Hello,

I support the legislation mentioned in my subject heading. Clean cars and trucks and a transition to zero-emission needs to happen ASAP. This transition is long overdue. Mainers deserve cleaner air and better choices. Our families and businesses will save money as a result.

The standards will phase in gradually, holding automakers accountable for providing more zero-emission vehicles in Maine over time as more models become available, which is what we need.

Also, more charging stations need to be provided, so I firmly support that happening as soon as possible.

Thanks,

Tom Aversa
