To The Maine Department of Environmental Protection~

I would like to object to adopting "California style" standards for Maine. I have read some of the "California style" regulations and the impacts on middle class and trucking industry. It appears to be on course to put the independent trucking operator out of business. It appears to put the middle class working public to be without personal vehicles.

The intent to remove CO2 is misguided, will serve no purpose, and have no effect on the climate. Maine is not a rich state and requirements like these is ruinous.

Sincerely,

James Fisk RLA, TPI
