Good afternoon Elena and Brian,

Hope you are both doing well. Worthington has sent their comments in as part of the stakeholder meetings and is participating. We weren't sure if the concerns about why the alternative collection system were clear enough through those interactions. As a result, we did try to illustrate the concerns in the attached slides (e.g., one which shows the traditional model, the Maine system where a producer uses the alternative collection system, and then the Maine system where a producer simply chooses to participate in the common system run by the PRO). We would be pleased to sit down separately to discuss these issues if that might be helpful.

All the best,
Peter
