I strongly support this rule in order to hasten Maine's transition to ZEVs. The transportation sector accounts for the majority of greenhouse gas emissions impacting communities around the state, and taking these steps is the right thing to do. I hope ZEVs will be available and affordable for all Mainers, including good quality used ZEVs. Significantly reducing pollution from cars and trucks provides important benefits to those living closest to transportation corridors, which include many distressed municipalities; this is an environmental justice issue as well as a climate and health issue. For the health of everyone this program is essential as is the infrastructure needed to support more ZEVs on the road. Please support this rule in its entirety. Thank you.
