To the EP Board:

I support ways of encouraging increased use of EVs such as increased inventory, rebates, more widely available charging stations, etc.

I am concerned, however, and do not support establishing quotas or requirements for increased private, government or business use of EV. I most specifically do not support following or adopting goals, guidelines or requirements developed by or for the state of California-or any other state. Maine's demographics, geography, weather/climate, infrastructure, transportation system and needs, and our local values and priorities must be the basis for developing state rule making and/or legislation - not wholesale adopting something that wasn't developed with our data.

Thank you,

Tamara Mitchell
