

Application for Certification in Erosion and Sediment Control Practices

Applicant Name: _____

Company Name: _____

Company Address: _____

Company Telephone #: _____

Email Address: _____

1. Qualifications:

Check all that apply:

- I hold an active CPESC/CESSWI Certification # _____, Exp _____
- I currently hold a provisional DEP Erosion Control Certification # _____
- I have completed the Basic & Advanced Erosion Control Class within the last 3 years
Class Location _____ Date _____

2. Demonstration of Competency

Demonstrate competency in the installation, inspection, or planning for site-specific erosion and sedimentation controls. Choose one of the options shown below based on the type of erosion control work you conduct (A-G). Additional demonstration of competency is not required for individuals with CPESC or CESSWI Certifications.

Methods to Demonstrate Competency	
Options for Erosion Control Installers (Contractors)	A. Submit documentation of inspection of the contractor's site by a person with active CPESC certification. B. Submit documentation of inspection of the contractor's site by a Maine DEP Site 3rd Party Inspector or Third Party Inspector approved for construction-phase inspections by the MS4 town in which project is located C. Submit documentation of a successful compliance inspection by Maine DEP, Maine LUPC, or Maine DOT Environmental Office staff D. Photo demonstration: Submit multiple photos of a site under construction showing: <ol style="list-style-type: none"> 1. sediment barriers installed prior to soil disturbance; and 2. continued function of Erosion and Sedimentation Control (ESC) BMPs during construction; and 3. final, permanent stabilization of the site
Option for Erosion Control Inspectors	E. Submit documentation of an inspection you have performed of an active construction site that includes photographs of the entire site, identification of any required fixes, changes, or maintenance to BMPs on-site, documentation of proper BMP function, and evaluation of whether either a discharge from the project site or a discharge to natural resources was observed.
Options for Erosion Control Plan Preparers	F. Submit documentation of acceptance of a SWPPP or ESC Plan prepared for: a MaineDOT Contract; a Maine DEP Stormwater Law or Site Law permit; or a LUPC permit. G. Documentation prepared by the creator of a SWPPP or ESC Plan that the contractor fully implemented the accepted plan.

By signing the application for Certification in Erosion Control Practices, I understand that:

- Soil erosion and sedimentation controls are required anywhere soil is disturbed in Maine to prevent soil from leaving a project site or entering a protected natural resource.
- Violations of Maine Law resulting in damage to a natural resource may result in loss of certification; and
- I am required to meet additional responsibilities under the Maine Construction General Permit or municipal Shoreland Zoning Regulations, where applicable

Signature _____ Date of Application: _____

Certification application packages can be submitted by email to john.maclaine@maine.gov or by mail to:

John Maclaine - Maine DEP, Nonpoint Source Training Center
17 State House Station, Augusta, Maine 04333
