported by ashlar abutments with concrete extensions and caps (Photo 27). It carries South Rumford Road, a two-lane asphalt road, across the Androscoggin River on a

concrete deck supported by rolled section floor beams and stringers. Two-high rail channel railings enclose the roadway.

The Rumford Falls Hydroelectric Facility and Canal Historic District on the Androscoggin River between South Rumford Road, Prospect Avenue, and Bridge Street, Rumford (Survey Map Nos. G, 1374–1382; MHPC Nos. 377–0002, 377–0362 - 0367, 377–0088) spans both sides of the Androscoggin River between Bridge Street and South Rumford Road (Photos 28–30; Figure 8). The National Register-listed Rumford Commercial Historic District is to the north, the Rumford Falls Trail is to the east, and Prospect Avenue is to the west. The eligible district's eight resources (all contributing) consist of the early twentieth-century Rumford Falls Hydro Station (see Photo 22), Upper Falls Power Station (see Photo 23), a late nineteenth-century dam, an early twentieth-century dam, portions of a late nineteenth-century canal system, and three auxiliary buildings associated with the hydropower plant. All the buildings are vernacular in style, although the Upper Falls Power Station has some Romanesque Revival decorative elements.

The Kimball Farmstead at 63 Kimball Road, Rumford (Survey Map No. 501–507, MHPC No. 377-0348-HFS – 0348e) consists of a house and five barns (Photos 31–33). The house is a two-and-one-half-story, five-bay-by-three-bay, wood-frame building constructed ca. 1840 in the Greek Revival style. A two-story, three-bay-by-three-bay ell extends from the north elevation of the house. The house has a modern metal-clad front-gable roof with a wide molded trim, gable returns, deep boxed eaves, and a wide molded entablature. Two brick chimneys extend from the east roof slope of the main block of the house. The walls are clad in wood clapboard with simple corner pilasters and the foundation of the main block is not visible. The primary entrance is in the center of the south (facade) elevation of the main block of the house beneath a one-story, full-width, hip-roof porch with Queen-Anne elements, including decorative brackets and carved balusters. The entrance is composed of a partially glazed paneled wood door and wood screen door. A secondary gable-roof, one-story, partial-width porch extends across the east elevation of the main block and rear ell. Windows primarily consist of two-over-two, double-hung, original wood sash with original wood sills and crown lintels.

An attached two-and-one-half-story, two-bay-by-three-bay, wood-frame, English-style barn (Barn 1) constructed ca. 1840 is attached to the northwest corner of the rear ell of the house. A large complex of connected barns is west of the house. East of the house at the northern extent of the barn complex is a one-and-one-half-story, two-bay-by-two-bay, wood-frame barn (Barn 2) constructed ca. 1840. Connected to the southwest corner of Barn 2 is a one-and-one-half-story, two-bay-wide, long, rectangular wood-frame barn (Barn 3) constructed ca. 1850. Connected to the south elevation of Barn 3 is a two-and-one-half-story, two-bay-by-two-bay, wood-frame barn (Barn 4) constructed ca. 1850. Between the south elevation of Barn 4 and the north elevation of Barn 5 is a single, clapboard-sheathed wall with a rectangular entry gated by a modern metal, swinging gate. Barn 5, at the southern extent of the barn complex, is the largest of the agricultural buildings. It is a four-story, three-bay-by-twelve-bay, wood-frame, New England style, high-drive bank barn with Queen Anne architectural elements constructed ca. 1897. The complex has not been altered since 2018.

Properties Recommended Eligible for Listing in the National Register
PAL recommends the following six newly identified properties in the Project APE as eligible for listing in the National Register (see Figures 3a and 3b):

- Mexico Congregational Church, 163 Main Street, Mexico (Survey Map No. 659);
- Hancock Street Housing Historic District, Hancock Street, Rumford (Survey Map Nos. D, 918-926);
- Residence, 125 Franklin Street, Rumford (Survey Map No. 1039);
- George and Edith Stratton Pettingill Residence, 347 Pine Street, Rumford (Survey Map No. 1118, MHPC No. 377–007);
- First Baptist Church, 112 Washington Street, Rumford (Survey Map No. 1227); and
- Somerset Street Residential Historic District, Somerset Street, Rumford (Survey Map Nos. F, 1300-1304).

The Mexico Congregational Church at 163 Main Street, Mexico (Survey Map No. 659) is a one-and-one-half-story, three-bay-by-three-bay, wood-frame building constructed in 1903–1904 in the Shingle Style (Photo 34). It has an asphalt-shingle-clad cross-gable roof and wood shingled walls that rest on a brick foundation with granite quoins. Gable returns and pediments enclose the gable ends of the roof. A three-story bell tower topped by a pyramidal hip roof is at the southeast corner of the building, and an exterior brick chimney is on the northwest (side) elevation. The main entrance occupies the first story of the bell tower. It consists of a paneled wood door with leaded-glass lights flanked by leaded-glass sidelights and shielded by a one-bay, pedimented gable-front porch. Fenestration on the main block consists of a mix of fixed and operable stained-glass windows set in typical rectangular openings and pointed arch openings. An addition, constructed in 1963, extends from the northwest (side) elevation.

The Hancock Street Housing Historic District on Hancock Street, Rumford (Survey Map Nos. D, 918–926) is a small residential district on the east side of Hancock Street on a hill above the west bank of the Androscoggin River (Photos 35–37; Figure 9). Spanning a roughly two-block area bound by Essex Avenue on the north, the rear property lines of the buildings on Waldo Street on the east, Hancock Street on the west, and Maine Avenue on the south, the district consists of nine buildings, all of which are contributing. The district's buildings are a visually cohesive group of two- and three-story brick apartment buildings erected ca. 1900 in the Classical Revival style. The buildings have a mix of stepped brick belt courses and quoin-patterned or plain corner pilasters. All the buildings have flat roofs with deep overhanging eaves supported by stepped brick or dentiled and Greek-key patterned frieze with cast stone cornices and partial-width porches supported by Doric, Corinthian, or square paneled columns on their southeast (facade) elevations. Many of the porches retain decorative cornices and trim elements and some of the buildings have decorative patterned brickwork on the facades. Fenestration consists mostly of replacement one-over-one vinyl sash windows with cast stone sills and splayed lintels.

The Residence at 125 Franklin Street, Rumford (Survey Map No. 1039) is a two-and-one-half-story, three-bay-by-two-bay, wood-frame building erected ca. 1890 in the Queen Anne style (Photo 38). It has a metal-clad side-gable roof and wood clapboard and wood shingle-covered walls. An exterior brick chimney is on the northeast elevation, and a brick chimney projects from the center roof ridgeline. A two-story, one-bay-by-one-bay, front-facing cross gable with a bay window on the first story extends from the northwest (facade) elevation. Full-width porches span the northwest (facade) and the southeast (rear) elevations. They are recessed beneath the main roofline and supported by turned wood posts with spindlework frieze. Decorative elements include geometric cut wood vergeboard and sunburst pattern cut wood panels at the gable end above the porches. Fenestration consists predominantly of double-hung, nine-over-nine wood sash with multi-colored panes. Neither the main entrance nor the foundation is visible.

The George and Edith Stratton Pettingill Residence at 347 Pine Street, Rumford (Survey Map No. 1118, MHPC No. 377–0007) is a ca. 1904 Classical Revival-style, two-and-one-half-story, three-bay-by-two-bay, wood-frame house (Photo 39). It has an asphalt-shingle-clad pedimented side-gable roof with modillioned and bracketed eaves and cornice above a wide molded entablature. Three pedimented gable dormers pierce the roof on the southeast (facade) elevation adjacent to an interior brick chimney. The walls are clad in wood clapboard with corner Tuscan pilasters. The building rests on a brick foundation. The facade has a central entrance framed by sidelights and sheltered by a one-story, one-bay, flat-roof porch supported by paired Tuscan columns. A balustrade composed of turned wood posts originally enclosed the porch roof, but this has been removed. The porch also originally extended the full width of the facade, but the bays to the east and west of the entrance have been removed. Two windows with stained-glass transoms flank the entrance, and paired windows topped by a swan-neck pediment with a stepped base and an urn sit above the entrance on the second story. A port-cochere extends from the northeast elevation, and a large rear ell extends from the northwest (rear) elevation. Windows are predominantly a mix of original double-hung, one-over-one and two-over-two wood sash with crown and plain wood lintels.

Northeast of the house is a one-story, three-bay-by-one-bay, wood-frame garage. It has an asphalt-shingle-clad side-gable roof and wood clapboarded walls with corner Tuscan pilasters. A cupola extends from the roof center ridgeline. Three four-light paneled wood garage doors pierce the northeast (facade) elevation. Fenestration consists of double-hung, two-over-two wood sash.

The First Baptist Church at 112 Washington Street, Rumford (Survey Map No. 1227) is a one-story, eight-bay-by-five-bay, irregularly shaped, wood-frame building constructed in 1902 in the Shingle style (Photo 40). It has an asphalt-shingle-clad front-gable roof with hip-roof transepts and wood clapboard-covered walls resting on a granite ashlar foundation. An apse with a rounded end extends from the southeast (side) elevation. The front-facing gable on the southwest (facade) elevation is clad with wood shingles at the attic level above a bracketed cornice. It sits adjacent to a three-and-one-half-story, one-bay-by-one-bay, wood-shingled bell tower topped by a pyramidal hip roof with a bracketed cornice. The main entrance is recessed within an

arched opening in the facade's south bay of the bell tower. It consists of double-leaf, paneled wood doors surmounted by a transom. The building has a two-story addition to the northeast (rear) elevation. Fenestration consists of a mix of single and paired square and elongated rectangular fixed sash and triple arched fixed sash containing stained glass on the first story and paired fixed two-light wood sash on the basement level of the apse.

The Somerset Street Residential Historic District on Somerset Street, Rumford (Survey Map Nos. F, 1300–1304) is a small residential district on the east side of Somerset Street on a hill above the west bank of the Androscoggin River (Photos 41 and 42; Figure 10). Spanning a one-block area bound by Maine Avenue on the north, the rear property lines of the buildings on Hancock Street, Somerset Street on the west, and Rumford Avenue on the south, the district contains five buildings, all of which are contributing. The buildings (a single duplex flanked by two single-family dwellings on both the north and south) are a visually cohesive group of two-story brick dwellings constructed ca. 1900 in the Victorian Eclectic style. All the buildings have asphalt-shingle-clad hip roofs with deep overhanging eaves supported by wood brackets. Two bracketed gabled dormers pierce the roof on the northwest or southeast (side) elevations of the single-family dwelling on either side of a brick chimney. Paired brick belt courses wrap around each building above the first story. The main entrances consist of half-light, paneled wood doors surmounted by pedimented and bracketed hoods. Fenestration consists primarily of replacement double-hung, one-over-one vinyl sash set in single or paired rectangular openings with granite sills. The first-floor windows have brick dropped tab lintels. The buildings rest on granite ashlar foundations.

F. NR Eligibility:

1. Address resource integrity, NR criteria, area of significance and period significance.

Properties Listed in the National Register

The following six properties (two historic districts and four buildings) in the Project APE are listed in the National Register:

The Rumford Commercial Historic District (Survey Map Nos. B, 241–271; see Survey Matrix) is listed in the National Register (March 2017) under Criteria A and C at the local level in the areas of Community Planning and Development, Commerce, and Architecture. The downtown is one of only a few planned company towns in Maine. It was planned by the Rumford Falls Power Company, led by Hugh J. Chisholm, along with the nearby waterpower facilities, industrial mill sites (papermaking and other related industries), and residential neighborhoods. The downtown was constructed in several phases starting in the early 1890s. It is also the most intact remaining section of the historically dense and commercial downtown of Rumford. The period of significance is 1892 to 1967, the 50-year cut-off date at the time of the nomination.

The Strathglass Park Historic District (Survey Map Nos. E, 1250–1299) is listed in the National Register (1974) under Criteria A and C at the local level in the areas of Architecture, Landscape Architecture, Social/Humanitarian, and Urban Planning. Constructed in 1902 by industrialist Hugh J. Chisholm to house workers employed by his Oxford Paper Company, Strathglass Park

represents the early industrial paternalism of the company and the only planned development for worker housing in Rumford. Prominent New York-based architect Cass H. Gilbert, who is perhaps best known for designing the Woolworth Building in New York City, designed all the duplexes in the neighborhood. Chisholm laid out the streets and named the neighborhood after a river in Scotland. The nomination does not include a specific period of significance, but it presumably extends from 1902 to 1949, when Chisholm's Rumford Falls Realty Company sold the buildings into private ownership.

The Municipal Building (Survey Map No. 246; MHPC No. 377-0102) is listed in the National Register (1980) under Criteria A and C at the local level in the areas of Commerce and Architecture. In 1915, the town voted to appropriate $25,000 for the construction of a new municipal building. The Colonial Revival-style building was designed by Harry S. Coombs, a Lewiston, Maine, architect, and was completed in 1916 for a total cost of $95,000. The represents the success of the town in the early twentieth century following Hugh J. Chisholm's success with the paper processing industry of Rumford. The Municipal Building is a contributing building to the Rumford Commercial Historic District (see description above). With its six-story clock tower, the building is the tallest in the district.

The Mechanic Institute (Survey Map No. 269; MHPC No. 377-0105) is listed in the National Register (1980) under Criteria A and C at the local level in the areas of Commerce and Architecture. The building was constructed for the Rumford Falls Power Company as the location of a benevolent and educational association for its mill workers. It represents the early industrial paternalism of the company. The building was designed by Miller and Mayo, a prominent Portland, Maine, architecture firm. It housed stores on the ground level and the association's office spaces, a gymnasium, meeting hall, and a reading room on the three upper stories. The building is now in use as a community center. The Mechanic Institute is a contributing building to the Rumford Commercial Historic District (see description above).

The Rumford Falls Power Co. Building (Survey Map No. 270; MHPC No. 377-0104) is listed in the National Register under Criteria A and C at the local level in the areas of Commerce and Architecture. The building was constructed in 1906 by the Rumford Falls Power Company for use as stores on the first level and offices on the upper levels. It was designed by Henry J. Hardenbergh, a notable New York City architect who also designed the Copley Plaza in Boston, Massachusetts. The Rumford Falls Power Co. Building is a contributing building to the Rumford Commercial Historic District (see description above).

The Strathglass Building (Survey Map No. 273; MHPC No. 377-0103) is listed in the National Register (1980) under Criteria A and C at the local level in the areas of Commerce and Architecture. The building was constructed in 1906 for Hugh J. Chisholm, the leader of the Rumford Falls Power Company and the industrial development of the town. The building was named after the river in Scotland that ran through the ancestral estate of Chisholm. The Strathglass was originally designed as a commercial building to house multiple stores, the first of which were the E. K. Day Company and the G. A. Peabody Company stores. In 1931, a fire gutted the three-story building, resulting in its conversion to a hotel on the upper floors and stores on the first floor and the

construction of a fourth story. The building was designed by Stone, Carpenter, & Wilson a notable Providence, Rhode Island, architecture firm. It was considerably altered after the fire and has some modern alterations. The Strathglass Building is a contributing building to the Rumford Commercial Historic District (see description above).

Properties Previously Determined or Evaluated as Eligible for Listing in the National Register by the MHPC or Other Agency

The following 17 properties (including two historic districts) in the Project APE were previously determined or evaluated as eligible for listing in the National Register:

The Farmstead at 1805 Roxbury Road, Roxbury (Survey Map No. 51–55; MHPC No. 376-0025-HFS, 376-0025, 376-0025a/376-0150b, 376-0026, 376-150a) was evaluated as eligible for listing in the National Register by the MHPC (2008) under Criteria A and C at the local level in the areas of Agriculture, Community Development, and Architecture. The farmstead demonstrates Oxford County's increasing agricultural production in response to a growing market economy. The property possesses significance in the area of Architecture for its representation of a typical nineteenth-century New England complex of connected and detached, multipurpose agricultural buildings. The property retains integrity of location, setting, design, materials, workmanship, association, and feeling as a late nineteenth-century rural residence and barn.

The Mitchell Farmstead at 816 Roxbury Road, Mexico (Survey Map No. 85–91; MHPC Nos. 278-0065-HFS, 278-0065, 278-0065a-d, h) was evaluated as eligible for listing in the National Register by the MHPC (2008) under Criteria A and C at the local level in the areas of Agriculture, Community Development, and Architecture. It derives its historic significance for its association with the settlement and subsequent nineteenth- and early twentieth-century agricultural development of Mexico, Maine. The Mitchell family continuously occupied and developed the property as a mixed-use farm for more than 150 years during a pivotal period of growth in Maine's agricultural industries. The farmstead demonstrates Oxford County's increasing agricultural production in response to a growing market economy. The property possesses significance in the area of Architecture for its representation of a typical nineteenth-century New England complex of connected and detached, multipurpose agricultural buildings. The house is also an important local expression of the regionally dominant Cape Cod building type, which was developed by settlers in direct response to the harsh environment. The property retains integrity of location, setting, design, materials, workmanship, association, and feeling as a mid-nineteenth-century, multi-generation farmstead.

The Residence at 34 Penley Street, Mexico (Survey Map No. 730, MHPC No. 278–0048) was evaluated as eligible for listing in the National Register by the MHPC (2003 and 2006) under Criterion C at the local level in the area of Architecture as an example of a late nineteenth-century Queen Anne-style dwelling. The property retains integrity of location, setting, design, workmanship, association, and feeling. Alterations to the house include roof replacement and some window replacement.

The Hancock-Somerset-Kennebec-Penobscot Street Historic District on Hancock, Somerset, Kennebec, and Penobscot streets and Androscoggin and Swift avenues, Rumford (Survey Map Nos. C, 274–312, MHPC Nos. 377-0293 – 0320) was evaluated as eligible for listing in the National Register by the MHPC (2018) under Criterion A at the local level in the area of Architecture as an example of a post-World War II suburban subdivision consisting of a mix of single-family ranch, cape, and split-level residences.

The Hancock Apartments at 520 Hancock Street, Rumford (Survey Map No. 909, MHPC No. 377–010) was evaluated as eligible for listing in the National Register by the MHPC (ca. 1993) at the local level under Criterion C in the area of Architecture as an example of an early twentieth-century Colonial Revival-style apartment building. The property retains integrity of location, setting, design, materials, workmanship, association, and feeling. Alterations to the building include roof replacement and some window replacement.

The Rumford Falls Paper Co. Historic District on Lowell and Canal streets, Rumford (Survey Map Nos. A, 232–240, 1375; MHPC Nos. 377-0090, 377-0091, 377-0269 – 0276, 377-0360) was evaluated as eligible for listing in the National Register by the MHPC (2012) under Criteria A and C at the state level in the areas of Industry and Architecture. The complex contains 10 resources (9 contributing and 1 non-contributing) consisting of 2 historic paper mills and the railroads and canal system that served them. It includes the earliest mill in the complex (the Rumford Falls Paper Company) and its associated railroads and canals. The Rumford Falls Paper Co. was established in 1891 to produce newspaper, sulphite wallpaper, and wood pulp and paper through the grinding method. By the early twentieth century, the property was known as the Oxford Paper Co. The district also includes the Oxford Paper Company Mill (see below), which was constructed in 1901 and 1902. The district represents an important industrial complex that led to the development of Rumford as an industrial town and contributed to the papermaking industry in Maine. The period of significance for the district is 1891 to 2012. Two buildings within the proposed district were evaluated as individually eligible for listing in the National Register by the MHPC. The district retains integrity of location, setting, feeling, and association. The integrity of design and materials has been compromised through the construction of new buildings and alterations to existing buildings.

The Rumford Falls Paper Co. Mill at 60 Lowell Street, Rumford (Survey Map No. 239; MHPC No. 377-0091) was evaluated as eligible for listing in the National Register by the MHPC (2009) under Criteria A and C at the local level in the areas of Industry and Architecture as an example of the success and importance of the Rumford Falls Paper Co. in the development of Rumford as a town and of papermaking in the area and as an example of late nineteenth-century paper mill buildings.

The Rumford Falls Paper Co. Office Building at 60 Lowell Street, Rumford (Survey Map No. 240, MHCP No. 377-0090) was evaluated as eligible for listing in the National Register by the MHPC (2009) under Criteria A and C at the local level in the areas of Industry and Architecture as an example of the success and importance of the Rumford Falls Paper Co. in the development of

Rumford as a town and of papermaking in the area and as an example of late nineteenth-century paper mill buildings.

The Second A. E. Morrison Residence and Carriage House at 175 Essex Street, Rumford (Survey Map No. 1306, 1307; MHPC Nos. 377–0008, 3777–0008a) were evaluated as eligible for listing in the National Register by the MHPC (2010) under Criteria A and C at the local level in the areas of Community Development Architecture as an example of the residential development in Rumford spurred by the success of the Rumford Falls Paper Co. and the papermaking industry in general and as an example of an early twentieth-century Colonial Revival-style dwelling and carriage house. The property retains integrity of location, setting, design, materials, workmanship, association, and feeling. Minor design and material alterations to the house include roof replacement and some window sash replacement.

St. Athanasius-St. John the Baptist Church at 126 Maine Avenue, Rumford (Survey Map No. 1325; MHPC No. 377–0162) was evaluated as eligible for listing in the National Register by the MHPC (2010) under Criteria A and C at the local level in the areas of Community Development and Architecture as an example of the institutional development that occurred in Rumford due to the success of the Rumford Falls Paper Co. and the papermaking industry in general and as an example of an early twentieth-century High Victorian Gothic-style church. Completed in 1928, the church served Rumford's French Canadian Catholic residents, who began to arrive in Rumford in large numbers in the 1890s and 1900s seeking employment in the papermaking industry. It is the largest and most architecturally significant Gothic Revival ecclesiastical structure in Oxford County.

St. Barnabas Church at 71 Rumford Avenue, Rumford (Survey Map No. 1343; MHPC No. 377–0356) was evaluated as eligible for listing in the National Register by the MHPC (2020) under Criteria A and C at the local level in the areas of Community Development and Architecture as an example of the institutional development that occurred in Rumford due to the success of the Rumford Falls Paper Co. and the papermaking industry in general and as an example of an early twentieth-century Tudor Revival-style church.

The Residence at 55 Holyoke Avenue, Rumford (Survey Map No. 1363, MHPC No. 377–0150) was evaluated as eligible for listing in the National Register by the MHPC (2016). However, the house does not possess distinctive characteristics of any particular type, style, construction, or time period. It lacks integrity of design, materials, and workmanship. Material alterations to the house include the enclosure of the front porch, roof replacement, and window sash replacement. PAL recommends that this building no longer be considered eligible for listing in the National Register.

The WWI Monument on Rumford Avenue, Rumford (Survey Map No. 1344; MHPC No. 377–0353) was evaluated as eligible for listing in the National Register by the MHPC (2020). It occupies Memorial Green, a grass circle formed by the intersection of Rumford Avenue and Penobscot and Portland streets and bears an inscription dedicating the adjacent Chisholm Park Bridge to World War I veterans.

The Morse Bridge #2585 on Bridge Street, Rumford (Survey Map No. 1370; MHPC No. 377–0351) was evaluated as eligible for listing in the National Register by the Maine Department of Transportation (MDOT) (2001) under Criterion C at the state level in the area of Engineering as a significant example of the work of the Maine State Highway Commission (MSHC) Bridge Division under the leadership of State Bridge Engineer Max Wilder. The division was in step with national trends when it adopted the tied thru arch bridge technology in the 1930s, and the Morse Bridge is the only identified three-hinge steel thru truss arch bridge in Maine. It retains integrity of location, setting, design, materials, workmanship, association, and feeling. Minor alterations include the replacement of the expansion joints and the raising and replacement of the portal struts in the 1980s.

The Hartford Street Bridge #3638 on Hartford Street, Rumford (Survey Map No. 1371; MHPC No. 377–0350) was evaluated as eligible for listing in the National Register by the MHPC (1996) and the MDOT (2001) under Criterion C at the at the local level in the area of Engineering as a significant example of a reinforced concrete closed spandrel arch bridge. Reinforced concrete arch bridges began appearing in Maine ca. 1902 and became increasingly common in the 1910s as Maine engineers and contractors adopted the technology for highway bridge construction. It retains integrity of location, setting, design, materials, workmanship, association, and feeling. Minor material alterations include the replacement of the original decorative metal lattice railings with pipe railings with bar fill and concrete posts in the 1940s.

The Chisholm Park Bridge #2990 on Portland Street, Rumford (Survey Map No. 1372; MHPC No. 377–0352) was evaluated as eligible for listing in the National Register by the MDOT (2001) under Criterion C at the state level in the area of Engineering as a significant example of the work of the MSHC Bridge Division. The open spandrel arch bridge type was introduced to the United States ca. 1907 and became widespread during the 1910s. The Chisholm Park Bridge is the only identified open spandrel arch bridge in Maine. It retains integrity of location, setting, design, materials, workmanship, association, and feeling. Material alterations include in-kind replacement of the balustrades and sidewalk brackets in the 1970s and the rehabilitation of the bridge in the 1990s.

The High Bridge on South Rumford Road, Rumford (Survey Map No. 1373, MHPC No. 377–0290) was evaluated as eligible for listing in the National Register by the MDOT (2018) under Criterion C at the local level in the area of Engineering as a rare example of a metal truss bridge in Maine and as a representative example of the Camelback truss type. It retains integrity of location, setting, design, materials, workmanship, association, and feeling. No material alterations have been documented.

The Rumford Falls Hydroelectric Facility and Canal Historic District on the Androscoggin River between South Rumford Road, Prospect Avenue, and Bridge Street, Rumford (Survey Map Nos. G, 1374–1382; MHPC Nos. 377–0002, 377–0362–0367, 377–0088) was evaluated as eligible for listing in the National Register by the MHPC (2021) under Criteria A and C at the local level in the areas of Industry and Architecture. The property is eligible for listing for its association with the Rumford Falls Power Company, which erected the complex in the early twentieth century to harness the power of the Rumford

Falls for the papermaking industry, and for its association with the development of Rumford. The district is made up of 9 resources (8 contributing and 1 non-contributing) consisting of a historic hydropower station and the dams and water system that powered it. The district retains integrity of location, design, materials, setting, feeling, and association. It is an important infrastructure complex that led to the development of Rumford as an industrial town and contributed to the papermaking industry in Maine. No period of significance has been identified.

The Kimball Farmstead at 63 Kimball Road, Rumford (Survey Map Nos. 501–507, MHPC No. 377-0348-HFS - 0348e) was evaluated as eligible for listing in the National Register by the MHPC (2018) under Criteria A and C at the local level in the areas of Agriculture and Architecture as an intact example of a nineteenth-century rural farmstead. The Kimball Farmstead derives its historic significance for its association with the nineteenth-century settlement and subsequent agricultural development of Oxford County, Maine. The farm is associated with the Kimball family, who settled in the Rumford Point area of the town by the early nineteenth century. The farm is an example of a connected farmstead, which has its primary structures connected through multiple ells and wings. The house, in particular, is an intact rural example of a Greek Revival-style farmhouse dating to the early to mid-nineteenth century that displays intact architectural elements, including wide molded trim and entablature, and crown lintels. The five barns are intact examples of nineteenth-century agricultural outbuildings. The property retains integrity of location, design, setting, workmanship, feeling, and association as a nineteenth-century farmstead in Rumford. The period of significance is ca. 1820 to 1968, the current 50-year cut-off date.

Properties Recommended Eligible for Listing in the National Register

As noted above, PAL recommends the following six newly identified properties in the Project APE as eligible for listing in the National Register (see Figures 3a and 3b):

The Mexico Congregational Church at 163 Main Street, Mexico (Survey Map No. 659) is recommended as eligible for listing in the National Register under Criteria A and C at the local level in the area of Community Planning and Development and in the area of Architecture as an intact example of an early twentieth-century Shingle-style church. Constructed in 1903–1904, the Mexico Congregational Church derives its historic significance from its association with the development of Rumford and Mexico as industrial towns during the late nineteenth and early twentieth centuries. The success of the papermaking industry, which historically represented one of the major drivers of Oxford County's economy, attracted thousands of new residents to Mexico and Rumford and helped to transform the areas around the Rumford Falls on the Androscoggin River from a rural, predominantly agricultural area into densely settled industrial towns.

The minimal alterations to the building include the replacement of the roof material and an addition to the side elevation. The church displays intact architectural elements, including a cross-gable roof, a square bell tower, cross gables, lancet stained-glass windows, wood-shingle cladding, and granite quoining. The property retains integrity of location, design, setting,

workmanship, feeling, and association as an early twentieth-century church in Mexico. The period of significance is ca. 1903 to 1972, the current 50-year cut-off date.

The Hancock Street Housing Historic District on Hancock Street, Rumford (Survey Map Nos. D, 918–926) is recommended as eligible for listing the National Register under Criteria A and C at the local level in the areas of Community Planning and Development, Social History, and Architecture as an intact row of multi-family dwellings designed in the Classical Revival style. The district derives its historic significance from its association with the development of Rumford as an industrial town and the establishment and expansion of the papermaking industry under the auspices of the Rumford Falls Paper Co. and the Oxford Paper Company during the late nineteenth and early twentieth centuries. The success of the papermaking industry, which historically represented one of the major drivers of Oxford County's economy, attracted thousands of new residents to Rumford and helped to transform the areas around the Rumford Falls on the Androscoggin River from a rural, predominantly agricultural area into a densely settled industrial town.

The district's multi-family dwellings were built to accommodate the employees of the papermaking industry and display intact architectural elements, including flat roofs with deep overhanging eaves, modillioned cornices, stepped brick belt courses, corner pilasters, and entrance porches. The minimal alterations to the buildings include the replacement roof material and some replacement window sashes. The district retains integrity of location, design, setting, workmanship, feeling, and association as an early twentieth-century residential district in Rumford. The period of significance is ca. 1900 to 1972, the current 50-year cut-off date.

The Somerset Street Residential Historic District on Somerset Street, Rumford (Survey Map Nos. F, 1300–1304) is recommended as eligible for listing in the National Register under Criteria A and C at the local level in the areas of Community Planning and Development, Social History, and Architecture as an intact row of single- and two-family dwellings designed in the Victorian Eclectic style. The district derives its historic significance from its association with the development of Rumford as an industrial town and the establishment and expansion of the papermaking industry under the auspices of the Rumford Falls Paper Co. and the Oxford Paper Company during the late nineteenth and early twentieth centuries. The success of the papermaking industry, which historically represented one of the major drivers of Oxford County's economy, attracted thousands of new residents to Rumford and helped to transform the areas around the Rumford Falls on the Androscoggin River from a rural, predominantly agricultural area into a densely settled industrial town.

The district is also has intact architectural elements such as hip roofs with deeply overhanging eaves supported by wood brackets, a brick belt course above the first story, and pedimented and bracketed hoods above the main entrances. The minimal alterations to the building include the replacement roof material and some replacement window sashes. The property retains integrity of location, design, setting, workmanship, feeling, and association as an early twentieth-century residential district in Rumford. The period of significance is ca. 1900 to 1972, the current 50-year cut-off date.

The First Baptist Church at 112 Washington Street, Rumford (Survey Map No. 1227) is recommended as eligible for listing in the National Register under Criteria A and C at the local level in the area of Community Planning and Development and in the area of Architecture as an intact example of an early twentieth-century Queen Anne-style church. Constructed in 1901, the First Baptist Church derives its historic significance from its association with the development of Rumford as an industrial town and the establishment and expansion of the papermaking industry under the auspices of the Rumford Falls Paper Co. and the Oxford Paper Company during the late nineteenth and early twentieth centuries. The success of the papermaking industry, which historically represented one of the major drivers of Oxford County's economy, attracted thousands of new residents to Rumford and helped to transform the areas around the Rumford Falls on the Androscoggin River from a rural, predominantly agricultural area into a densely settled industrial town.

The church displays intact architectural elements such as an asymmetrical facade, steeply pitched roof, square bell tower, cross gable, bracketed cornice, arched stained-glass windows, and wood clapboard and shingle siding. The minimal alterations to the building include the replacement roof material and some replacement window sashes. The property retains integrity of location, design, setting, workmanship, feeling, and association as an early twentieth-century church in Rumford. The period of significance is ca. 1901 to 1972, the current 50-year cut-off date.

The Residence at 125 Franklin Street, Rumford (Survey Map No. 1039) is recommended as eligible for listing in the National Register under Criterion C at the local level in the area of Architecture as an intact example of a late nineteenth-century Queen Anne-style dwelling. Constructed ca. 1890 as a duplex, it retains intact architectural elements of the Queen Anne style such as an asymmetrical facade, steeply pitched roof, cross gables, wood clapboard and shingle siding, decorative vergeboard, and porches. The minimal alterations to the building include the replacement roof material, the enclosure of the porch on the southeast (rear) elevation, and some replacement window sashes. The property retains integrity of location, design, setting, workmanship, feeling, and association as a late nineteenth-century dwelling in Rumford. The period of significance includes at least the years of construction.

The George and Edith Stratton Pettingill Residence at 347 Pine Street, Rumford (Survey Map No. 1117, MHPC No. 377–0007) is recommended as eligible for listing in the National Register under Criteria A and C at the local level in the area of Community Planning and Development and the area of and Architecture as an intact example of an early twentieth-century Colonial Revival-style dwelling. Constructed ca. 1904, it derives its historic significance from its association with the development of Rumford as an industrial town and the establishment and expansion of the papermaking industry under the auspices of the Rumford Falls Paper Co. and the Oxford Paper Company during the late nineteenth and early twentieth centuries. The house displays intact architectural elements, such as a symmetrical facade, central main entrance, entrance porch, gabled dormers, and pedimented second story windows. The minimal alterations to the building include the replacement of the roof material and the removal of the full-width porch and some decorative

woodwork from the facade. The property retains integrity of location, design, setting, workmanship, feeling, and association as an early twentieth-century dwelling in Rumford. The period of significance is ca. 1904 to 1972, the current 50-year cut-off date.

2. For a historic district provide a topographic map showing the limits of the proposed district illustrating street or landscape views and all non-historic or non-contributing resources.

V. FINDINGS OF EFFECTS

The Project is subject to review under the Maine Legislature's standards specific to wind power developments. State law provides that determinations of effect on scenic resources, including historic properties, of national or state significance, shall consider whether the wind project will cause unreasonable adverse effects (35-A MRSA §3452). In assessing whether an unreasonable adverse effect on scenic values may be caused by a project, the law requires that the siting authority consider

A. The significance of the potentially affected scenic resource of state or national significance;
B. The existing character of the surrounding area;
C. The expectations of the typical viewer;
D. The project purpose and the context of the proposed activity;
E. The extent, nature, and duration of potentially affect public uses of the scenic resource of state or national significance and the potential effect of the generating facilities' presence on the public's continued use and enjoyment of the scenic resource of state or national significance; and
F. The scope and scale of the potential effect of views of the generating facilities on the resource of state or national significance, including but not limited to, the number and extent of turbines visible from the scenic resource of state or national significance, the distance from the scenic resource of state or national significance, and the effect of prominent features of the development on the landscape.

The framework used for assessing the effects of the Project on historic properties was established by the regulations governing Section 106 of the National Historic Preservation Act. In conducting the assessment, the criterion of adverse effect was applied to each of the properties identified in the survey as listed, determined, or eligible for listing in the National Register. An adverse effect is found when an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association (36 CFR 800.5(a)(1)).

Physical Effects

The APE was established to encompass all Project-related construction activities, including land acquisition, and the area where the turbines and collector lines will be located. No historic properties are in the vicinity of the construction limits of the Project. The Project's potential effects are therefore limited to the possibility that it may cause changes to a historic property's setting due to visual impacts.

Visual Effects

To assess whether the views to the Project would have an unreasonable adverse effect on a historic property, PAL considered the magnitude, distance, and duration of the potential view, along with the qualities of significance that make the properties eligible for listing in the National Register. PAL used the TJD&A viewshed analysis (Figure 11), field observations, and current USGS topographic maps to determine the nature and extent of views that historic properties identified in the APE likely would have of the Project after construction.

The concept of distance zones, developed by the U.S. Forest Service for visual analysis within forested landscapes, was applied for those historic properties likely to have views of the Project. Distance zones are based on the amount of detail that any observer can differentiate at close (foreground), intermediate (midground), and long (background) distances and defined as follows:

- Foreground: 0 to 0.5 mile in distance. Within the foreground, the observer would be able to detect surface textures, details, and a full spectrum of color. For example, the details of the turbines (blade, nacelles, and support towers) would be readily apparent.

- Midground: 0.5 mile to 4 miles in distance. The midground is a critical part of the natural landscape. Within this zone, the details found in the landscape become subordinates to the whole: individual trees lose their identities and become forests; buildings are seen as simple geometric forms; roads and rivers become lines. Edges define patterns on the ground and hillsides. Development patterns are readily apparent, especially where there is noticeable contrast in scale, form, texture, or line. Colors of structures become somewhat muted, and the details become subordinate to the whole. This effect is intensified in hazy weather conditions, which tend to mute colors and de-sharpen outlines even further. In panoramic views, the midground landscape is the most important element in determined visual impact.

- Background: greater than 4 miles in distance. Background distances provide the setting for panoramic views that give the observer the greatest sense of the larger landscape. However, the effects of distance and haze will obliterate the surface textures, detailing, and form of Project components. Objects seen at this distance will be highly visible if they present a noticeable contrast in form or line and weather conditions are favorable.

Effects Assessments

Of the 31 properties in the Project APE that are listed, determined/evaluated as, or recommended eligible for listing in the National Register (see Figure 3a and 3b), none are within the foreground distance; 2 are within the midground distance; and 29 are within the background distance of the proposed Project.

The Mitchell Farmstead at 816 Roxbury Road, Mexico (Survey Map Nos. 85–91; MHPC Nos. 278-0065-HFS, 278-0065, 278-0065 a-d, h) is in the midground distance of the turbine development at approximately 2.3 miles east of the closest turbine. The farm is sited on relatively level terrain with open farmland to

the west (across the street). Clusters of mature evergreen and deciduous trees immediately surround the buildings within the farm complex to the north and across the street to the west and partially screen views of the proposed Project. The property has limited views between 2.8 and 3.1 miles away of the completed RoxWind Turbines and views between 3.7 to 5.9 miles away of the completed Record Hill Turbines. The Project will not alter the immediate landscape setting around this property and views will either be screened or indirect due to elevation, intervening topographical features, and/or screening vegetation (Photo 43).

During its review of the Record Hill Wind Project in 2009, the MHPC found that it would have an adverse effect on the rural setting of the Mitchell Farmstead in Mexico, Maine. An MOA between the Maine State Historic Preservation Office and the USACE specified the preparation of HABS documentation to mitigate the effect. The documentation was prepared and submitted by PAL in 2011. The subsequent development of the RoxWind Project further impacted the rural setting of the farmstead. Because the rural setting of the Mitchell Farmstead has previously been impacted and the effects mitigated, PAL concludes that the Twin Energy Wind Project will have no adverse effect on the integrity of the property.

The Hancock-Somerset-Kennebec-Penobscot Street Historic District on Hancock, Somerset, Kennebec, and Penobscot streets and Androscoggin and Swift avenues, Rumford (Survey Map Nos. C, 274–312, MHPC Nos. 377-0293 – 0320) is within the midground distance of the turbine development at approximately 3.9 miles southeast of the closest turbine. The district is sited on a mix of level and gently sloping terrain and is a densely developed area. The district has screened and intermittent views between 4.8 and 5.2 miles away of the completed RoxWind Turbines. Views toward the Project from the district will be distant and obscured by intervening topography and dense vegetation to the northwest (Photo 44). Due to preexisting views of the RoxWind Project and the limited nature of the views that may be introduced by the Project, PAL concludes that the Project will have no adverse effect on the integrity of the property.

The Farmstead at 1805 Roxbury Road, Roxbury (Survey Map Nos. 51–55; MHPC Nos. 376-0025-HFS, 376-0025, 376-0025a/376-0150b, 376-0026, 376-150a) is within the background distance of the turbine development at 4.23 miles northeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 45). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Rumford Falls Paper Co. Historic District on Lowell and Canal streets, Rumford (Survey Map Nos. A, 232–240, 1375; MHPC No. 377-0090, 377-0091, 377-0269 – 0276, 377-0360) is in the background distance of the turbine development at approximately 4.8 miles southeast of the closest turbine. The district has views between 5.8 and 6.2 miles away of the completed RoxWind Turbines. Views toward the Project will be distant and obscured by intervening topography, dense vegetation, and dense development immediately surrounding the complex (Photos 46–48). Due to the nature of the intermittent views and the fact that such views are not an element of the district's significance, PAL concludes that the Project will have no effect on the integrity of the district.

The Rumford Falls Paper Co. Mill at 60 Lowell Street, Rumford (Survey Map Nos. 239; MHPC No. 377-0091) is in the background distance of the turbine development at approximately 5.2 miles southeast of the closest turbine. The building is on relatively level terrain and is in a densely developed area. The property has views between 5.8 and 6.2 miles away of the completed RoxWind Turbines. Views toward the Project from the resource will be distant and obscured by intervening topography, dense vegetation along the Androscoggin River to the northwest, dense development in the downtown immediately surrounding the building and to the northwest, and the steam generated by the paper mill (Photos 49 and 50). Due to the nature of the intermittent views and the fact that such views are not an element of the property's significance, PAL concludes that the Project will have no effect on the integrity of the property.

The Rumford Falls Paper Co. Office Building at 60 Lowell Street, Rumford (Survey Map Nos. 240; MHCP No. 377-0090) is in the background distance of the turbine development at approximately 5.2 miles southeast of the closest turbine. The building is on relatively level terrain and is in a densely developed area. The property has views between 5.8 and 6.2 miles away of the completed RoxWind Turbines. Views toward the Project from the resource will be distant and obscured by intervening topography, dense vegetation along the Androscoggin River to the northwest, and dense development in the downtown immediately surrounding the building and to the northwest (see Photo 46). Due to the nature of the intermittent views and the fact that such views are not an element of the property's significance, PAL concludes that the Project will have no effect on the integrity of the property.

The Rumford Commercial Historic District on Lowell, Congress, River, Portland, Hartford, Exchange, and Bridge streets, Rumford (Survey Map Nos. B, 241–273; see Survey Matrix) is in the background distance of the turbine development at approximately 4.9 miles southeast of the closest turbine. The district is on relatively level terrain and is a densely developed area with one- to five-story buildings. The district has views between 5.8 and 6.2 miles away of the completed RoxWind Turbines. Views toward the Project will only be at the north end of the district in the vicinity of Portland Street. Views toward the Project will be distant and obscured by the intervening topography, dense vegetation along the Androscoggin River to the northwest, and dense development in the downtown to the northwest (Photos 51–53; see Photos 49 and 50). Due to the limited intermittent views toward the proposed Project and the previous impacts to the general viewshed caused by the RoxWind Project, PAL concludes that the Project will have no adverse effect on the integrity of the district.

The Municipal Building at 145 Congress Street, Rumford (Survey Map No. 246; MHPC No. 377-0102) is in the background distance of the turbine development at 5.15 miles southeast of the closest turbine. The building is sited in the Rumford Commercial Historic District on relatively level terrain and is in the densely developed downtown. The only potential views from the building will be from the top floors during leaf-off season. These views would be distant and obscured by the intervening topography, dense vegetation along the Androscoggin River to the northwest, and dense development in the downtown immediately surrounding the building and to the northwest (see Photos 51 and 52). Due to the distant and limited nature of the views, PAL concludes that the Project will have no adverse effect on the integrity of the property.

The Mechanic Institute at 52–60 Congress Street, Rumford (Survey Map No. 269; MHPC No. 377-0105) is in the background distance of the turbine development at approximately 5.2 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (see Photo 53). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Rumford Falls Power Co. Building at 49 Congress Street, Rumford (Survey Map No. 270; MHPC No. 377-0104) is in the background distance of the turbine development and 5.27 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (see Photo 53). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Strathglass Building at 23 Hartford Street, Rumford (Survey Map No. 273; MHPC No. 377-0103), is in the background distance of the turbine development and approximately 5.2 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 54). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Kimball Farmstead at 63 Kimball Road, Rumford (Survey Map Nos. 501–507, MHPC No. 377-0348-HFS – 0348e) is in the background distance of the turbine development at 4.45 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 55). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Residence at 34 Penley Street, Mexico (Survey Map No. 730, MHPC No. 278–0048) is within the background distance of the turbine development at approximately 4.3 miles southeast of the closest turbine. The property is in a hilly densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 56). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Mexico Congregational Church at 163 Main Street, Mexico (Survey Map No. 659) is in the background distance of the turbine development at 4.85 miles southeast of the closest turbine. The property is on relatively level terrain and is in a densely developed area on the east bank of the Androscoggin River. Views toward the Project will potentially consist of distant and obscured views of the uppermost parts of the turbine blades. These views will be mostly obscured by

the intervening topography, dense vegetation along the Androscoggin River to the northwest, dense development in the downtown to the northwest, and atmospheric hazing elements generated by the paper mill (Photo 57). Due to the distant and limited nature of the views, PAL concludes that the Project will have no adverse effect on the integrity of the property.

The Hancock Apartments at 520 Hancock Street, Rumford (Survey Map No. 909, MHPC No. 377–010) is within the background distance of the turbine development at approximately 4.6 miles southeast of the closest turbine. The property is in a densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 58). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Hancock Street Housing Historic District on Hancock Street, Rumford (Survey Map Nos. D, 918–926) is in the background distance of the turbine development at approximately 4.7 miles southeast of the closest turbine. The property is sited on relatively level terrain and is in a densely developed area immediately adjacent to the Strathglass Historic District. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 59). PAL therefore concludes that the Project will have no effect on the integrity of the district.

The Residence at 125 Franklin Street, Rumford (Survey Map No. 1039) is in the background distance of the turbine development at approximately 4.9 miles southeast of the closest turbine. The property is sited on sloping terrain in a densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 60). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The George and Edith Stratton Pettingill Residence at 347 Pine Street, Rumford (Survey Map No. 1118, MHPC No. 377–0007) is in the background distance of the turbine development at approximately 4.6 miles southeast of the closest turbine. The property is sited on sloping terrain in a densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 61). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The First Baptist Church at 112 Washington Street, Rumford (Survey Map No. 1227) is in the background distance of the turbine development at approximately 5 miles southeast of the closest turbine. The property is sited on sloping terrain in a densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening

topographical features, and/or screening vegetation and development (Photo 62). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Strathglass Park Historic District on Erchles, Lochness, and Urquhart streets and Claclan Place (Survey Map Nos. E, 1250–1299) is in the background distance of the turbine development at approximately 4.6 miles southeast of the closest turbine. The district is in a hilly densely developed area. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the district will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photos 63 and 64). PAL therefore concludes that the Project will have no effect on the integrity of the district.

The Somerset Street Residential Historic District on Somerset Street, Rumford (Survey Map Nos. F, 1300–1304) is in the background distance of the turbine development at approximately 4.9 miles southeast of the closest turbine. The district is sited on sloping terrain in a densely developed area immediately south of the Strathglass Park Historic District. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 65). PAL therefore concludes that the Project will have no effect on the integrity of the district.

The Second A. E. Morrison Residence and Carriage House at 175 Essex Street, Rumford (Survey Map No. 1306 and 1307; MHPC Nos. 377–0008, 3777–0008a) is in the background distance of the turbine development at approximately 4.6 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 66). PAL therefore concludes that the Project will have no effect on the integrity of the property.

St. Athanasius-St. John the Baptist Church at 126 Maine Avenue, Rumford (Survey Map No. 1325; MHPC No. 377–0162) is in the background distance of the turbine development at approximately 4.9 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 67). PAL therefore concludes that the Project will have no effect on the integrity of the property.

St. Barnabas Church at 71 Rumford Avenue, Rumford (Survey Map No. 1343; MHPC No. 377–0356) is in the background distance of the turbine development at 4.95 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 68). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The WWI Monument on Rumford Avenue, Rumford (Survey Map No. 1344; MHPC No. 377–0353) is in the background distance of the turbine development at approximately 5 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 69). PAL therefore concludes that the Project will have no effect on the integrity of the monument.

The Residence at 55 Holyoke Avenue, Rumford (Survey Map No. 1363, MHPC No. 377–0150) is in the background distance of the turbine development at approximately 4.9 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 70). PAL therefore concludes that the Project will have no effect on the integrity of the property.

The Morse Bridge #2585 on Bridge Street, Rumford (Survey Map No. 1370; MHPC No. 377–0351) is in the background distance of the turbine development at approximately 5.3 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 71). PAL therefore concludes that the Project will have no effect on the integrity of the bridge.

The Hartford Street Bridge #3638 on Hartford Street, Rumford (Survey Map No. 1371; MHPC No. 377–0350) is in the background distance of the turbine development at 5.25 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (see Photo 46). PAL therefore concludes that the Project will have no effect on the integrity of the bridge.

The Chisholm Park Bridge #2990 on Portland Street, Rumford (Survey Map No. 1372; MHPC No. 377–0352) is in the background distance of the turbine development at 5.05 miles southeast of the closest turbine. The findings of the reconnaissance survey fieldwork and information provided by the TJD&A visual assessment indicate the property will have no views of the constructed Project due to elevation, intervening topographical features, and/or screening vegetation and development (Photo 72). PAL therefore concludes that the Project will have no effect on the integrity of the bridge.

The High Bridge on South Rumford Road, Rumford (Survey Map No. 1373, MHPC No. 377–0290) is in the background distance of the turbine development at approximately 5.8 miles southeast of the closest turbine. The bridge is sited on relatively level terrain and is at a high elevation in a sparsely settled area just southeast of the Rumford Falls. Views toward the Project from the resource will be distant and obscured by intervening topography, dense vegetation along the Androscoggin River to the northwest, and dense development in the downtown to the northwest (Photo 73). Due to the distance and intermittent nature of the

views and because such views are not an element of the property's significance, PAL concludes that the Project will have no effect on the integrity of the bridge.

The Rumford Falls Hydroelectric Facility and Canal Historic District on the Androscoggin River between South Rumford Road, Prospect Avenue, and Bridge Street, Rumford in Rumford (Survey Map Nos. G, 1374–1382; MHPC Nos. 377–0002, 377–0362, 377–0363 - 0367, 377–0088) is in the background distance of the turbine development at approximately 5.3 miles southeast of the closest turbine. The district has views between 6.4 and 6.8 miles away of the completed RoxWind The turbines. Views toward the Project from the district will be distant and obscured by intervening topography, dense vegetation along the Androscoggin River to the northwest, and dense development in the downtown immediately surrounding the building and to the northwest (see Photo 73). Due to the distance and intermittent nature of the views and because such views are not an element of the property's significance, PAL concludes that the Project will have no effect on the integrity of the district.

77 Exchange St
Suite 401
Bangor, ME 04401

Project: MHPC #1201-22 Twin Energy Wind Project; Northeast of Black Mountain Proposed Wind Energy Project

Town: Roxbury, ME

Dear Mr. Lightbody:

In response to your recent request, I have reviewed the information received July 11, 2022 to initiate consultation on the above referenced project in accordance with the requirements of Maine Department of Environmental Protection.

There are National Register listed or known eligible historic architectural resources within the 8-mile presumed area of potential effect (APE). However, our survey data is incomplete for the entire APE.

If required by the MDEP, or if the project becomes a federal undertaking, an architectural survey will be necessary to identify and record information on all resources within the area of potential effect (APE) that are at least 50 years old. Survey must be completed according to our "Revised Above Ground Cultural Resource Survey Manual Project Review Specific." All surveys must be submitted electronically via our on-line CARMA database. See our website for more information: https://www.maine.gov/mhpc/quick-links/forms-instructions

A list of historic preservation consultants who are qualified to conduct architectural survey and have been trained in the use of the CARMA database may be found at the following page of our website: https://www.maine.gov/mhpc/programs/survey/approved-consultants/carma-trained-consultants

No archaeological properties will be affected by this undertaking.

We look forward to continuing consultation with you. If you have any questions regarding this matter, please contact Megan M. Rideout of this office with questions at megan.m.rideout@maine.gov.

Sincerely,

Kirk F. Mohney
State Historic Preservation Officer

Re: Twin Energy Wind Project, Roxbury, ME, MHPC #1201-22
Historic Architectural Reconnaissance Survey
PAL #4252

Dear Mr. Mohney:

On behalf of Twin Energy, LLC, PAL is submitting for your review the enclosed historic architectural reconnaissance survey materials for the Twin Energy Wind Project in Rumford, Maine. The materials consist of:

- One copy of the survey report entitled, *Architectural Survey Report, Twin Energy Wind, Carthage, and Weld, Franklin Co.; Andover, Byron, Dixfield, Hanover, Mexico, Milton, Newry, Roxbury, and Rumford, Oxford Co., MHPC No. 1201-22*;
- One original set of Maine Historic Preservation Commission (MHPC) inventory forms for 663 newly identified properties (817 forms) within the project's area of potential effects (APE), printed according to MHPC-approved format from May 5, 2022;
- Copies of 101 forms for previously inventoried properties (excluding forms from the RoxWind Survey) within the APE that were reviewed in the field and updated, as necessary;
- A large-scale map set showing the location of properties surveyed within the APE;
- One copy of the survey matrix;
- One copy of the photo index; and
- One compact disk containing images of properties surveyed.

26 Main Street Pawtucket, RI 02860 | 401.728.8780 Main | 401.728.8784 Fax
palinc.com

On the basis of the information collected during the survey, PAL recommends that the Twin Energy Wind Project will have no adverse effect on properties that are listed or eligible for listing in the National Register of Historic Places. If you have any questions or require additional information about these products, please do not hesitate to contact me or Stephen Olausen, Executive Director/Senior Architectural Historian, at your convenience.

Sincerely,

Melissa Andrade
Architectural Historian
