Dear DEP staff/board:

I strongly support the position of the League of Conservation Voters in regard to Draft Rules 127 and 128 for advanced clear cars and trucks. That means the FULL achievement of 100% renewable energy for the sale of those vehicles by 2035.

We have no time to waste. One only has to look west for the on-going heat domes, north to the fires burning in Canada, or east to the rising temperatures of the Gulf of Maine to understand that our situation is dire. I have grandchildren and I desperately want them to inherit a habitable planet. You can help by establishing rules that get us as quickly as possible to zero emissions.

Respectfully,
Joseph Hardy, Wells
