I would like to comment on the Advanced Clean Cars II Program in Maine

My wife and I live in Portland and we are very concerned about trying to live on a habitable planet in the face of Climate Change (CC). The US and the world have been severely under performing in our efforts to reduce CC gases since the 1980's. Now we must take action, immediately!

Since transportation is THE biggest source of CC Gases in Maine, we need to have the Advanced Clean Cars program in place to have a chance to meet our stated goals and save a livable earth. The ACC allows some flexibility in the timetable for mandating it's goals, yet will get us there in time. This will help implement EV in a largely rural state.
